# Improving care with Goodmed

**Goodmed** helps everyone better understand and manage drug treatments in seconds.

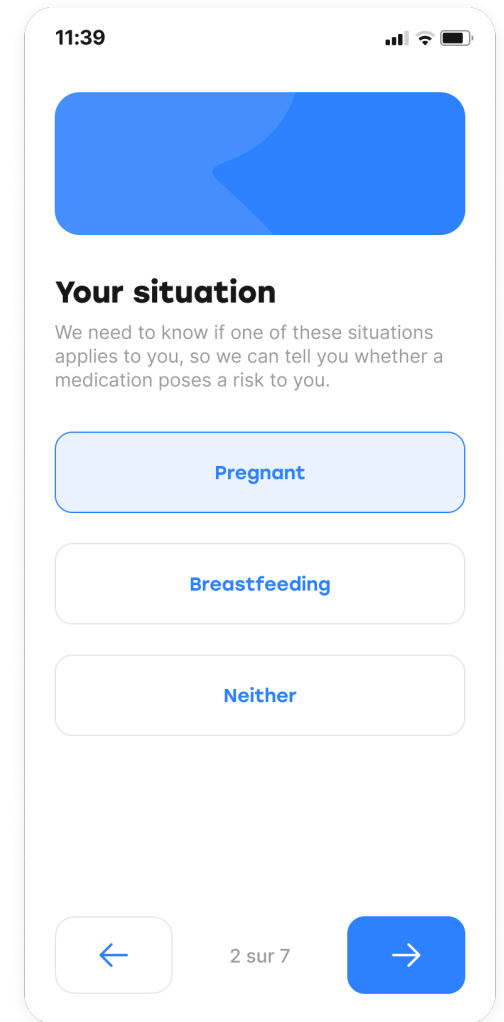

- **Delivering personalized care.**
- **Increasing patient safety by limiting adverse drug events.**
- **Reducing avoidable hospitalization costs.**

# 1. Create your unique health profile

The onboarding allows **Goodmed** to create your health profile and personalize your experience.

The following information are requested to deliver the safest care advice.

- Gender
- Age
- Pregnancy
- Breastfeeding
- Allergies
- Serious health issues including renal, heart, and liver failures

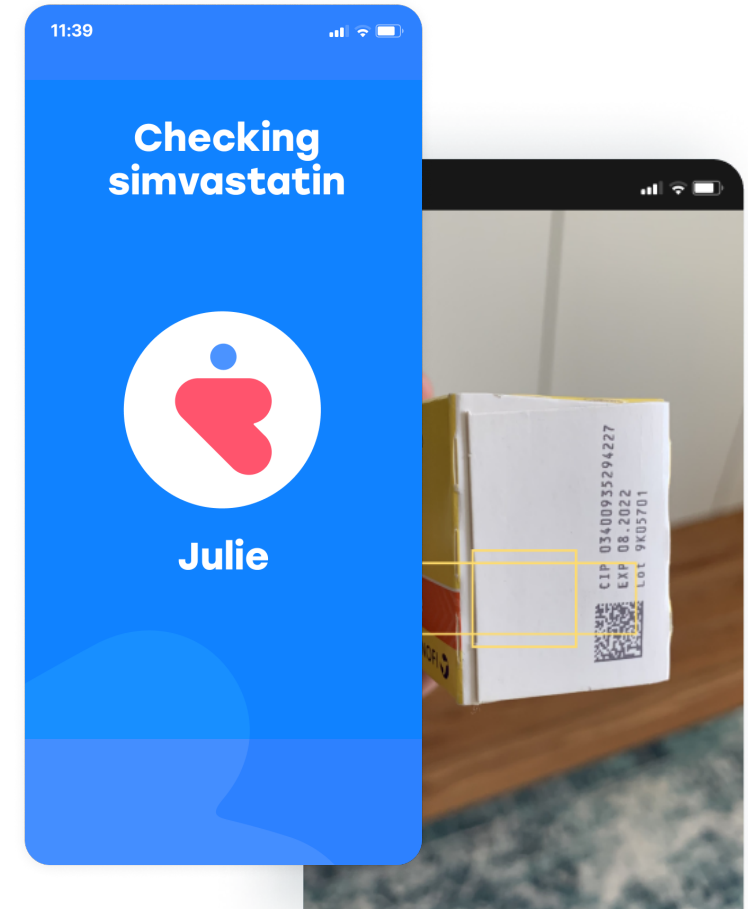

## 2. Scan your drugs

Just take a picture of your drug box and get accurate care advice!

