TOUCH THE DIFFERENCE

AURES GROUP

Founded in 1989 and listed on Euronext since 1999, AURES Technologies is an IT manufacturer of hardware (POS, Mobile POS & KIOSK) and digital application solutions for all sectors of the point of sale and retail industries.

The AURES Group has a global presence, with headquarters in France, subsidiaries in the UK, Germany, Australia and the USA (AURES Technologies Inc and Retail Technology Group - RTG*), in Tunisia (LST**) as well as a network of partners, distributors and resellers in over 60 other countries.

*The American company "Retail Technology Group Inc" (RTG) is a major player across the Atlantic in IT services and POS maintenance (hardware & software).

** The Tunisian company "LST" (Leader Solution Tactile) is the Group's development unit for middleware and digital applications.

JAZZ

Slender style with
new technology

The JAZZ system offers an exclusive refined and contemporary slim design with a small footprint that adapts to multiple POS configurations, in order to meet the various needs of the customer journey.

Available as a classic POS system (on its base) or pole mounted (JAZZPOLE), this versatile hardware solution lends itself to a myriad of platforms, based on the same motherboard (3 different processors are available), thus futureproofing the JAZZ as the technology advances.

JAZZ

DESIGN

Outstanding, customisable and scalable designs, for all sectors of the point of sale and retail world.

K-WAY

TWIST

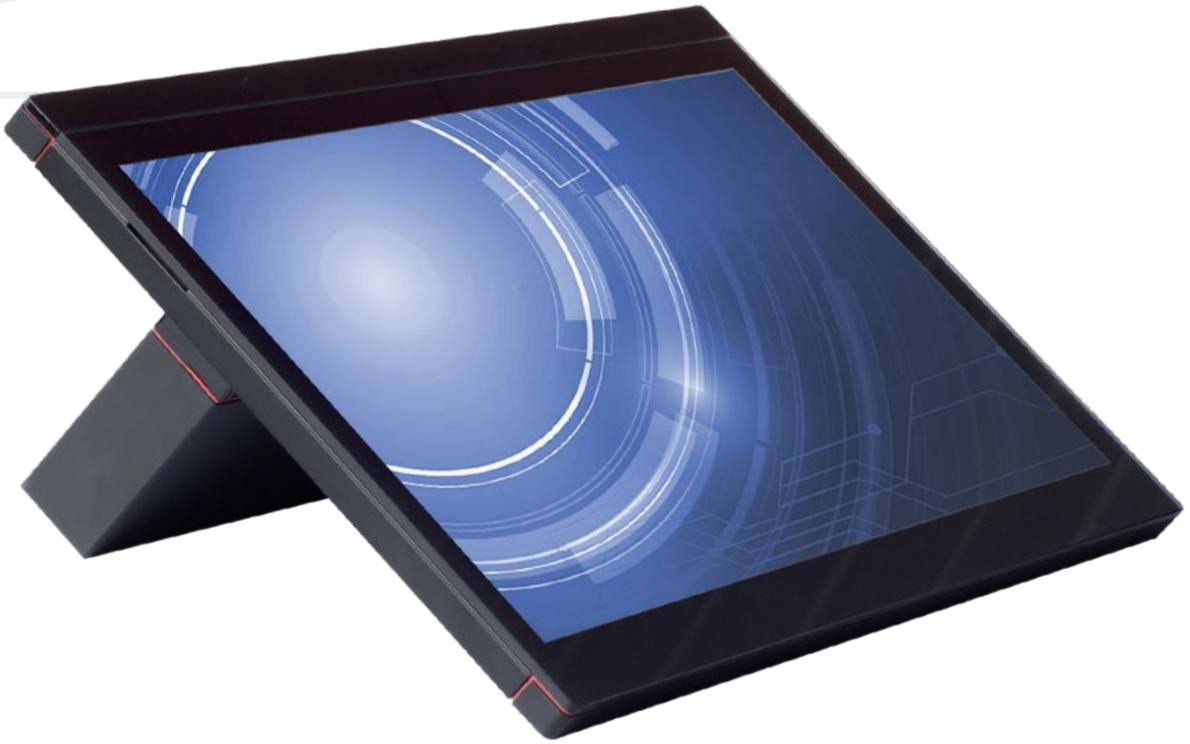

Adaptable,
multi-view POS!

