DIGITAL THERMOMETER

CODE 13712

For precise monitoring of the temperature in terrarium. Range from -9° to 110°C (15.8° - 230°F). Extra long cable (90cm) enables flexible positioning of the sensor. Note: Do not mount in the direct vicinity of a heat source.

ANALOGICAL THERMOMETER

CODE 13708

For precise monitoring of the temperature in the terrarium. Range from -20° to 50°C. Easy to mount due to sticker on the rear. Note: Do not mount in the direct vicinity of a heat source.

DIGITAL HYGROMETER

CODE 13713

For precise monitoring of the humidity in the terrarium. Range from 0 to 100% humidity. Easy to mount due to sticker on the rear. Note: Do not mount in the direct vicinity of humidities.

ANALOGICAL HYGROMETER

CODE 13709

For precise monitoring of the humidity in the terrarium. Range from 0 to 100% humidity. Easy to mount due to sticker on the rear. Note: Do not mount in the direct vicinity of humidities.

DIGITAL THERMO HYGROMETER

CODE 13711

Range from 0°C to 70°C (32°F to 158°F) and 20 to 99% humidity. Extra long cable (90 cm) enables flexible positioning of the sensor.

Instructions: In/Out: Temperature at device (In) and at sensor (Out). Min/Max: Minimum and maximum temperatures measured. Reset to zero: Press In/Out and Min/Max simultaneously for a short time. Note: Do not place in the direct surroundings from heat and humidification sources. Please remove batteries and dispose off them properly.

ANALOGICAL THERMO HYGROMETER

CODE 13710

For precise monitoring of the temperature and humidity in a terrarium. Range from -20°C to 50°C and 0 to 100% humidity. Easy to mount due to sticker on the rear. Note: Do not mount in the direct vicinity of a heat or a humidification source.

THERMO-HYGROSTAT WITH TIMER

CODE 13705

With two circuits for daytime and night-time operation. For simultaneous monitoring and control of temperature and humidity as well as parallel use as a timer precise to the second. Ideal for use with heat lamps, heating pads and other sources of warmth in order to prevent overheating or hypothermia. Optimal for the use of foggers and other sources of humidity in order to guarantee the required humidity. Integrated timer allows control of sprinkler systems to the second (min. cycle time 1 sec.). Programmable for up to 8 turn-ON/turn-OFF times. Continuous display of temperature, real time and chose function. Range from 0°C to 50°C. Selectable switching delay 1°C to 15°C. Control range for humidity 20 to 90%. Selectable switching delay 1 to 20%. Can be used for heating and cooling. With visual alarm function. Length of sensor cable: 2 x 180 cm. Max. switching capacity 3 x 400 W. Battery prevents loss of power failure.

DIGITAL THERMOSTAT WITH TIMER

CODE 13704

Ideal for use with lamps, heating pads and other sources of warmth in order to prevent overheating or hypothermia. With two circuits for daytime and nighttime operation. Programmable for up to 8 turn-on/turn-off times. Continuous display of temperature, real time and choosing function. Integrated timer (min. cycle time 1 second). Range from 0° to 50°C. Selectable switching delay 1° to 15°C. Can be used for heating and cooling. With alarm function. Length of sensor cable: 180 cm. Max. switching capacity 2 x 600W. Battery prevents loss of data in case of power failure. Also suitable for aquariums.

2x 600W
100-240V 50/60Hz

TERRARIUM THERMOSTAT

CODE 13703

Terrarium Thermostat simple and accurate with temperature sensor

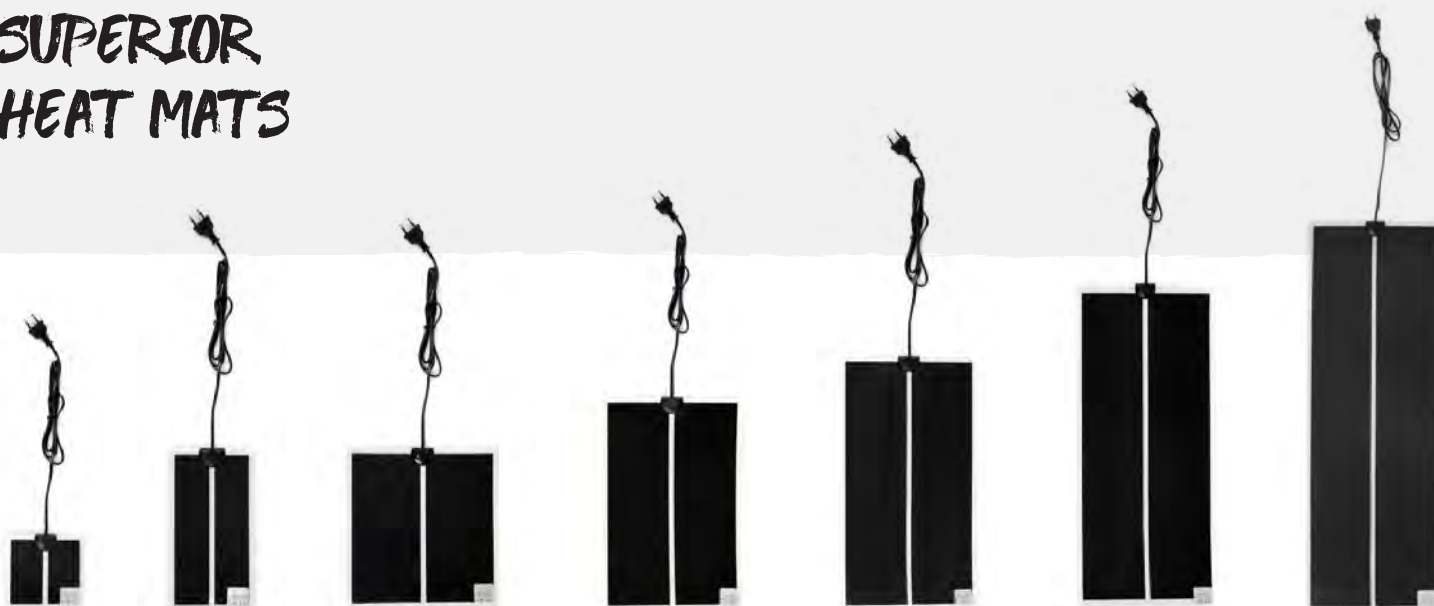

Internal waterproof probe. Place the temperature sensor at mid - height in the vivarium, between the hot and cold spot. Do not place the probe close to the heating that would distort the operation of the thermostat. Set the ideal temperature for your pets. During the normal operating time, the LED lights will switch on. When the temperature of the vivarium is lower than the set temperature, the thermostat switches on and switches on the heat indicator.

MAX. 80W

220-240V 50/60Hz

SUPERIOR HEAT MATS

NL Dit product is alleen bedoeld om te worden gebruikt voor terrariofilie en mag nooit voor andere doeleinden worden gebruikt.

TCC > 7000K

Ideal for creating necessary warm areas in the terrarium. Infrared light contributes considerably to the thermoregulation. Supports digestion, promotes well-being and activity. Long lifespan (up to 10000 hours).

Suitable as a constant heat source in terrariums. Enables night observation of the animals without disrupting the daily cycle. Only use the emitter with a ceramic bulb holder.

220-240V 50/60Hz

Ideal source of warmth for an optimal supply to terrarium inhabitants. Encourages the well-being and supports digestion. More than one terrarium can be supplied with the warmth from one heating cable, depending on the size of surface area of the terrariums. Easy to install. Instructions for use and safety precautions: Completely unwrap the heating cable and check for any damage before use. The cable must not be superimposed during installation. Only use the heating cable on a flame retardant surface. The heating cable should only be used in combination with a thermostat. Not for use in water. Use a wet towel for cleaning. To protect the surface from damage, do not use any aggressive chemicals or scrubbing agents.

ARBOREAL FEEDERS

80x80x60mm

CODE 14255

Food dish that can also be a water drinker. Suitable for arboreal reptiles. Can be installed easily to any height to your glass terrarium. Easy to install. Shining surface, which is easy to clean.

ARBOREAL DOUBLE FEEDER

150x80x60mm

CODE 14256

2 in 1 water dish and food dish. Suitable for arboreal reptiles. Can be installed easily to any height to your glass terrarium. Easy to install. Shining surface, which is easy to clean.

SNAKE HOOK

Metal hook to hold snakes.

Instructions: Made of high quality metal, solid and durable.

With comfortable plastic handle. Suitable for catching snakes weighing up to 1.5 kg.

60cm | Max. 1,5Kg

CODE
13716

REPTI FORCEPTS

Tweezers for animal feed.

Ideal for handling small prey. Keeps hands free from bacteria and food signs. High quality, hygienic stainless steel.

Straight head 25cm | Elbow head 40cm

CODE
13714 | 13715

SAND SCOOP

Sand scoop for terrariums maintenance. Made of stainless steel. For spot cleaning terrarium sand substrates. Suitable for fine substrates in small animal cages.

140x300mm

CODE

Current: **max. 1.6A**

Indoor Use Only: **IP4X**

Read user manual before use!

SPRAYER

CODE 13791

With water pump, improve the humidity through mist effect.

REPTILE DRINKING FOUNTAIN AND HUMIDIFIER

11x9,5x27,3cm

CODE 14249

Fountain for reptiles and other tropical chameleons requiring a constant hygrometry. This fixed on the glazed wall of the terrarium using a suction cup. Autonomy of the tank of 800 ml. Recreate with its plant carpet the sensation of the natural biotope. Check the hygrometry regularly using the Terratantis hygrometer.

CARBON PADS

10,3x8,1x1cm

CODE 14257

EXHAUST FAN

10,2x10,2x7,5cm | 30 CFM

CODE 14252

Extractor allowing the drying of the tropical terrariums having a hygrometry too important. Restore the right balance between the air and humidity of tropical millers.

DC 5V/350mA

Max. exhaust air: **30CFM**

Max. speed: **3600RPM**

REPTI FOGGERS

CODE 13706

Increases the humidity in relation to the size of the terrarium by up to 100% and ensures the misting of the terrarium. With protection against dry running: automatically turns itself off when there is a water shortage (< 3cm).

Terratantis replacement membranes and hydrometers are available separately. Note: monitor the available water level and the hydrometry of the terrarium.

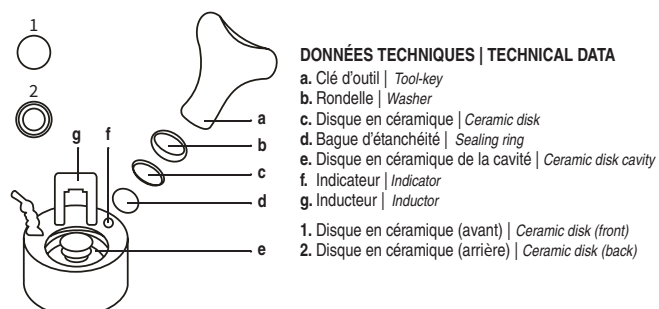

W/1
LED LIGHT

MEMBRANE & KEY

CODE 13707

Membrane and key for Terratantis ultrasound fogger.

This EASY LED TORTUM universal model adjusts easily to any tortum tank glass/wood up to 6 mm thick. The fixing bracket has a flexible device that allows the positioning of the lighting up to a 90-degree angle, which allows easy access to the inside. LED technology guarantees the high quality of the light emitted, due to its high power, and the low voltage makes it safer. It also allows very low power consumption and ensures a longer life for the lightning.

CHEMICAL FILTRATION

Ultrafiltration which keeps the aquarium glass and surface clean for longer, helping to create ideal conditions for turtle. Reduces organic material, absorbs and retains phosphates, nitrates, nitrites and ammonia. Good results after two weeks. NOTE: in the case of turtle treatment, this filter media must be removed.

Recommended replacement
EVERY MONTH

21960 - Coarse + Fine Foam

5 607329 219608

21829 - Cleanwater

5 607329 218298

The thin coating of the filter media acts as a MECHANICAL FILTER for fine particles, which must be removed after use and composted*.

