

Your trusted partner
for Climate and
Biodiversity actions

Capability Presentation

Jan. 2024

DT Master Carbon is your ideal partner for your engagement in climate and biodiversity

DT Master Carbon proposes a strategic partnership with our clients to enhance their sustainability initiatives. This partnership will leverage DT Master Carbon's expertise in climate and biodiversity solutions, tailored to our clients' unique needs and size.

At DT Master Carbon we place our clients at the heart of the company.

We systematically start with questions and expectations, answer them precisely, and anticipate future needs.

Listening to Our Clients

Understanding Motivations and Concerns

Meeting Expectations

Anticipating Needs

DT Master Carbon offers comprehensive solutions and services for your company's actions in Climate and Biodiversity

Climate & Biodiversity Strategy

- Carbon footprint calculation (Scope 1, 2, 3)¹
- Climate strategy: net-zero trajectory²
- Decarbonization strategy: emission reduction³
- Strategy CSR / ESG
- Life Cycle Assessment
- Green IT/Eco-conception
- Action plan & accompany
- Communication & reporting
- Biodiversity consulting
- ESG training

**Climate,
Community,
Biodiversity
solutions for
your company**

- Project development
- Certification support (Verra, Gold Standard, others)
- Carbon offset brokerage
- REC/GoO/IREC brokerage
- Financing support

- ## Software
- Marketplace of environmental commodities
 - White label marketplace
 - Corporate Biodiversity Platform

- Remote sensing for nature-based projects
- Industrial sensors tracking for engineering-based projects
- Carbon sequestration report
- Biodiversity report

Environmental commodities

MRV SaaS

DT Master Carbon : our technologies and services

Our Carbon Credit Marketplace

- b2b carbon credit marketplace with built-in MRV.
- Around 500 quality projects covering most methodologies.

Our marketplace In white label

Transform our marketplace into yours with your projects and for your customers and partners.

Our MRV

- Our MRV technology provides carbon and biodiversity sequestration reporting providing a solid foundation for transparent and responsible environmental credit trading.
- Follow your biodiversity and nature projects through high technology such as AI, IoT, infra-red or satellite pictures

B Map Open biodiversity

Database referencing bioiversity initiatives for corporates align with CSRD ESRS 4 and other regulations

- Referencing initiatives of your biodiversity projects of our database
- Knowing biodiversity initiatives of your clients and suppliers
- Access to your own biodiversity reporting

Our support program

A personalized service to support public and private organizations at every stage of their climate commitment.

Program by industry
Program by level
Tailor-made support (on request)

DT Master Carbon supports you towards a complete green strategy

Carbon footprint calculation (scope 1, 2, 3)

1. Carbon footprint scope 1 to 3 calculation using the "Bilan GES"
2. Standard tools for carbon footprint calculation: 1). Bilan Carbone®, 2). GHG protocol

Climate and decarbonization strategy toward the net-zero trajectory

1. SBTi standard & GHG protocol to evaluate target reduction
2. Holistic climate strategy by examining companies' activity impact (vulnerability, hazard, etc.) to align with the company's ESG strategy
3. Detailed action plan for climate strategy by identifying the main levers.
4. Net-zero trajectory following the order of 3 steps: 1). reducing own GHG emissions 2). contributing to reducing emissions of "others" 3). financing carbon sink
5. Internal and public data and co-construct a digital solution to monitor the carbon offsetting projects

Green implementation, marketing and communication advisory

1. Workshop to benchmark, identify, and prioritize the main actions to implement the net zero strategies
2. Analysis of product's life cycle assessment (LCA, Green IT, or eco conception)
3. Portfolio of carbon offset projects that match the client's budget and CSR strategy to reach their net zero strategy
4. Support in communicating climate actions in CSR strategy and green marketing

Carbon offset advisory

1. Support to project design, due diligence, certification, financing, generating carbon offsets and trading carbon offsets

Biodiversity and sustainability advisory

1. Developing strategies for providing financial products that support sustainable products
2. Advising on incorporating ESG (environmental, social governance) factors into investment decisions
3. Assessing the financial risk associated with climate change and biodiversity
4. General biodiversity and CSRD reporting
5. Sustainability Tourism
6. ESG Training