TWIST is an ultra-compact POS system with straight, geometric lines that can be adapted in a flash to two complementary viewing and working angles, like a smartphone: tilting from its base, it can be used either as a desk version, virtually flat, on the sales counter, or repositioned, thus offering a second configuration, with a screen that is no longer «virtually flat» but more vertically oriented.

TWIST uses the same motherboard as the JAZZ range of systems, as well as USB-C technology, allowing a significant reduction in cables.

TWIST

YUNO

Universal, multi-configuration & stylish

The universal concept of the YUNO POS system provides a wide range of over 30 possible product combinations. Equipped with a choice of different processors, this fanless, high-performance and modular POS system has a robust design with simple and timeless lines that allow it to adapt to all styles of point-of-sale and service installations.

It is available in several 4/3 and 16/9 multi-touch screen formats, in its classical POS version - on a base - as well as in the VESA version, for wall or pole mounted applications.

YUNO

SANGO

Irresistible POS!

Accessible and ergonomic, available in a range of 7 exclusive colours, the SANGO point of sale terminal is emblematic of AURES know-how. It reveals distinctive style and lines and is the ideal complement to the visual identity and brand image of retail outlets right up to the checkout area.

In order to provide free space under the touch screen, SANGO's elegant, cast aluminium arm is a true exoskeleton for the system, supporting the CPU and the heart of the technology – and also acting as a heat sink.

SAMGO

MANUFACTURER

AURES has been offering complete and innovative POS, mobile POS and KIOSK hardware solutions since 2005, with renewed product range every year.

Willkommen im
Sporthaus des Südens.

TMC 7200

Lightweight & retail hardened Handy POS tablet

This 7" rugged Mobile POS features an ergonomic and elegant design, high performance - including WIFI, Bluetooth and NFC - and low power consumption. Ideal in the restaurant and hotel industry - and in all hospitality and food service establishments - this professional tablet is easy to hold in either landscape or portrait mode.

Lightweight (only 400 grams), it is perfectly ruggedized to withstand drops of up to 1.2 metres. Its 8-hour autonomy allows for long-term use. Anti-fall hand-straps, barcode readers and MSR are available as options.

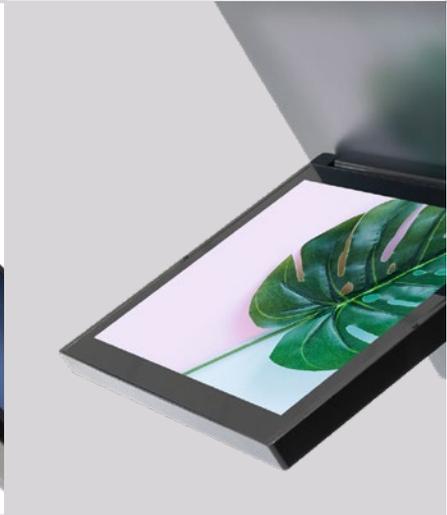

TMG 7200

PERIPHERALS & ACCESSORIES

Complete lines of associated peripherals and accessories complete the range of AURES' POS and KIOSK hardware solutions: they include receipt printers, touch and non-touch screens, panel PCs for digital signage applications & customer displays, integrated & external 1D and 2D barcode readers and scanners, card and badge readers (MSRs), multi-technology (RFID, Bluetooth, NFC, etc.) and biometric readers, Dallas or Addimat key readers, cash drawers, etc.

KOMET

Modular, scalable and multifunction KIOSK

Available in three various configurations (wall-mounted or self-standing, single or double-sided), KOMET is an essential tool for optimising fluidity at the point of sale and ensuring a successful customer experience. With a small footprint, thanks to its well thought-out design, it integrates a 27" YUNO kiosk system in portrait mode, an ODP 444 receipt printer, a payment terminal and a 2D imager scanner.

It enables reservation and order taking, click & collect, shopping and sales support, queue management, loyalty cards and promotional programmes - and of course all the transactions required on the sales area.

MINI KOMET

Countertop, totem
or wall mounted Kiosk

MINI KOMET is a more compact and lighter version of the KOMET kiosk, available both in a countertop version (designed to be placed on any counter, even a small one) and also in a freestanding or pedestal configuration.

It is equipped with a 17" YUNO Kiosk touch panel PC in 4/3 format, an ODP 444 receipt printer, a payment terminal and a high performance 2D barcode reader. Its lighter format makes it an ergonomic solution for shops where space is limited.

MINI KOMET is a self-checkout tool that allows consumers to scan and pay for their purchases autonomously, a necessary complement to traditional checkouts in many sectors.

MINIKOMET

KOSMOS

22 or 27 " freestanding Kiosk

Thanks to its special design and exclusive pedestal, KOSMOS is perfectly stable and stands on the floor without any fixings. Slightly incurved, the lines of KOSMOS do not obstruct the users' field of vision and thus optimise the space available for the layout of the outlet.

Its design reveals a controlled integration of quality and efficient sub-systems: YUNO Kiosk 21.5" and 27" touch systems offered in portrait mode, receipt printing system with "Presenter / Retract" function, choice of different payment terminals, etc.

KOSMOS

KIOSK

All kiosks designed and developed by AURES Technologies are laboratory-tested - in accordance with current EC directives - and PRM compatible (people with reduced mobility).

KALEA

Tailor made Self-check in & Self-check-out KIOSK

Designed in priority for the hospitality industry, KALEA is also suitable for the transport and public services sectors. Equipped with the YUNO system (15, 17 and 21" Wide), it is offered with a choice of three types of processors.

It comes with an integrated payment terminal, a receipt, ticket and voucher printing system, a high-performance 2D barcode reader and a badge and card dispenser (access card /key badges).

A passport reader/scanner completes the configuration, making KALEA a particularly effective tool for booking, check-in / check-out applications in all hospitality establishments, as well as in railway stations, airports and all public facilities.

The furniture that supports the KALEA structure is not supplied by AURES (non-standard & custom-made equipment, designed on a case-by-case basis).

KALEFA

KYRA

KIOSK with integrated cash management systems

The KYRA kiosk solution allows for multiple payments, including cash, thanks to the integration of specific coins and banknotes accepting machines (Cash Management systems from GLORY).

