Reflexcare, a medical device

We have created an innovative device that combines cutting-edge technology, human expertise and scientific advances to revolutionize rehabilitation. Based on extensive research, our dual-task approach, combined with motivating patient incentives, ensures optimal assimilation of cognitive and motor rehabilitation. This method simultaneously stimulates multiple brain and body functions, resulting in significant and lasting progress.

Reflexcare revolutionizes rehabilitation by offering patients a personalized experience. Designed by professionals, it is flexible enough to adapt to a wide range of needs, enabling customized programs. This individualized approach motivates patients and accelerates their functional recovery, making Reflexcare an essential ally in rehabilitation.

Certified "medical device"

Reflexcare enables many professions to adapt their practices. In medical and social establishments, Reflexcare encourages multidisciplinary sharing around a patient or resident.

Reflexcare - Innovation for rehabilitation and autonomy

Key benefits :

Exercise customization: Adapted to each patient, Reflexcare offers tailor-made exercises that optimize rehabilitation efficiency and improve patient engagement.

Pluridisciplinarity and Collaborative Follow-up: Reflexcare facilitates collaboration between physiotherapists, orthoptists, occupational therapists and other professionals, enabling coordinated and enriched follow-up for each patient.

Nomadic and easy to use: Transportable and ergonomic, Reflexcare adapts to a variety of care environments with its compact case and intuitive application, making it simple to use for practitioners and engaging for patients.

Increased motivation and adherence: Thanks to its interactive and stimulating protocols, Reflexcare makes rehabilitation sessions more engaging, which boosts patient adherence and maximizes the impact of the sessions.

Practitioner testimonials:

"Reflexcare transforms rehabilitation sessions for everyone, enabling us to innovate in our practices and personalize our patient approach." – Élodie, occupational therapist

Start using your **REFLEXCARE** with its built-in exercises!

Use the versatility of Reflexcare to design your exercise routines, integrating visual elements such as colors, images and icons, as well as sound and tactile elements. You can also incorporate objects from your environment to intensify your workouts and personalize them to your liking.