We follow these standards

Agence de l'Environnement
et de la Maîtrise de l'Energie

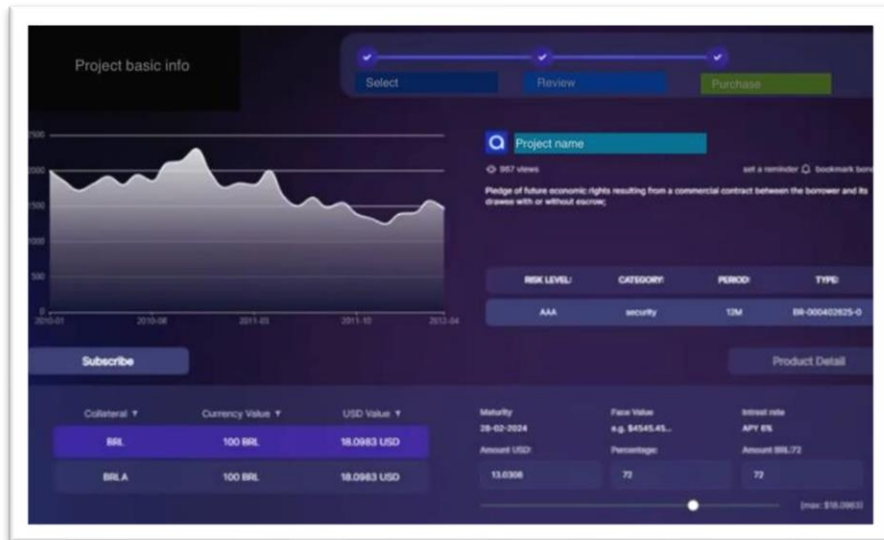

Stratégie nationale
bas-carbone

Standard

Carbon offsetting & sustainable development marketplace + MRV

Marketplace features and functions

- Over **500 global solutions** to combat climate change
- Possibility of direct purchase or becoming a co-developer of climate/environmental projects related to **carbon, renewable energy, biodiversity**, etc.
- **Lower prices** compared to the market
- Simplified KYC* and administrative processes

Reporting and monitoring software

- **Carbon sequestration and biodiversity reporting SaaS** for **nature projects** (satellite images and AI)
- Carbon sequestration reporting SaaS for **industrial decarbonization projects (CCUS, DAC)** using sensors

Our Services + Solutions for Corporate Biodiversity Actions

The screenshot displays the DT MASTER Biodiversity Tracker interface. At the top, it reads "Biodiversity tracker, in line with Kunming Montreal Global Biodiversity Agreement". A search bar is present with the placeholder "Find a company". Below this, a profile for "Danone" is shown, indicating it is in the "Sector Agrifood" and has "10 000+ employees". A "Go to this page" button is visible. A navigation bar includes links for "Biodiversity Data", "Other Biodiversity Impacts", "Biodiversity Action Plan", "Biodiversity strategy", and "Biodiversity offers".

The main content area features a table with the following data:

Company	Sector	Relation	Biodiversity actions	Date range
All Index	Allied	Strong	Restoration forestry	Between 2017 and 2022
Danone	Agrifood	Strong	Protects soil, water, biodiversity	2015 - 2021
Albermarle & Tech	Fashion	Insufficient	No biodiversity actions	2017-2019
Plus	High Tech	Highly insufficient	No actions	2017 - 2022

On the right side, there are sections for "Sources and reliability" (including "Danone public reporting"), "Biodiversity related labels", and "Same sector's companies" (with logos for Yogen and others).

Corporate Biodiversity Solution + Platform

- A database of 50+ companies with their biodiversity initiatives
- Benchmark of biodiversity actions according to CSRD ESRS E4 criteria
- A pivotal tool to support companies in selecting their clients and suppliers
- AI recommendation for best practices for biodiversity initiatives

We offer outstanding solutions and services for companies with proven track records

Tailored Support
Program to ensure service/project quality

Dual track services for both **climate and biodiversity** actions

Monitoring and reporting SaaS to ensure **credibility and transparency**

Extensive **expertise in relevant industries**
