## Cat Litter

Cat-First  
Products

# About

Cat litter is a vital necessity for households that have cats, making the selection of the right product for your feline companion of utmost importance.

As the top-selling cat litter brand in China, pidan emphasizes the significance of buyers gaining a comprehensive understanding of the original material sources, production methods, formula, testing processes, and specific functionalities of various cat litters. This knowledge enables consumers to make more informed, rational, and tailored choices when purchasing cat litter products for their own cats.

# pidan's Innovation - the Advantages of Blend Cat Litter

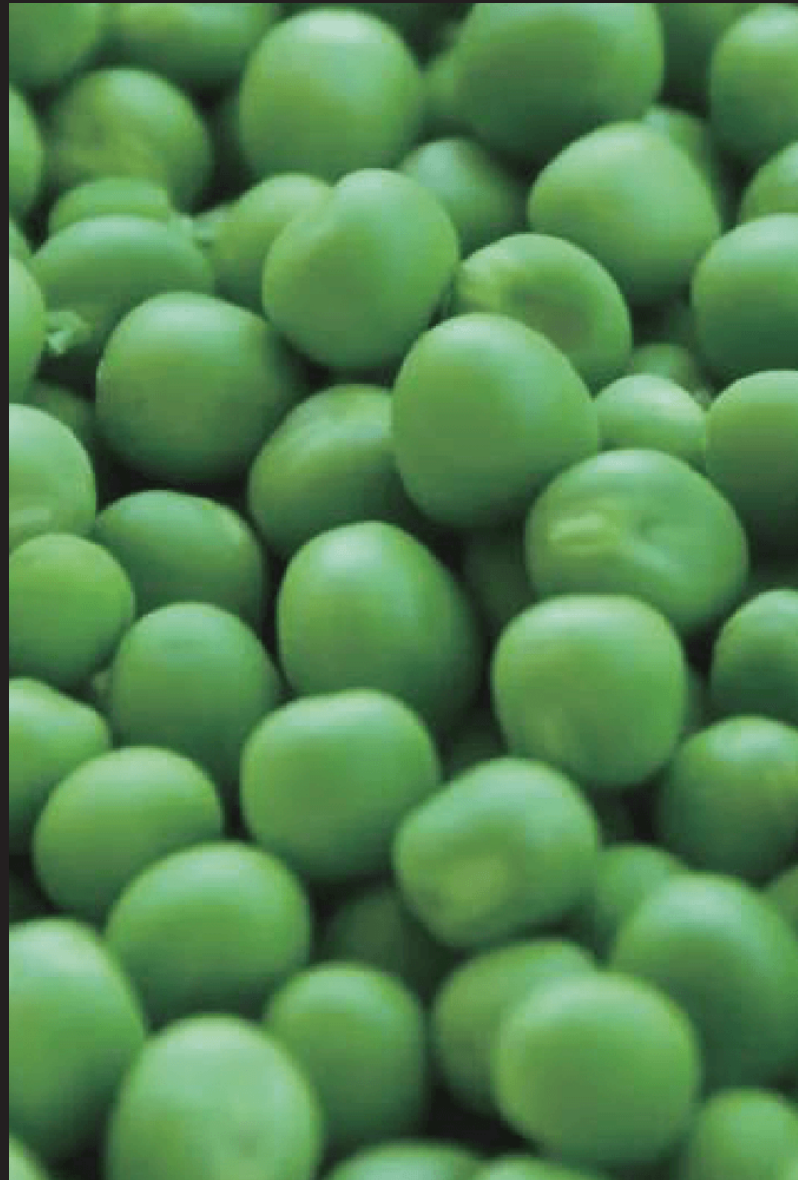

Compared to cat litters made from a single ingredient, pidan's innovative blend cat litter combines 2 or 3 different materials in a scientific formula to achieve a harmonious blend of various functionalities.

Taking the best-selling Signature Tofu Blend Cat Litter by pidan as an example, it consists of 70% tofu cat litter with a particle diameter of 2mm, which emits a natural pea bean dreg aroma that effectively masks odors while providing fast clumping and minimal dust. By incorporating 30% spherical bentonite clay cat litter, it not only fills the gaps in the tofu litter, but also enhances clumping strength and reduces scattering.

The Signature Tofu Blend Cat Litter by pidan achieves a well-rounded balance of water absorption, odor control, and clumping capabilities through its unique "blend" formulation. It caters to the diverse needs of cat owners and has been exported to 13 countries worldwide, with an annual sales volume of 12,000,000 packages.

