

PRE-CONFIGURED IVALUA ADD-ONS

In order to meet the recurring needs of our customers, we have pre-configured functionalities that we can quickly deploy. These pre-configured solutions respect Ivalua standards since they do not contain any specific development. They can also be adapted to customer needs.

KNOW YOUR SUPPLIERS

Control the compliance of your suppliers and manage your relationships with them using dedicated features developed by our experts

- Supplier data collection (API, ...)
- Supplier risk management
- Legal compliance management
- Management of action plans with suppliers

ADMINISTRATION

Take over the administration of ivalua internally thanks to the simplified administration modules and screens developed by our teams

- Simplified key datasets management
- Data partitioning
- Dashboards

PUBLIC / HEALTH SECTOR

Program and manage your tenders and contracts in compliance with public procurement rules directly in the solution

- Data collection (API, ...)
- Procurement project management
- Public procurement management
- Contract management
- Dashboards
