

Let's talk about Marine Biodiversity

📅 9 June 2025 – 10:30 am - 1:30 pm CEST

📍 Inspire Area – European Digital Ocean Pavilion

🌐 United Nations Ocean Conference 2025

Abstract

GEO Blue Planet promotes the use of Ocean Observation and prediction for sustainable fisheries

Audrey Hasson – Mercator Ocean International

Ocean Observation and prediction for global sustainable fisheries management - Building on the 2021 Earth Observations for Tuna Fisheries Management Workshop, GEO Blue Planet promotes the use of Ocean Observation and prediction for sustainable fisheries. This TedX will provide an overview of a planned workshop series addressing EO's potential for fisheries, obstacles to its adoption, and actions for broader application, fostering collaboration among stakeholders and fisheries experts.