# The Raw Materials and Production Advantages of pidan Tofu Cat Litter

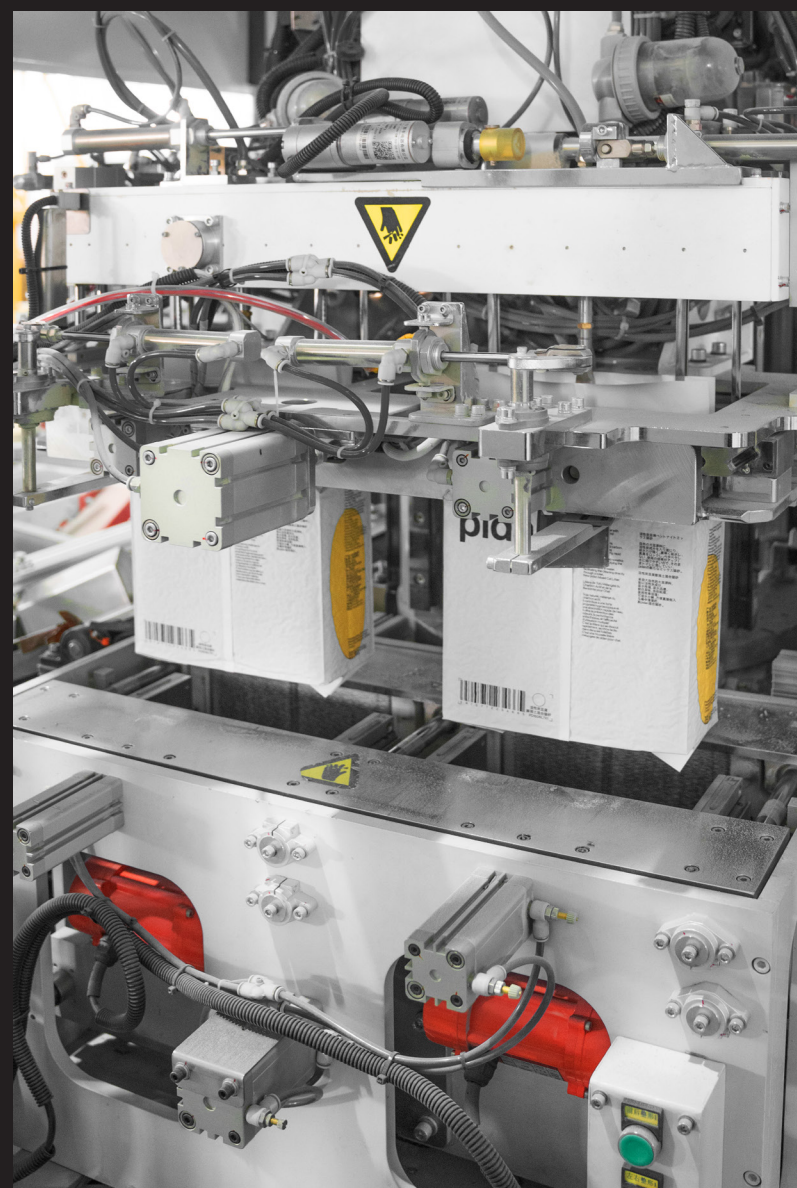

The raw materials used in pidan Tofu Cat Litter are made from high-quality peas sourced from Canada.

The cat litter, made from natural pea, has a clean and white appearance, moderate hardness, and exhibits strong absorbent and antibacterial properties. Canada, being a major producer of peas, offers advantages such as superior quality and stable supply.

In the process of producing the pea bean dreg, pidan collaborates with "Shuangta Food," a well-known publicly listed company specializing in food production and tofu manufacturing. This partnership ensures the safety and integrity of the raw materials and manufacturing process.

# The Advantage of pidan's Fully Automated Cat Litter Production Line

The cat litter factory in collaboration with pidan is one of the earliest cat litter manufacturers in China and currently operates with the highest single-line and single-factory production capacity in the industry.

The intelligent production workshop, equipped with pidan's independently developed fully automated cat litter production line, has achieved a mature and comprehensive process of automated production, monitoring, and digital supervision throughout the entire cat litter manufacturing process, including pre-mixing, molding, drying, and vacuum packaging. This ensures the continuous and stable production of pidan's cat litter products, catering to the market demand.

# The Advantages of pidan Cat Litter Vacuum Packaging

The fundamental feature of cat litter is its excellent water absorption, and vacuum packaging provides a high barrier effect against oxygen, water, carbon dioxide, and odors, ensuring the stability and non-contaminated state of the cat litter's performance.

\*Minor air leaks during transport won't impact usage of cat litter. Please consider this if it is a concern before making a purchase.

