

Newheat solar thermal power plant, Condat paper mill, France, installed capacity of 3.4 MWth

newheat
renewable heat supplier

Leader in the production of solar thermal heat

About us

Founded in 2015, Newheat is a major player in the production of renewable thermal energy. We design, finance, build and operate renewable heat production and heat recovery plants tailored to our customers' needs.

Our mission

Provide decarbonised and sustainable heat.

Our tailor-made solutions

NO EMISSIONS

A local energy source, free of CO₂ emissions or fine particles.

COMPETITIVENESS

We guarantee a stable heat price for the duration of the contract.

ZERO INVESTMENT

We assume all the costs associated with the project, without mobilising your investment capacity.