Goodmed will check if:

- Certain drugs are contraindicated depending on your unique health profile.
- You can take more than one drug at the same time and if there is no drug interactions.

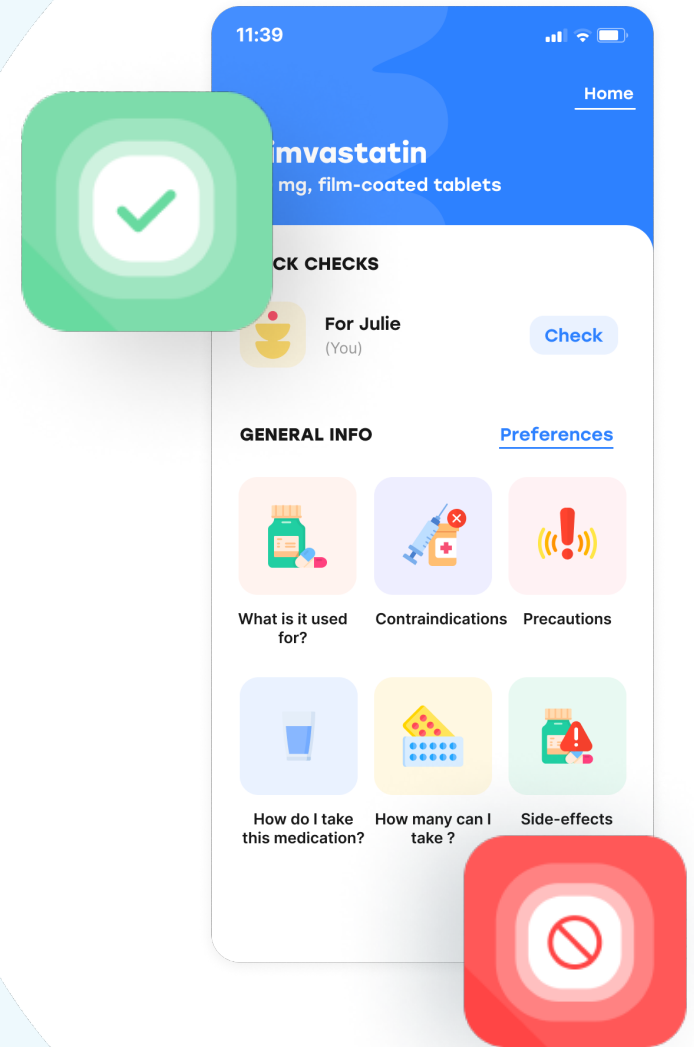

### 3. Get personalized care advice

**Goodmed** displays the impact of drugs on your health using a color code.

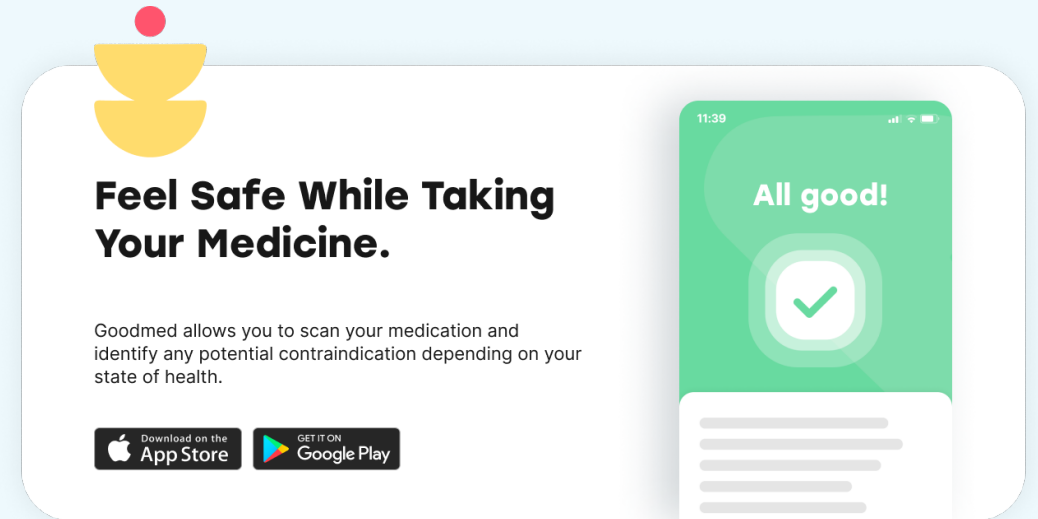

The results are personalized according to your health profile.