In 2021, pidan launched a product testing and traceability program, which includes the "Daily Cat Litter Testing" initiative specifically tailored for cat litter products.

Under this program, a sample of cat litter is extracted from the production line on a daily basis and sent to a third-party organization with international qualifications to undergo rigorous testing for formaldehyde, aflatoxin B<sub>1</sub>, and total bacterial count. This ensures that the pidan cat litter products purchased by users are safe, healthy, and have been tested by authoritative institutions.

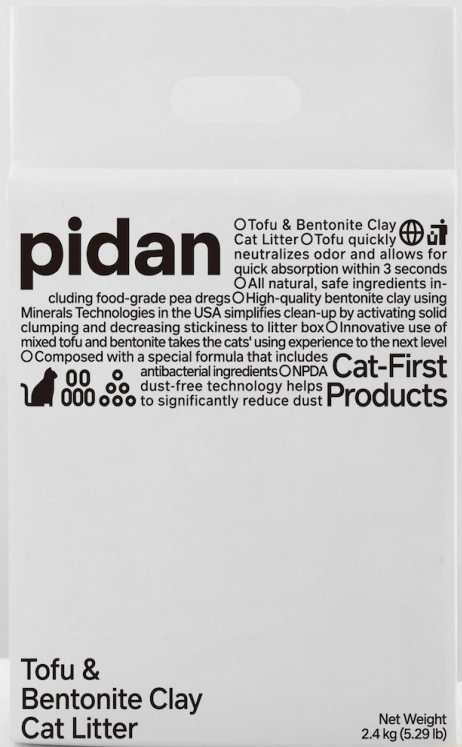

Furthermore, the test reports are made available to the public, and you can access the updated test reports corresponding to each production batch through pidan's official website.

# Highlights of pidan's Various Cat Litter Products

# Tofu Cat Litter

**PD1611M1X1**  
**Net Weight: 2.4**  
**kg (5.29 lbs)**  
**Ingredients: Pea**  
**Dregs, Starch,**  
**Guar Gum**

## High Quality Raw Materials

The bean dregs is sourced from Canada, the main pea-producing country, and is made by refining and drying the peas for better quality.

## Safe Raw Material Manufacturing

The pea bean dregs used in cat litter are produced by Shuangta Food, a publicly listed company committed to manufacturing pure natural products.

## In-house Developed Fully Automated Production Line

Our independently developed automated production line ensures secure and well-protected production processes.

# Tofu Cat Litter

## 70% 2 mm Diameter Tofu Cat Litter

Consisting of 70% of the mixture, pidan's 2mm size pellets rapidly absorb liquids with traceless efficiency.

## 30% 1.5 mm Diameter Tofu Cat Litter

Consisting of 30% of the mixture, pidan's 1.5mm pellets complement the 2mm variety, enhancing clump formation with ample capacity.

## Flushable Efficiency

Pidan makes cleanup quick and easy with its perfectly water soluble eco-friendly disposal process. Once fresh litter becomes used, simply flush it and forget it.

# Tofu & Bentonite Clay Blend Cat Litter

**PD1605M1X1**  
**Net Weight: 2.4 kg (5.29 lbs)**  
**Ingredients: Pea Dregs, Starch, Guar Gum, Bentonite**

## High Quality Raw Materials

The bean dregs is sourced from Canada, the main pea-producing country, and is made by refining and drying the peas for better quality.

## Safe Raw Material Manufacturing

The pea bean dregs used in cat litter are produced by Shuangta Food, a publicly listed company committed to manufacturing pure natural products.

## In-house Developed Fully Automated Production Line

Our independently developed automated production line ensures secure and well-protected production processes.

