

SPRINGFIT

SERIE 54000

Drinking healthy is drinking better!

Push-in fittings made of food grade polyamide, EPDM seals and stainless steel gripper to ensure unsurpassed performance.

A special gripping system prevents the pumping effect. Total sealing is guaranteed even with small tube bend radius.

Quick connection/disconnection in compact dimensions. No tube insert or lock ring needed.

Suitable for direct food contact or for use in splash zones. In compliance with all major food regulations.

Widely used on all water treatment devices such as beverage dispensers, vending machines, water purifiers, reverse osmosis filters, etc...
