Sofia Technologies

Your IoT PoC in days !

How can you build an IoT platform in days, that can cope with your asset management policies, collect the data remotely and visualize it according to your requirements ?

How can you avoid specific development and save huge cost ?

### Integrating your IoT solutions

#### Web & Apps Mobile

Open cloud platform, Modular electronics, Industrial quality

#### Cloud & IoT

IBM Cloud, AWS, Google Cloud, Microsoft Azure, Spark, Hadoop, Deep Learning, Blockchain, ElasticSearch, Grafana, Bots

#### Electronic Hardware

design & Simulation, Prototyping (PCB & PCBA), Tests (Bring-up & Functional), Mechanical Integration, Industrialization, Turn-Key Solutions

#### Embedded Systems

Realtime OS & Drivers, Linux & Windows Embedded, Cybersecurity, Connectivity (Zigbee, Wireless Mbus, LORA, Sigfox, NB-IoT), CAN, LIN & FlexRay

## Quality Components

Electronic boards and cloud modules are industrial-grade open source components. They can scale up to manage millions of connected sensors.

Cloud IoT : Sofia Networks

Connected sensors : Menzu boards

## Customers speak for us

"Thanks to your reactivity and your effort, the customer audit has been a success. We have been able to satisfy his requirement for a real-time display of environmental data as well as the reception of alerts on our smartphones."
