colorwayXpress
design coloring software

Quickly colorize both conventional and digital designs ==without disturbing the color harmony and effects on the design== with ColorwayXpress.

original

created with colorwayXpress

RGB Colorization

You can ==assign colors== to areas with effects, ==colorize== them separately, or assign colors from the Color Picker. Additionally, you can generate wonders by combining ==several effects== such as Hue Saturation, Selective Color and Gradient Map.

==Fast color separation== colorizes your RGB / digital designs. The purpose of Fast Color Separation is selecting colors on the design based to their darkness and brightness values and coloring them without disturbing the color harmony.

Archive System

Finding the design you're looking for is very easy with the ==fully integrated Archive System.== Designs can be found by using fields like Design Number, Category, Customer, Screen Status and Designer. Results can be sorted using fields like Design Number, Date Uploaded and Date Edited. Without opening the designs, you can view all of the information and browse through the colorways.

Also ==''AI-powered Similar Design Search''== makes design search easier.

Color Catalogs

While coloring the designs, you can use globally accepted color standards, generate your own color catalogs, or use the automatic generator feature.

features:

- ♥ Design Colorization
  - ↳ Conventional
  - ↳ RGB
- ♥ Archive System
- ♥ Automatic Colorways
- ♥ Centralized Work
- ♥ Colorway Transfer
- ♥ ERP Integration
- ♥ AI Features
- ♥ Color Catalogs

- ♥ Screen-Fabric Color Match
- ♥ Work Remotely
- ♥ Conventional Print Simulation
- ♥ Storage Saving Colorways
- ♥ Fabric Texture Simulation
- ♥ Copy Protection
- ♥ CAD Presentations
- ♥ Garment Catalog

#select from catalogs or generate your own color catalog

CAD Presentations

Creating CAD presentations is now very easy with the tailored layouts for your business. Choose a layout, select colorways, and leave the rest to the ColorwayXpress.

Ruler, print size and garment mockups are calculated automatically. CAD Presentations are prepared within seconds.

#created with love using colorwayXpress

#jaw-dropping CAD presentations

Garment Catalog

GarmentXpress is a feature within ColorwayXpress that offers access to 3D garments to create jaw-dropping CAD presentations. With GarmentXpress, you can choose from hundreds of ready-made models and quickly create high-quality CAD presentations.
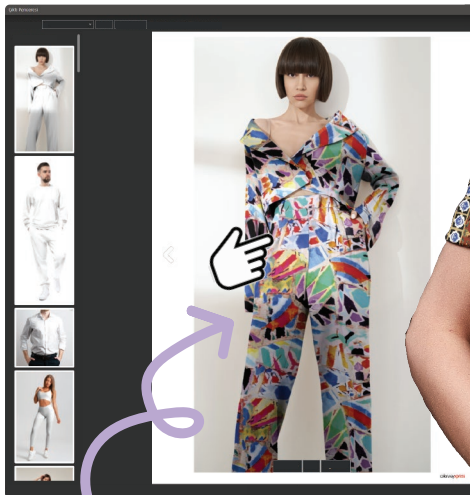

