

Artificial Intelligence

Expertise

Artificial Intelligence

With its **Center of Excellence** established in 2016, Scalian has nearly **10 years of experience** in the field of AI. The Scalian Artificial Intelligence Center of Excellence is dedicated to all aspects of data and AI, with the mission of supporting our employees and clients in the **development and use of this technology for practical applications.**

GENERATIVE AI

We use innovation to design assistant-like generative AI systems offer to support your projects end-to-end

PREDICTION

We design predictive AI to anticipate and secure your activities across all domains of activity (financial, technical, operational, environmental, etc.)

EMBEDDED AI

We put AI capabilities at your disposal in the most constrained environments, from factory conditions to the military fields

PLANNING

We secure your operations with AI solutions that anticipate disruptions and optimise real-time decision-making

SYNTHETIC DATA

We create data sets to feed AI systems and database in order to overcome data scarcity

FRUGAL AI

We create high-performance AI systems built on sustainable principles to reduce environmental impact while guaranteeing project performance
