# Packaging Development

## **Stock packaging and personalization**

Our dedicated staff find solutions that answer your needs in terms of performance, formula protection, ergonomics and aesthetics. A host of decoration techniques is available to brand the pack, ensuring it looks and feels tailor made for you.

## **Customized tooling**

If you are looking for a pack that is unique in the market, our packaging engineers are ready to help you develop a new design. Our manufacturing facilities are geared up to develop mock-ups and custom tooling to achieve new shapes and formats. We then work with our customers to set up quality-controlled and commercially-viable production lines to make your packaging ideal a reality.
