

LORENFA

arte nelle tue mani

Technology dedicated to serving art

Lorenfa is an Italian company, leader in the creation and sale of statues, souvenirs, museum reproductions and educational use reproductions.

Founded in 1996 by its current CEO, Fabio Simeone, with the intention of merging traditional art with the most modern technologies, it employs a team of professionals, modelers, and 3D sculptors, true artists of the digital era.

Lorenfa provides museums, art galleries, and cultural institutions around the world, customized services that enhance the value of their collections and enrich the experience of their audience.

3D scanning

■ STATUES / ARTWORKS / HUMAN BODIES SCANNING

■ 1:1 AND SCALED REPLICAS

■ PRESERVATION AND EDUCATIONAL USE

■ SERVICE AVAILABLE WORLDWIDE

Lorenfa offers an innovative 3D scanning service in the acquisition and preservation of artworks.

Through the use of innovative equipment such as the Artec Leo, a professional wireless 3D scanner, it is possible to capture every detail quickly and up to 80 frames per second. This technology makes it possible to capture both small to medium-sized objects and entire environments, without compromising quality or accuracy.

This service not only simplifies the process of conservation of artworks, but also opens up new creative possibilities in the industry of digitalization of arts.

Replicas

- 1:1 SCALE / MINIATURES / SOUVENIRS
- CUSTOMIZED BUSTS AND STATUES OF HUMAN SUBJECTS
- LIGHTENED VERSIONS AND DIFFERENT MATERIALS
- REPRODUCTION FOR EDUCATIONAL USE

Lorenfa distinguishes itself in the reproduction industry through its commitment to continuous and strategic innovation. Working with globally renowned institutions like St. Peter's Basilica in the Vatican and the Egyptian Museum in Turin, Lorenfa delivers high-quality replicas that mirror the original works' artistry.

Leveraging cutting-edge technologies, including advanced 3D scanning systems, the company compiles an extensive and regularly updated catalog of accurate reproductions, available in both 1:1 and smaller scales. Each reproduction is meticulously crafted down to the finest detail by highly skilled professionals, ensuring a unique "3.0 craftsmanship" experience.

Merchandising

 CUSTOM MERCHANDISE

 PACKAGING DESIGN & GRAPHICS

Lorenfa offers its customers a unique service in the field of museum and commercial merchandising, providing highly accurate reproductions of souvenirs and accessories in any scale, material, and quantity.

We create dedicated and personalized graphics and packaging, enabling our clients to stand out in the market. The designs are meticulously detailed to best reflect the essence of the artworks and the client's brand. Products are made with sustainable materials, maintaining a strong commitment to environmental protection.

The company's goal is to meet its clients' needs, ensuring unique and valuable products, thereby establishing a collaboration with deep, lasting, and successful roots over time.

Our Commitment to the Environment

Lorenfa incorporates a **sustainable approach into every aspect of its production**. The **packaging** is designed with a focus on **reusability and waste reduction**, offering a solution that protects the planet while meeting high standards of quality and sustainability.

The company exclusively uses paper and cardboard supplied by Brizzi Distribuzione, materials certified by **PEFC™ (Programme for the Endorsement of Forest Certification™)** to ensure they come from sustainably managed forests. The PEFC™ certification tracks the origin of fibers throughout the supply chain, guaranteeing international standards that protect ecosystems and support forest communities.

