

IBF FRANCE

Who are we?

Specialist known of **flash-bult welded** since more than 50 years, the company IBF France will provide you a **quick, reliable and economic** option in the manufacturing of rings and flanges, raw or mechanized since a minimum diameter of \varnothing 250 mm the inside until \varnothing 2350 mm diameter outward in all the ranges of steel or stainless steel.

Our mechanized service.

Thanks to the capacity of ours machines, the technical skills and the experience of our staff, IBF France proposes a complete service of mechanizing by plan.

Toned, drilled, threaded, gear assembly, milling, are among the services that our company are able to propose you with technique, rapidity and quality.

Since 10 years ours customs are:

"Without addition of metal"

The process

IBF France manufactures **flanges and rings** welded by flash-bult.

This technique allows us from a flat piece (dish flame-cutting or flattened), warmed in heart in our ovens, to arch in the shape of rings, then to weld by flash-bult, **without addition of metal**.

(Have a look at the scheme below)

Ours markets

1. Metallurgy
2. Energy.
3. Agri-food
4. General mechanics.
5. Cable transport.
6. Boile
7. Nuclear.

"The structure of welded area is like a forged piece"

"A team spirit"

"A real sense of service"
