

Discover how **Google Services** will become
a **game changer** in your daily work

Legamaster Brand of the edding Group

Long-lasting, versatile, expressive, creative: these are the words that describe the values of the edding Group.

The edding Group, founded in 1960 by Carl-Wilhelm Edding and Volker Detlef Ledermann, has evolved from a two-man business to an international powerhouse with over 735 employees. The company's journey began with the iconic all-round marker no.1, setting the standard for a legacy of markers. Today, the edding Group's products are sold **worldwide in more than 110 countries**. This success is based on three brands: edding, Playroom and Legamaster.

For over 60 years Legamaster is actively adapting its assortment to the latest trends and developments in communication technology. Legamaster is located at the top of the European market sector. A manufacturer with a long history and two production plants in Europe and South America, which quickly and accurately respond to current market requirements.

Factsheet: Google Services

A New Era of Teamwork: How Google Services (EDLA) is Changing the Game

As the quest for efficient teamwork forms the bedrock of modern productivity, the Enterprise Device licenses agreement (EDLA) emerges as a transformative force. This all-encompassing solution melds flawlessly with top platforms, bestowing a plethora of features that amplify collaboration, communication, and efficiency. Explore the reasons that make Google Services indispensable for a state-of-the-art collaborative environment:

Official access to the Google Play Store: The presence of the official Google Play Store allows users to download and install apps on their board. Offering an extensive library of educational and productivity tools, Google Play opens up many possibilities for teaching and working.

Seamless integration with Google tools: Users can now access Google for Education tools such as Google Docs, Sheets and Slides directly from their monitor. This integration simplifies work processes and enables seamless app changes.

Improved device security: With the Google Play Protect service, the Google Play Store offers an additional layer of security. It checks apps for suspicious behaviour, prevents potentially harmful apps from being downloaded and removes apps with malicious behaviour that have already been installed.

EVOLVE 2 Touch monitor

Take control of your future with EVOLVE 2. Whether at work or in the classroom, our latest product series offers technology that enhances your productivity and creativity.

Benefits of EVOLVE 2:

- **Google Certified:** Boost productivity with streamlined collaboration.
- **Up to 50 Touch Points:** Intuitive interaction for writing and more.
- **Dual USB-C Ports:** Connect devices with one cable.
- **Customizable Security:** Safeguard your IT systems.
- **Accessories Galore:** Mounting systems, cameras, and more.
- **1% for the Planet:** Choose sustainability. Contribute to global environmental protection.

Join the EVOLVE revolution. Elevate your workspace.
Experience innovation like never before.

Get your ECO stylus for a nostalgic writing style

EXPLORE 2 + NAVIGATOR Our 1 + 1 Solution

The EXPLORE 2 touch monitor, combined with the Google Certified (EDLA) NAVIGATOR, breaks traditional boundaries and opens up new horizons of creative and collaborative work.

Benefits of EXPLORE 2:

- **Absolute Security:** Operating without an OS means no apps, accounts, or stored data on the device.
- **Zero-Gap Bonding:** The seamless connection between glass and display ensures precision like never before.
- **40 Touch Points:** From our ECO stylus to fingertips and palms, the high-precision touch system detects every gesture. Writing, moving objects, and erasing become second nature.
- **Incredible Quality, Affordable Price:** Get exceptional value without compromise.
- **1% for the Planet:** Choose sustainability. Contribute to global environmental protection.

Benefits of the OPS NAVIGATOR:
