MOTIONSIGN SOLUTIONS

The avatar can translate any type of content into sign language (Website, FAQ, text, vidéos...)

Signbot like the chatbot, is an artificial intelligence-based computer program that enables our avatar to respond in real-time to a user's questions in sign language.

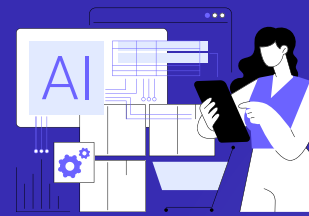

Our digital avatar create immersive, inclusive experiences in the metaverse, improving accessibility, social interactions (visit of museums), and learning of sign language.

HOW OUR TECHNOLOGIE WORKS

Let's Enable Inclusive Communication !

An artificial intelligence-driven software solution

Our solutions continually learns from each interaction to offer an even more personalized conversational experience.