Non-Toxic Inks and Coatings

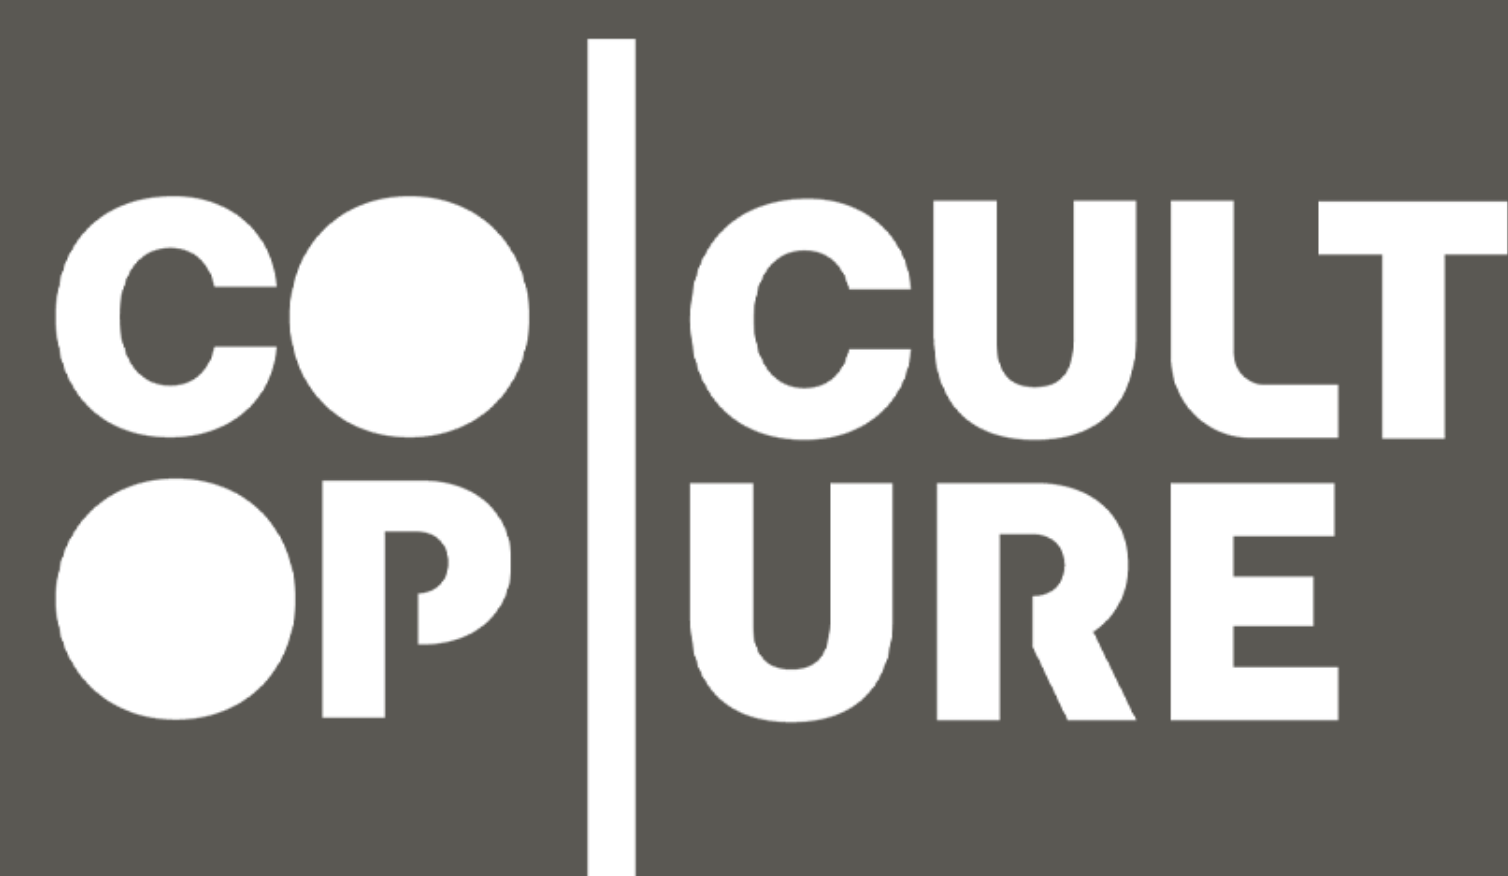

Lorenfa ensures the highest safety standards in printing by using **eco-friendly inks that comply with European food safety regulations and meet the standards of EuPIA** (European Printing Ink Association).

For packaging production, we adopt **low-migration inks** that minimize the transfer of unwanted substances and are formulated with vegetable oils and natural resins.

We also use **BIO coatings made from recycled materials**. By reducing CO2 emissions, BIO coatings actively contribute to lowering the greenhouse effect and align fully with global green policies.
