

THE COMPANY

COSMETIC SERVICE was born from an unusual idea, a dream, of Michele Ceolin and Susanna Sartori in 1999: starting from the manufacturing of **nail polish** and **nail polish removers**, which is now our core business.

From that on, in couple of years, Cosmetic Service developed a wide range of both Italian and foreign customers, with an yearly production of over 10.000.000 units. Our staff is made up of 35 employees, including offices, laboratory and production deptms. Since 2013, other technology investments have been done and other make up items have been introduced. From 2016 on, thanks to the buy-out of a small company specilized in the emulsion and powders, we are now able to formulate our textures and set up completem, customized *Made in Italy* color **make-up collections** for our clients (private/white labels). We currently supply big quantities, but we support smaller projects as well, according to more restrained quantity, which are sometimes a bit more complicated to run but hepflful to those who wants to start with the business. In addition, working oversea, especially for Us market, permits us to come out in time with trend products of the period as well as to anticipate market's demands offering the most popular cosmetic products\formulae.

We abide by the Full Service\Turnkey philosophy, consisting of the **CONCEPTUALIZATION OF THE IDEA**, preparation of the sample in the **laboratory, for client's approval production, graphic trials, labelling, packaging, all the way up to the dispatching**. Quality, safety and manufacturing times are always ensured. We are a reliable reference point for any company that seeks original, customized solutions.

OUR MISSION

Our goal is to offer the richest range of products, and **to provide the best service possible**, in order to meet market's needs, which are constantly evolving. **EXPERIENCE, QUALITY, PASSION AND CREATIVITY** are the key words that describe our company. Cosmetic Service offers cutting-edge technology for the creation of customized cosmetics. A Full Service solution that follows the customer from the design to the manufacturing of the final, ready-to-sell product.
