Long-read Sequencing
User-friendly Bioinformatics

Holzer Scientific Consulting

Real-time Genomics | Long-read Sequencing | User-friendly Bioinformatics

SERVICE OFFERS

supporting you in leveraging the advantages of long-read sequencing technology for your application

RESEARCH CONSULTING

All-round support from planning experiments to interpreting results, as well as upgrading to new sequencing technologies.

ROUTINE DATA ANALYSIS

Comprehensive analysis and visualisation of genomic data, tailored to your needs and your scientific question.

CUSTOM SOFTWARE

Bespoke end-to-end bioinformatic solutions for your application, utilisation long-read sequencing and real-time genomics.

About Us

Holzer Scientific Consulting is a specialised service provider in the field of user-friendly bioinformatics and long-read sequencing technology that supports researchers from academia and industry in conducting world-class multi-omics R&D and harnessing the power of novel long-read sequencing technologies.

Collaborate. Innovate. Together.

We support technological breakthroughs and are here to facilitate our collaborators to stand out and together spearhead innovations in genomics and diagnostics.