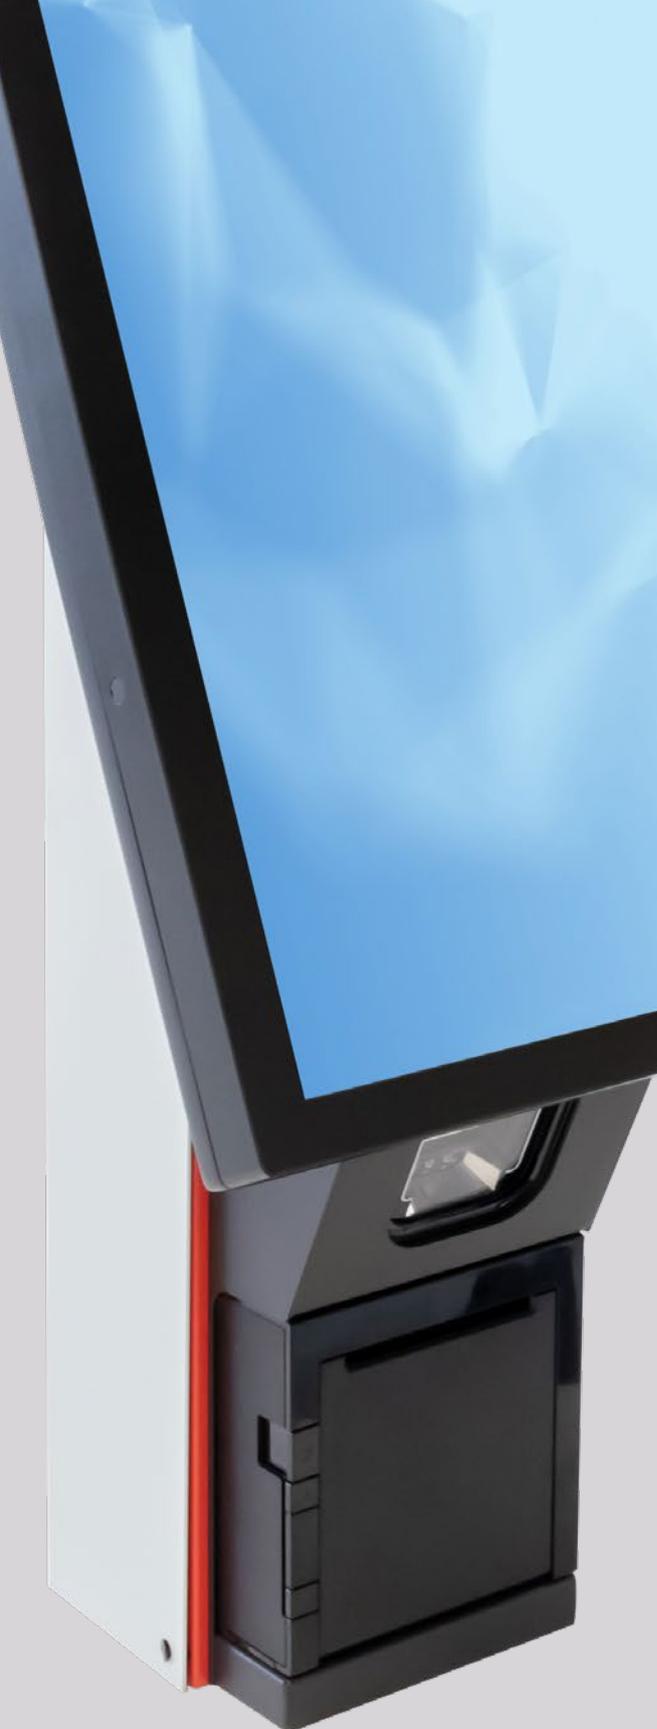

Equipped - among other things - with the AURES TWIST system (3 processors are available - J1900, i3 or i5), KYRA offers the end-user an ultra-flat, full HD, 13-inch landscape-oriented touch screen.

The advanced and ergonomic design of KYRA will fit into most retail areas. It will allow consumers to confirm their orders and pay for their purchases in complete freedom, thanks to multiple means of payment - and will considerably reduce queues and flows of shoppers in crowded outlets.

KYBRA

KRYSTAL

Compact, slender and light-weight KIOSK

Versatile and modular, the KRYSTAL solution is endowed with a simple and elegant light vertical design, both in its freestanding or countertop versions; equipped with a 15 or 21" screen (portrait or landscape format), this kiosk can be associated with a wide range of options which will enable it to satisfy many applications.

It integrates the YUNO Kiosk touch technology (2 sizes and 2 screen formats are available), an ODP 444 receipt printer, a payment terminal and a 2D barcode reader.

Simple and ergonomic, KRYSTAL will meet all various needs of the customer journey.

INTEGRATION

AURES POS & KIOSK equipment integrates modular, flexible and performing OEM sub-systems.

KEEGO

Multifunctional Kiosk with integrated RFID tank

Built around different modules, KEEGO has an extremely small footprint (only 810 high x 487 wide x 385 mm). Its RFID tank integrates several antennas and allows a fast, automatic and simultaneous identification of the shopping basket; resulting in increased service time and a reduction in queues.

Thanks to this Self-Check Out Kiosk, any customer in search of fast and efficient service can complete a fully autonomous checkout.

Driven by JEOS technology (control unit) linked to a 10" screen with a projected multi-touch capacitive panel (10 points), KEEGO delivers an appreciable ease of use, excellent touch accuracy and great responsiveness.

KEEP GO

KOLARIS

Modular and scalable KIOSK solution

KOLARIS is available in standalone (freestanding) or wall-mounted versions; it integrates high-performance sub-systems such as the YUNO Kiosk 21.5" touch system in portrait mode, a receipt printing system and a payment terminal (several references are available, including Worldline, Ingenico or Verifone).

