

# Boomi for SAP: Get the Most Out of the Best

Get the most out of SAP and other applications with best-in-class integration

You've chosen the best applications, including SAP, to run business-critical processes. Get the most out of SAP and non-SAP applications with best-in-class integration. Simple to use yet scalable to meet the most demanding workloads, Boomi for SAP cuts integration complexity and accelerates your move to SAP S/4HANA – lowering costs and risks.

## CONNECT SAP WITH OTHER BUSINESS-CRITICAL APPLICATIONS FOR SEAMLESS PROCESSES

Thousands of organizations around the world run SAP, most notably SAP ERP, to support critical business processes. SAP ECC and its successor, SAP S/4HANA, are often considered “the backbone of the business.” But many SAP customers have also chosen non-SAP applications for things like customer relationship management, human capital management, or IT service management as part of a best-of-breed approach. To get the most out of SAP and create seamless processes that power digital transformation, integrating SAP with other applications is a must.

Boomi for SAP helps you get the most out of SAP and non-SAP applications with best-in-class integration. It cuts integration time and complexity and accelerates your move to SAP S/4HANA.

## BENEFITS/USE CASES

### Connect SAP with other business-critical applications for seamless processes.

Make SAP investments more valuable through best-in-class integration that can be deployed in the cloud and on premises without sacrificing functionality.

Leverage hundreds of optimized, pre-built connectors to SAP and non-SAP applications to simplify and accelerate integrations. Crush complexity with an intuitive user experience powered by AI.

### Accelerate cloud transformation while protecting existing investments.

Move to SAP S/4HANA faster with fewer technical resources required, freeing SAP developers to focus on other value add activities and lowering costs. Reduce the risk of delays and disruptions during migrations by keeping legacy systems and modern cloud applications in synch as part of a phased transition.

### Harmonize data throughout systems of record.

Leverage SAP-certified access to real-time data in SAP ECC and S/4HANA with the only integration platform as a service (iPaaS) that natively connects to the SAP application layer. Power an event-driven architecture leveraging SAP Events and ensure consistent, high-quality data across domains.

**Boomi for SAP unites SAP and non-SAP applications with best-in-class integration**

## ACCELERATE THE MOVE TO SAP S/4HANA, SLASHING COSTS AND RISKS

One of our largest challenges was to extract a high volume of SAP data continuously and with ease to feed various applications within our ecosystem. We needed to find ways to reduce the time and complexity within the new subscription service stream. Using Boomi, we were able to leverage pre-defined SAP templates and exchange data efficiently between applications and achieve our business goals.”

**Stefan Willi**

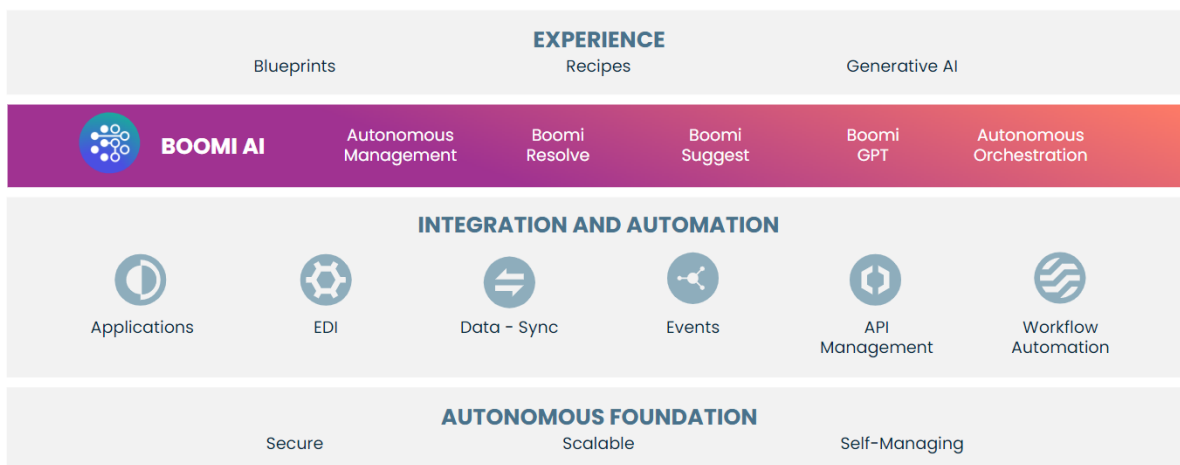

Chief Technology Officer, WWZ Energie AG

Most organizations that have already moved to SAP S/4HANA state they significantly underestimated the integration challenges of moving legacy integrations.<sup>1</sup> Integrations should be part of your migration strategy versus an afterthought.

Trusted by more than 20,000 organizations, Boomi’s integration and automation platform supports everyone with legendary ease-of-use and superior scalability.

Platform services include:

- **Integration:** Connect applications faster with pre-built integration and the guidance of over 200 million machine learning integrations.
- **B2B/EDI Management:** Collaborate with trading partners using a complete set of B2B message and document interchange templates.
- **API Management:** Get a synchronized 360-degree view of all your data across systems.
- **Flow:** Design and automate your next generation workflows and cloud applications using low-code technology.
- **Event Streams:** Create high-performance, scalable, event-driven connections for demanding integration use cases.
- **Boomi AI:** Harness the power of generative AI to integrate and automate faster.

**Boomi for SAP reduces integration effort and de-risks your transition to the cloud.**
