

pidan Tofu Cat Litter

As a top-selling natural cat litter brand, pidan has long been committed to creating higher quality cat litter. pidan Tofu Cat Litter is widely welcomed by global consumers for its excellent user experience, healthy formula, and stable quality, selling 16 million bags worldwide each year.

Cat Litter Designed for Healthier Cats

pidan tofu cat litter is a low-dust option that maximizes the protection of your cat's urinary system health.

To ensure product quality and safety, pidan selects a cat litter sample from the production line every day and sends it to an internationally accredited third-party institution for rigorous testing.

Food-Grade Raw Materials

pidan tofu cat litter is crafted from premium Canadian peas and undergoes a meticulous drying and extrusion process. This litter is known for its clean, white appearance, moderate hardness, excellent absorbency, low dust, water-soluble, and antibacterial properties.

Rapid Absorption, Superior Odor Control

pidan's Tofu Cat Litter has an exceptionally strong, sponge-like absorption capacity. It can instantly trap 5 times its own weight in moisture, while also locking in odors to maintain a fresh indoor environment. After absorbing moisture, it forms solid clumps that don't stick to the bottom, making it easy to scoop.

About pidan

We love cats. And we can prove it.

With over 400 million felines worldwide, we're on a mission to create cat-first products to build better lives for them and enhance the joy of cat ownership.

We adhere to the brand proposition of [Cat-First Products, Stray Welfare Program], hoping not only to enhance the quality of life for cats within households, but also to contribute towards improving the experiences of stray cats.
