Our Offers

QA Consulting

We offer an original approach which consists in auditing and diagnosing Testing processes. We make a diagnostic of your QA maturity level and identify and develop action plans and support your teams for quick wins implementation and for their mid- and long-term objectives.

Delivery Testing

We set up the test strategy for your projects and develop the acceptance reporting to offer you the necessary visibility for your decisions.

Test Automation

We work out the ROI of test machines and design them in such a way as to reduce the cost of ownership. Tools: Ranorex, Selenium, HP UFT/QTP, etc...

BPM

We represent and write your business processes through Business Process Management. It models all the actors, activities and processing workflows of the company and allows you to have a unique vision of the business in IT.