- **Green:** There is no risk. You can safely take the drug.
- **Red:** There is a risk detected. You should not take this drug.

# Prevent and protect your customers from drug related risks

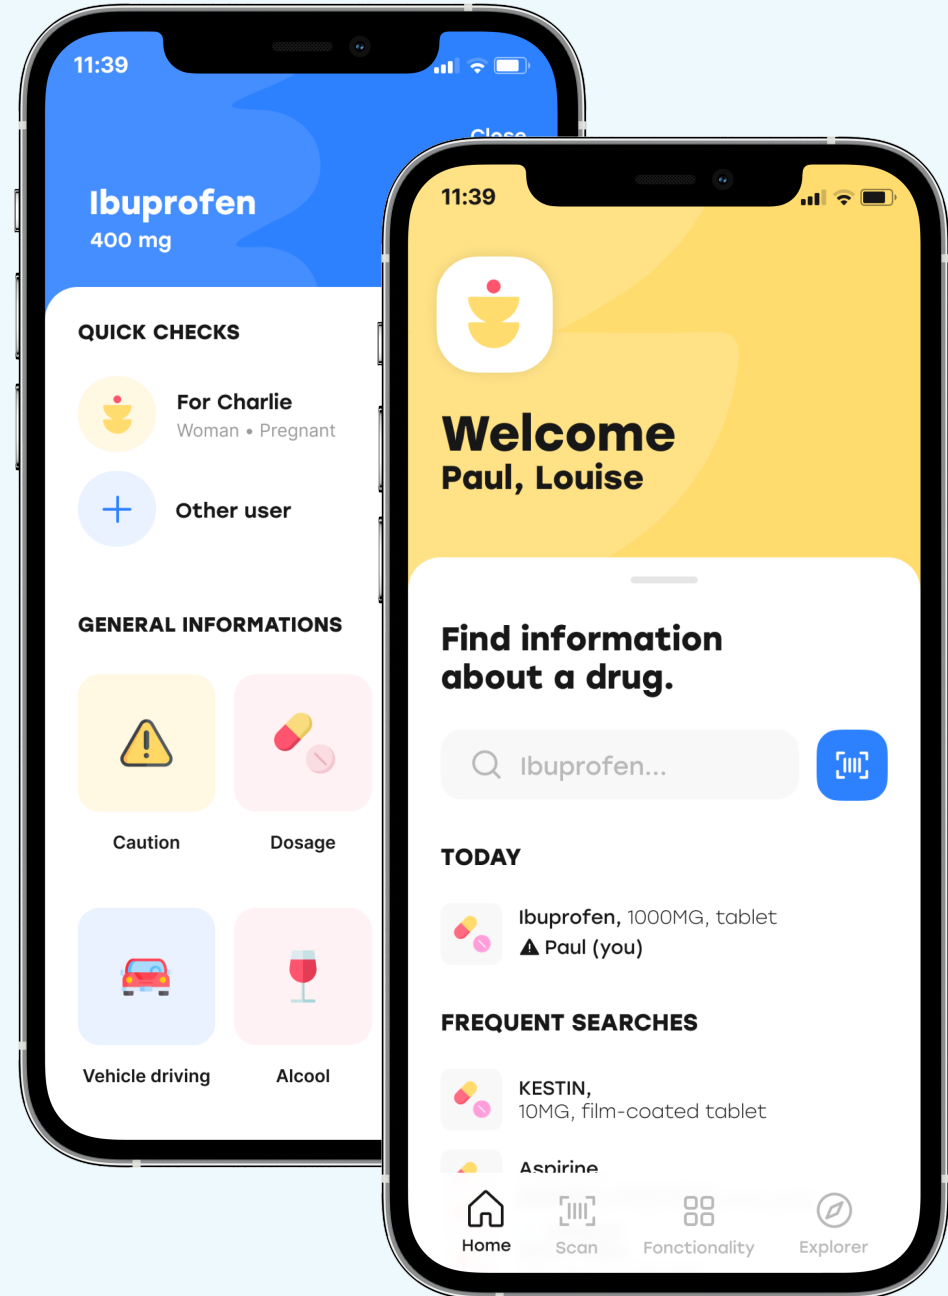

Offer services that set you apart with a powerful healthcare technology solution that prevents hospitalizations and deaths caused by adverse drug events.

# A personalized drug risk prevention assistant

A unique protection against medication risks for your loved ones with **Goodmed Family**, here for you 24/7.