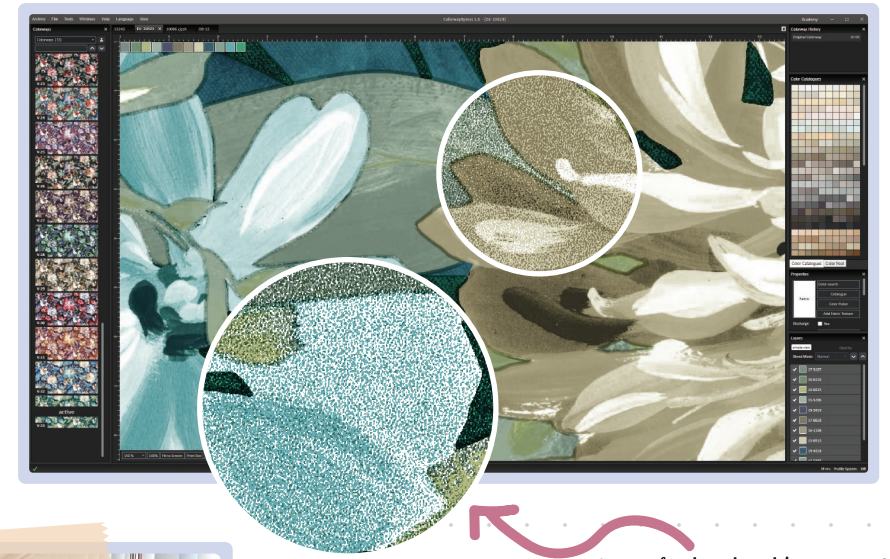

#adjust the colorway position
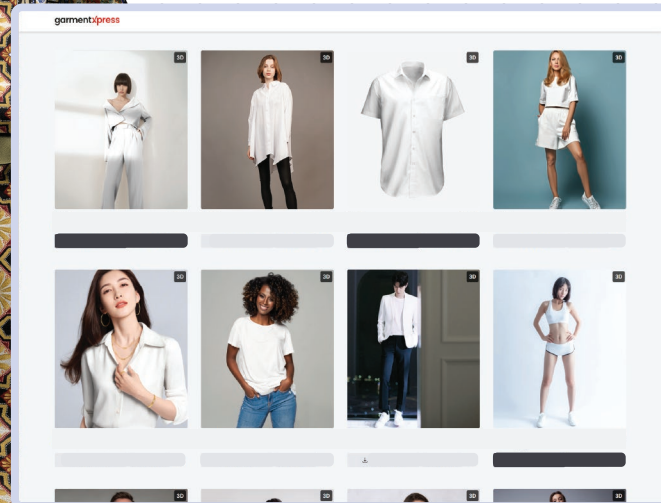

Conventional Print Simulation

ColorwayXpress generates print simulations of conventional designs within seconds. These simulations can be sent to customers digitally, printed on paper, or digitally printed on fabric without any conventional printing.

It also simulates the ink bleeding on the fabrics.

#realistic to the core!

Screen-Fabric Color Match
Color Calibration

Color samples from your digital printings are imported to ColorwayXpress via the enhanced ICC Profile system, creating a unique printing simulation. It reduces your test prints up to 90% matching the screen and fabric.

Automatic Colorways

Create unlimited automatic colorways of digital and conventional designs while maintaining the design's structure and color transition. Choose your favorites or keep modifying them. Use your customer's colors or ColorwayXpress's catalogs to create wonders!

#just one click!

Design Colorway Repair

If repeating errors or motif errors are discovered after the colorways are created, all colorways can be corrected with a single file editing operation. Design repair can be done quickly without correcting all the colorways.

Storage Saving Colorways

The file sizes of colorways are not a problem anymore. With the algorithms we have specially developed, the colorways created with ColorwayXpress do not take up space, they save up to 90% compared to the other softwares.

ERP Integration

ColorwayXpress can exchange information, send data, and process incoming data from any ERP software. It adapts to the current flow of your company and does not need any additional budget.

Colorway Transfer

Quickly transfer favorite colorways to different designs. Colorways can be transferred between designs with the same colors but different motifs and sizes. It's also as simple as copy-paste.

Centralized Work

All users work with a shared archive system. Users can view each other's work instantly. Users do not need to download designs or colorways to work with. So there are no data flow issues and file transfer delays.

Online Academy

Meet ColorwayXpress Academy, where new content is added and updated on a regular basis. Here you can find instructions for using all of ColorwayXpress's features. Learn how to do everything and how to use all of the features. Moreover, with both text and video explanations.

eColorway
online archive software

eColorway is an online archive software where you can quickly present your designs and colorways to your customers by using a mobile device or a computer.

Assign a username and a password to your customer to access the designs, then they can browse and select the designs that you wanted them to see.
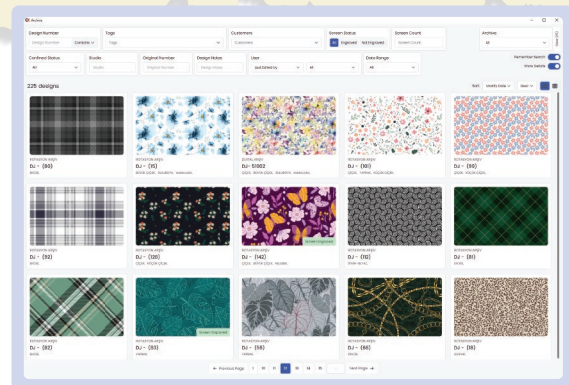

