

# MyEasy Farm

## Data at the service of the agro-ecological transition

**MyEasyFarm** supports agricultural supply chain actors in their **agro-ecological transition** thanks to its Data collection, calculation and reporting platform, for **Precise, Regenerative and Decarbonized Agriculture**

**LABEL BAS  
CARBONE**

Measure the environmental performance of your entire value chain : Farmers, Cooperatives, Agribusinesses, Distributors.

Regenerative Agriculture and Low Carbon Agriculture

**Get started  
now !**

## Project Manager

**Management and reporting** of all types of projects (supply chain projects, Low Carbon Label, simplified diagnostics, other methodologies, etc.), while providing **visualization and analysis of the farms** concerned through customized dashboards.

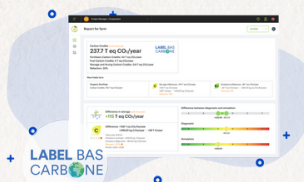

## Advisor

Facilite le diagnostic et le **suivi de plusieurs exploitations** par le conseiller agricole ou l'auditeur de projet

## Farmer

Carbon diagnostics, simulation and monitoring of changes in farming practices, for the generation of **carbon credits** or **chain premiums**.

## Simplified diagnostic

A **fast, fun** tool for **diagnosing and simulating** changes in farming practices, to raise farmers' awareness of the agro-ecological transition.

## Interoperability

Our **precision agriculture platform** makes it easy to collect **reliable, verifiable data**, thanks to interoperability with farm applications: plot management software, Telepac, farm equipment, satellites, decision-support tools, weather stations...
