

Pressure Equipment

Design, calculate
and check conformity

AUXeCAP
by ARTELIA

The software solution for all players
involved in industrial boilermaking

- Constant updating of regulations and design codes
- Rapid preliminary sizing
- Configuration and detailed customisation

Microsoft certified

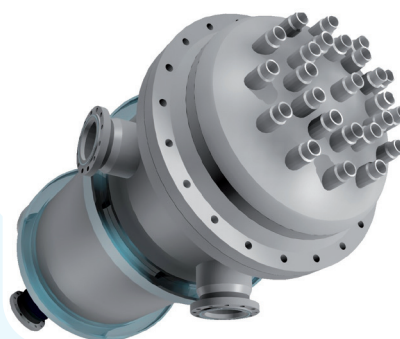

100%
CONNECTED

Intuitive interface

A standalone
application
for designing
pressure
equipment

3D representation

ARTELIA
Passion & Solutions

Choose the AUXeCAP
that suits you

AUXeCAP

by ARTELIA

Efficient

Description compliant with industry practice, and a modular approach.

Agile

Needs expressed by users are implemented rapidly.

Scalable

Updated constantly in line with changes to standards and regulations.

Open

Project data can be reused seamlessly in standard XML format.

Support

Guides, examples, automated user support, FAQ.

Secure cloud environment

Simple to install and easy to access via mobile devices.

DESIGN

- Assistants
- Models
- Catalogues
- Materials

DESIGN CODES

- CODAP
- ASME
- EN 13445

CASE STUDIES

- Pressure
- Support
- Lifting
- External forces

ADDITIONAL FACTORS

- Fatigue exemption
- Simplified fatigue
- Detailed fatigue
- Snow, wind, seismic activity