The system is also used by different departments in the company, provides both online design archive and users' activity analysis.
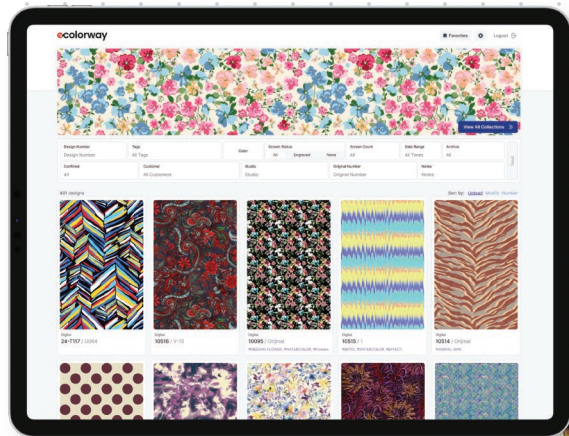

features:

- ♥ Fully Automated
- ♥ Mobile Friendly
- ♥ Activity Analysis
- ♥ Sample Orders
- ♥ Garment Mockups
- ♥ Client Authorizations
- ♥ CAD Presentations
- ♥ Unlimited Accounts
- ♥ Detailed Filters

Download CAD Prints

CAD Presentations

CAD Presentations of the design that you like can be downloaded from eColorway.

colorwayXpress

ColorwayXpress and eColorway are linked to each other to work together.

eColorway

Save to Collections

Create your own collections by selecting the colorways and designs. Edit, share or download all as a CAD presentation.

Fully Automated

Adding designs and colorways to the system does not require extra effort; the entire system operates automatically. Designs, colorways, and garment mockups are instantly accessible from the system. It integrates seamlessly with the ColorwayXpress archive, taking up no additional space.
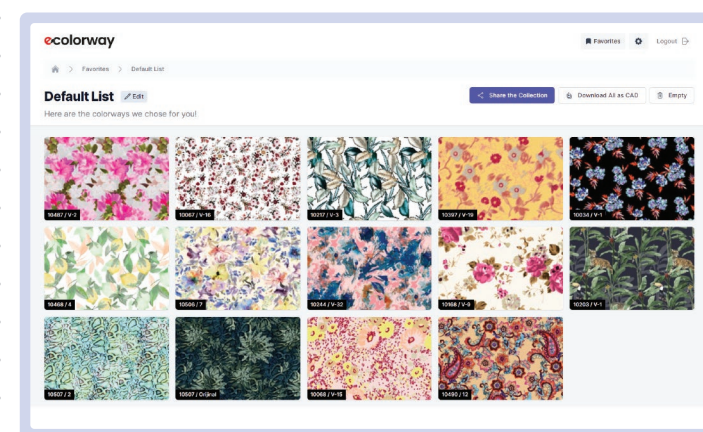

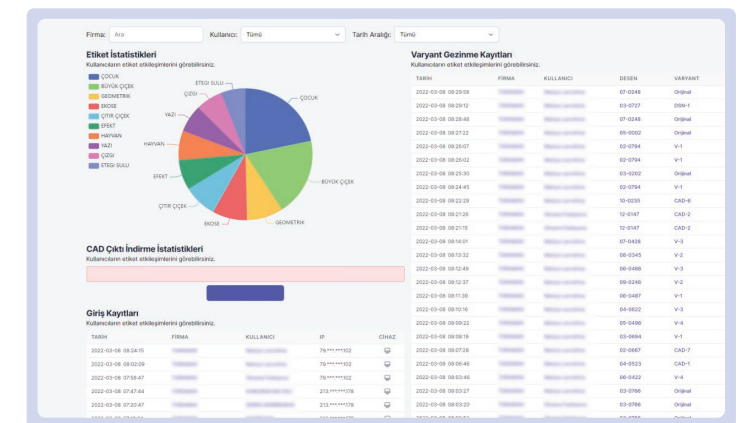

Analyze the Activity

Follow the designs and colorways which are browsed by customers and keep records of their activities.

With AI, analyze your customer's activities to present designs that customers may like, analyze customer's favorites and orders, and send bulk e-mails when requested.

Super Resolution

colorwayXpress

Super Resolution

Meet Super Resolution, the ultimate tool for upscaling low-qualty designs. This advanced technology enhances your designs, transforms them from pixelated and blurry images ==to high-resolution masterpieces.== With Super Resolution, you can work with every design, no matter the original quality.

Smart Categorization

Traditionally, categorizing each design into categories like flower or geometric is time-consuming and labor-intensive. That's why we've introduced the "Smart Categorization" feature. This feature ==analyzes each design and automatically assigns it to the right category== by using advanced AI. It finds and manages your designs easily. Within minutes, your entire archive is organized.