# Tofu & Bentonite Clay Blend Cat Litter

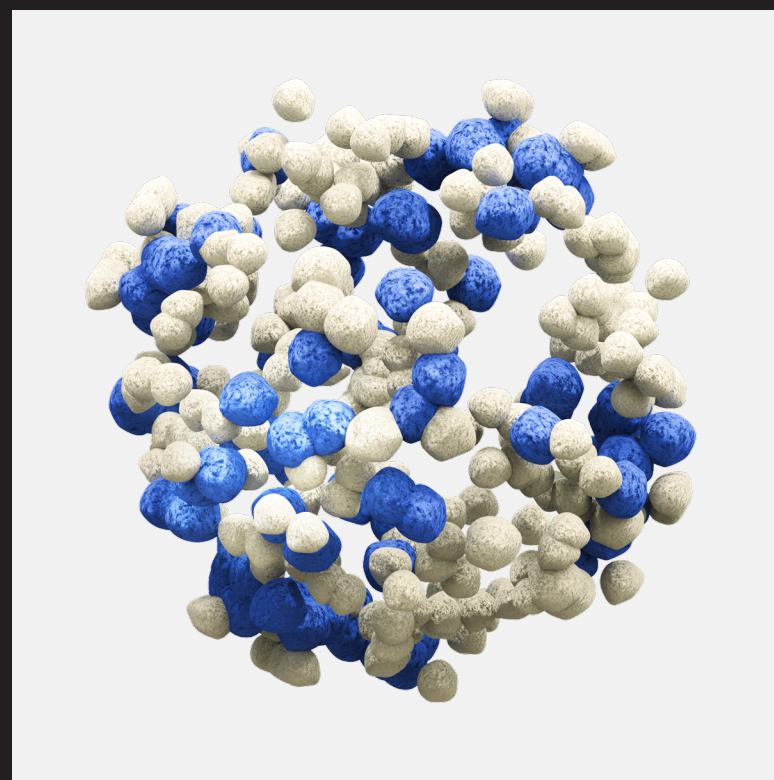

## 68% Tofu Cat Litter

The high-quality 2mm tofu cat litter exhibits exceptional water absorption, fast clumping, and minimal dust.

## 32% Bentonite Clay Cat Litter

With the addition of STA particles, it provides even stronger odor control.

## 5 Times Water Absorption Capacity

10g of cat litter can absorb 50g of water.

## Flushable Efficiency

Pidan makes cleanup quick and easy with its perfectly water soluble eco-friendly disposal process. Once fresh litter becomes used, simply flush it and forget it.

# Tofu Cat Litter With Occult Blood Test Particles

**PD1607M1X1**  
**Net Weight: 2.4 kg (5.29 lbs)**  
**Ingredients: Pea Dregs, Starch, Guar Gum, Occult Blood Test Particles**

## High Quality Raw Materials

The bean dregs is sourced from Canada, the main pea-producing country, and is made by refining and drying the peas for better quality.

## Safe Raw Material Manufacturing

The pea bean dregs used in cat litter are produced by Shuangta Food, a publicly listed company committed to manufacturing pure natural products.

## In-house Developed Fully Automated Production Line

Our independently developed automated production line ensures secure and well-protected production processes.

# Tofu Cat Litter With Occult Blood Test Particles

## Scientific Formula

70% 2mm + 30% 1.5mm  
A combination of tofu litter with strong water absorption, quick clumping, and low dust.

## Occult Blood Test Particles Added

The color change of the particles from white to blue-green suggests hemoglobin detected. Convenient for monitoring the cat's health condition at any time.

## Flushable Efficiency

Pidan makes cleanup quick and easy with its perfectly water soluble eco-friendly disposal process. Once fresh litter becomes used, simply flush it and forget it.

# 3-in-1 Blend Cat Litter

**PD1650LXE**  
**Net Weight: 5.2kg**  
**(11.46 lbs)**  
**Ingredients: Pea**  
**Dregs, Starch,**  
**Guar Gum,**  
**Spherical**  
**Bentonite,**  
**Activated Carbon**

## High Quality Raw Materials

Our bean dregs are sourced from Canada and undergo refining and drying for improved quality. Our bentonite is sourced from China's premium mining belt, ensuring superior quality.

## Safe Raw Material Manufacturing

We source pea bean dregs from Shuangta Food and bentonite clay from Minerals Technologies Inc., both reputable companies known for their high-quality natural products.

## In-house Developed Fully Automated Production Line

Our independently developed automated production line ensures secure and well-protected production processes.

7.4

## 3-in-1 Blend Cat Litter

### 5.2 kg Large Volume

Our 5.2 kg bucket offers a classic combination of cat litter varieties, ideal for multi-cat households. The sealed design keeps the litter dry for repeated use.

### 40% Original Tofu Cat Litter

The high-quality 2mm small diameter tofu cat litter forms clumps in just 3 seconds with enhanced water absorption capacity.

### 35% Spherical Bentonite Clay Cat Litter

Enhanced deodorizing power with the addition of STA absorption granules.

### 25% Activated Carbon Infused Tofu

Instantly absorbs airborne odors, clumps faster, and remains non-sticky to the bottom.

# How to make the most of your cat litter

When filling the litter box, we recommend about 4-5 cm of thickness for best results. Daily cleaning of clumps help ensure that fresh, clean toilet experience your kitty deserves. Cat litter absorbs the moisture in the air so depending on the humidity and temperature of the room, we recommend routinely replacing the cat litter every 2-3 weeks.