LAMPS/LAMPES

The best light conditions for habitats

Les meilleures conditions de lumière pour les habitats

INFRARED HEAT SPOT LAMPS

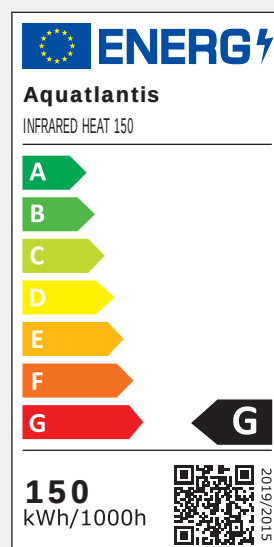

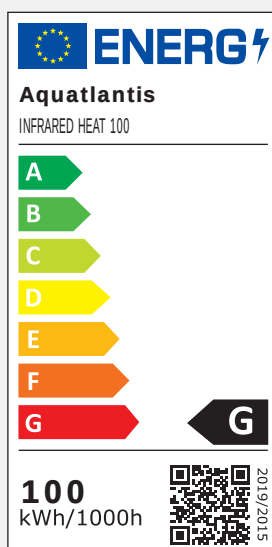

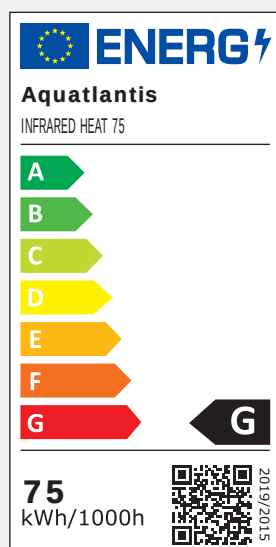

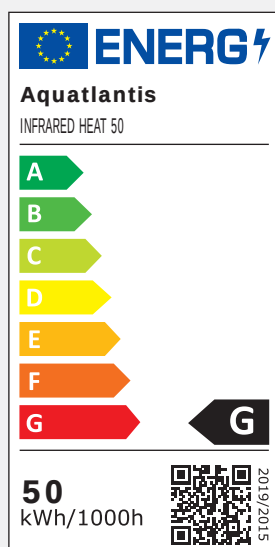

50W **13689** 75W **13690** 100W **13691** 150W **13692**

E27 220-240V 50/60Hz

Ideal for creating necessary warm areas in the terrarium.
Infrared light contributes considerably to the thermoregulation. Supports digestion, promotes well-being and activity. Suitable as a constant heat source in terrariums. Enables night observation of the animals without disrupting the diary cycle.

Note: protect from water splashes.

Distance from Bulb

Wattage	4"(10CM)	6"(15CM)	8"(20CM)	12"(30CM)	18"(45CM)	24"(60CM)

150W	>55°C	>55°C	>55°C	50°C	43°C	40°C

Test environment temperature: 20-21°C

MOONLIGHT HEATING LAMPS

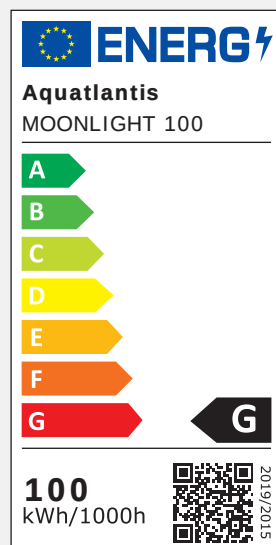

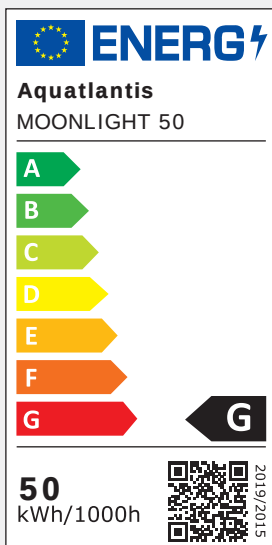

50W **13693** 100W **13694**

E27 220-240V 50/60Hz

Ideal for simulating the night cycle.

Motivates the breeding behaviour of reptiles. Enables night observation of animals without disrupting the daily cycle. Maintains the environmental temperature high during the night for tropical animals and consequently increases well-being.

Note: protect from water splashes.

Distance from Bulb

Wattage	4"(10CM)	6"(15CM)	8"(20CM)	12"(30CM)	18"(45CM)	24"(60CM)
50W	29°C	27°C	25°C	24°C	23°C	-
100W	40°C	35°C	30°C	28°C	27°C	26°C