This kiosk accepts cash payments thanks to its banknote reader/acceptor, as well as restaurant vouchers and discount coupons. It can also host a card dispenser, for multiple operations to serve the customer experience and journey.

KOLARIS

Value added SERVICES

The AURES Group designs, manufactures and markets innovative, reliable and high-performance POS & KIOSK systems. To enable customers and partners to use AURES hardware with complete peace of mind, we have devised a range of related services, service packs and international guarantees.

We understand the complexities of installing and supporting roll-outs of any size - and have thus developed a portfolio of services that can help you configure your new equipment, streamline its installation and support it throughout its life cycle and across international borders.

Our aim is to provide both well-rounded services to complement our products and valuable pre- and post-purchase assistance. A range of made-to-measure and turnkey servicing solutions are available, providing fast reaction times, local assistance and flexible service options.

ETK

by AURES Konnect

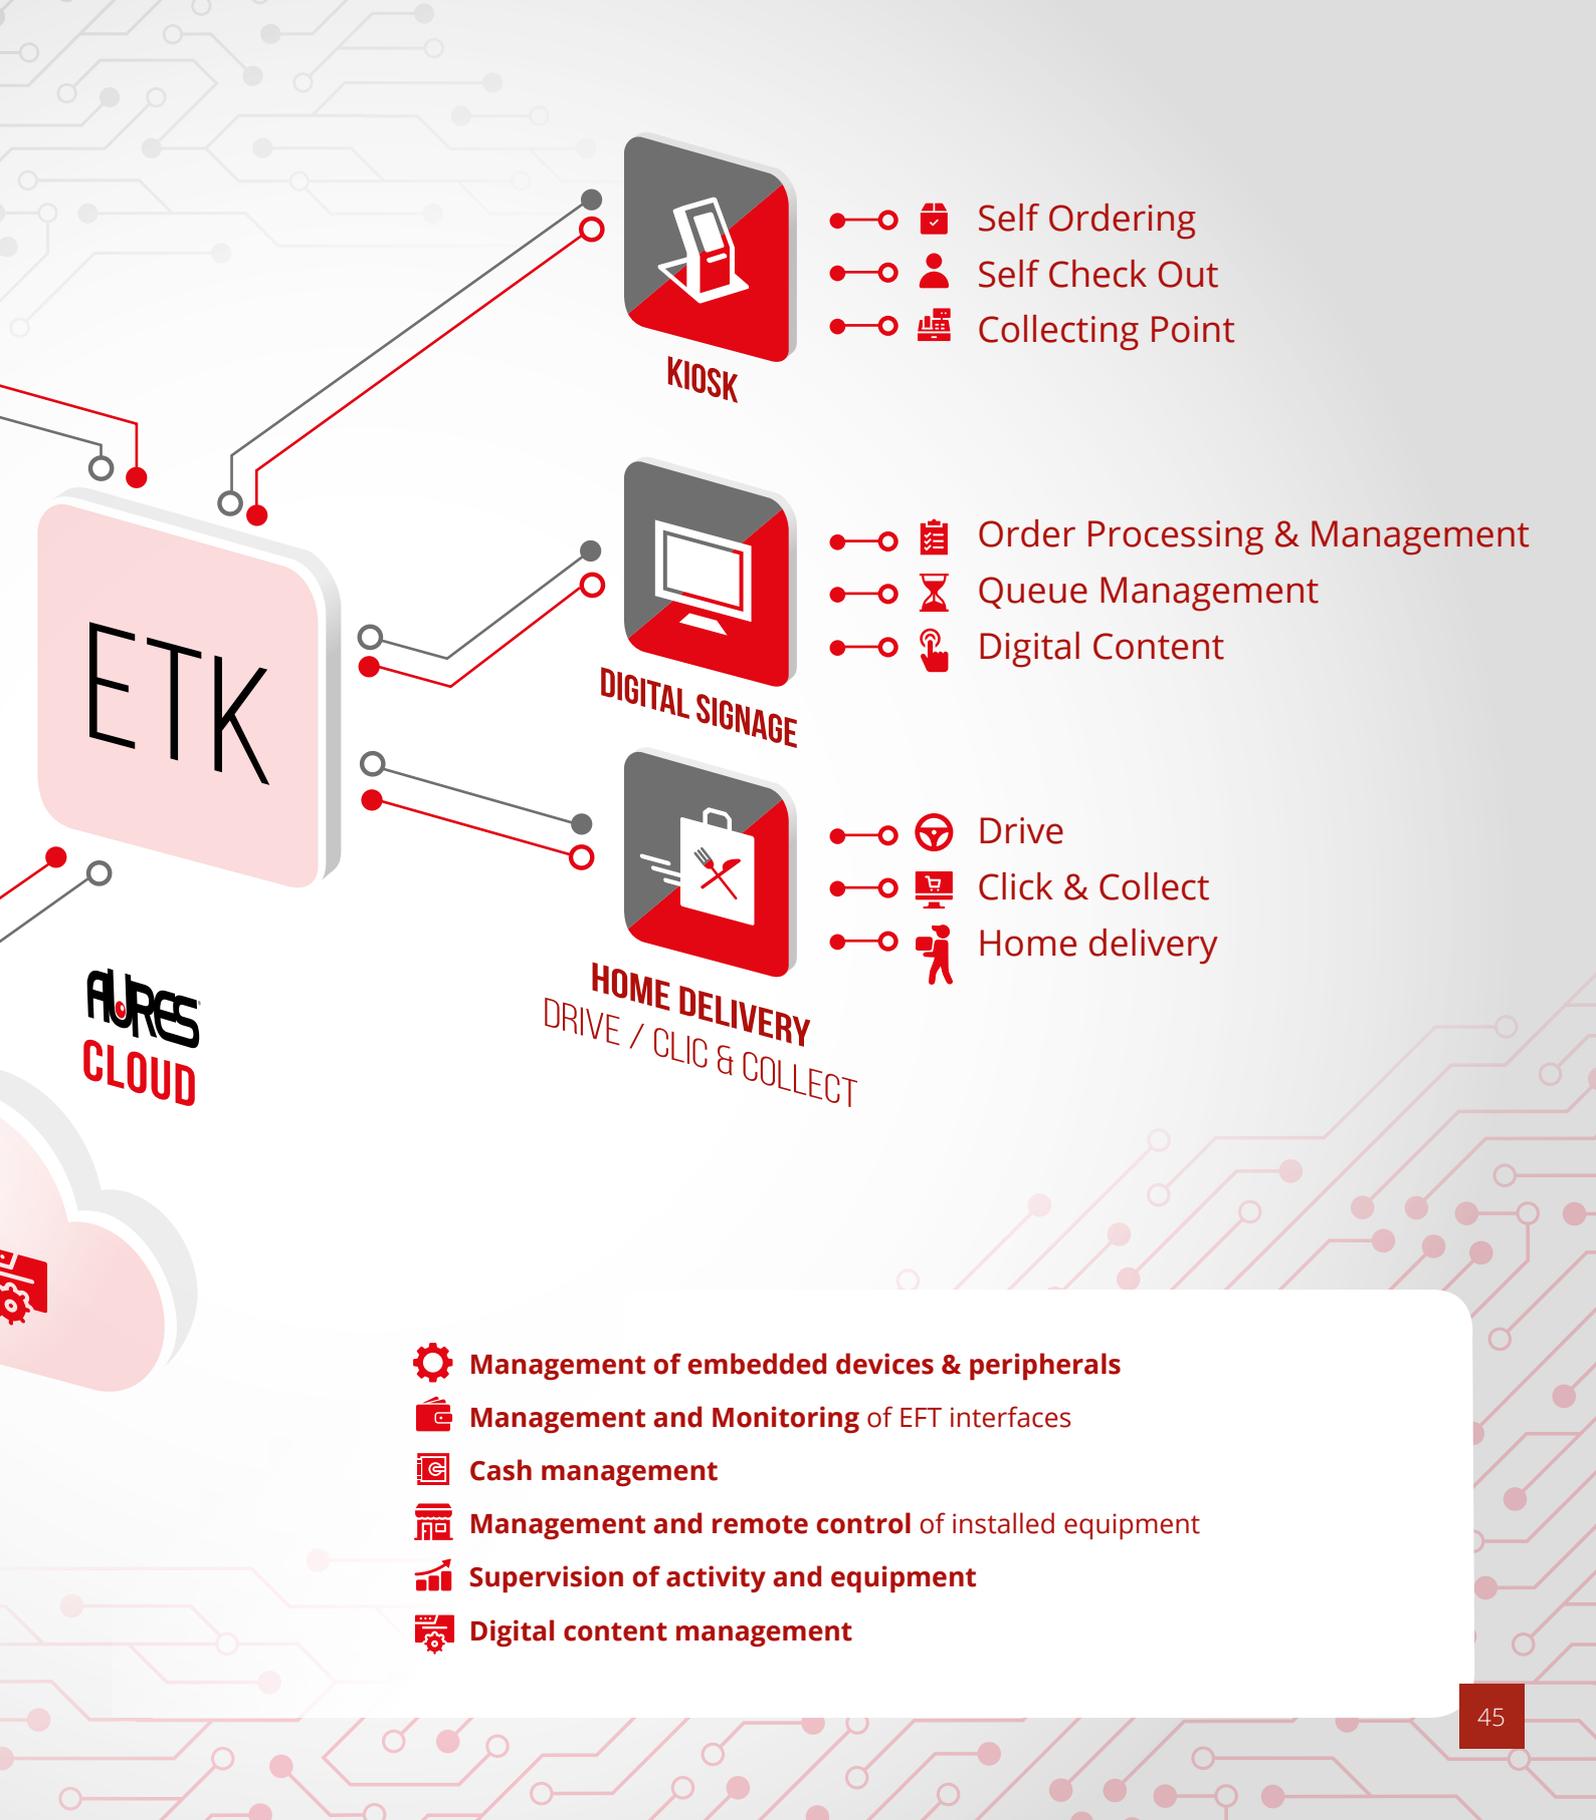

Designed and developed by AURES Konnect to anticipate and meet the requirements of omni-channel retail and the digitalization of the customer journey, ETK (Easy to Konnect) is an exclusive and universal Middleware platform for point of sale and customer facing applications, catering for the retail, food & beverage, hospitality, entertainment, sport & leisure, travel and service sectors.

Its purpose is to interconnect all point-of-sale and customer touchpoints with the AURES Group's existing range of products which includes world leading point-of-sale terminals and systems, tablets, mobile POS and interactive, multifunction kiosks. The platform also enables other external technical products such as payment terminals, digital signage and operational screens, etc, to be linked together.

A truly "integrated engine" located at the heart of your technical infrastructure, the ETK Middleware is flexible and scalable. It can adapt to your present and future needs, allowing the total connectivity of all your software and hardware solutions. This is achieved through specific dedicated application programming interfaces (documentation and API) allowing standardised interaction between two software platforms.

These APIs will work both with existing partner software solutions or new application developed by the AURES Konnect team.

INNOVATION

by AURES Lab

In addition to the AURES Group's range of POS and KIOSK hardware solutions, the INNOVATION Division's specialists (AURES LAB) can advise and support you in all your projects to develop and implement new global technological solutions based on RFID.

Whatever the sector of activity and its constraints, the LAB helps you define and analyse your needs and deploy exclusive multi-technology added value applications; our methodologies respect your existing processes and economic objectives and take into account any request you may have regarding training and change management.

AURES LAB's areas of intervention include stock optimisation, implementation of customised RFID solutions (product traceability, etc.), self-checkout (SCO & RFID kiosks), click & collect/delivery, indoor-outdoor customer geolocation, table order taking, cash management (together with other means of payment such as luncheon vouchers, etc.), management of queuing and appointment scheduling, customer flows and customer journey analysis, management of loss prevention and counterfeiting, etc.