Test environment temperature: 20-21°C

BEAM SPOT LAMPS

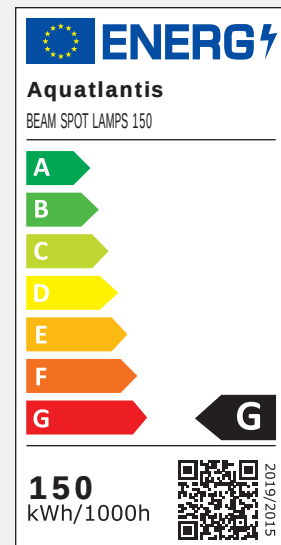

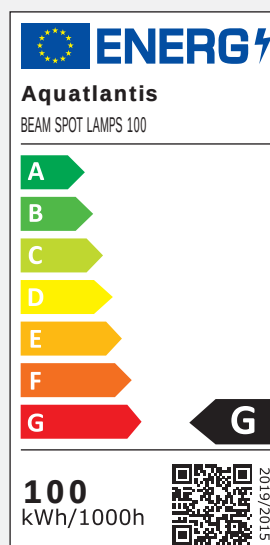

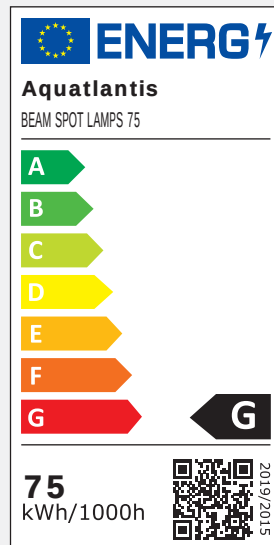

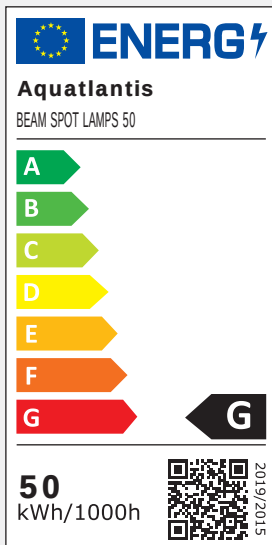

CONTAIN UVA

50W **13699** 75W **13700** 100W **13701** 150W **13702**

E27 220-240V 50/60Hz

Creates warm relaxing areas for reptiles. Emits infrared light and supports thermoregulation. UVA radiation activates natural animal behaviour and stimulates appetite. Raises the room temperature of the terrarium.
Note: protect from water splashes.

Distance from Bulb

Wattage	4"(10CM)	6"(15CM)	8"(20CM)	12"(30CM)	18"(45CM)	24"(60CM)
50W	32°C	28°C	27°C	25°C	24°C	22°C

Terratantis lighting systems respond to the demands of the species of reptiles and amphibians that enjoy moist habitats with tropical temperatures. The E27 lighting for Terrakit models ensures comfort and the proper growth of these animals. This Terratantis bulb socket adapted for Terrakit models is heat proof and allows 100% better light dissipation. Bulb not included. Available in black and white.

SUBSTRATES/SUBSTRATS

100% natural substrates

Substrats 100% naturels

COCONUT LITTER TERRARIUM

This pure 100% natural product is a great substrate for tropical terrariums. The coconut husk naturally controls the proliferation of germs and molds. The possibility of renewing only the soiled areas allows to preserve the essential of the substrate, as well as its efficiency. This product is eco friendly, healthy and economical. Composition: 100% fiber extracted from Sri Lanka's coconut shell. 100% natural material, sun-dried without treatments. - Very high capacity for eliminating odors. - Ready for use without preparation. - Is used as dry or humid litter. - Absorbs and controls humidity level.

COCONUT LITTER TORTOISE

This pure 100% natural eco friendly product is a great substrate for tropical terrariums. The coconut husk naturally controls the proliferation of germs and molds. The possibility of renewing only the soiled areas allows to preserve the essential of the substrate, as well as its efficiency. Composition: 100% fiber extracted from Sri Lanka's coconut shell. 100% natural material, sun-dried without treatments. - Very high capacity for eliminating odors. - Ready for use without preparation. - Is used as dry or humid litter. - Absorbs and controls humidity level.

20L

CODE
13728

COCONUT FIBER SUBSTRATE

100% natural substrate. Ideal for natural terrarium set-ups. Increases humidity in terrariums. Nutritional substrate for live plants. Instructions: Place the brick in a pail/bucket or sink. Add 3-4 liters of water. Allow the brick to expand for 20-30 minutes. Wring out excess moisture. For small animals, snakes and tarantulas, lay out moist substrate in the sun to dry before moving to your animals's enclosure.

10L - AFTER SOAKING 650G

CODE
13730

JUNGLE BARK TERRARIUM

100% natural product, ideal to provide a tropical environment in terrariums. It must be always moist to avoid reptile injury due to dry soil, even if it is a product that naturally absorbs humidity. Made of Pinus Maritima tree from Portugal.

CALCI-SAND TERRARIUM

Calci Sand is suitable for terrariums of desert habitats that can comfortably accommodate reptile species from arid environments.

Simply spread the product evenly in the bottom of the terrarium to create a bed of substrate. It is not a hazardous product if eaten by the animal as it is an excellent source of calcium beneficial to the body. Carefully clean the soiled parts systematically and progressively replace the entire substrate every six weeks.
