

2025 CATALOG

We manufacture professional and industrial cooking equipment for restaurants, central kitchens, collective catering, and the food industry.

With nearly 70 years of expertise, we understand your business and your needs. We are — and strive to remain — your trusted partner in success.

OUR PRICES

This price list indicates prices excluding VAT in euro, in addition to the prevailing rate, for FCA at Capic factory Quimper. Under standard packaging, this public price cancels and replaces previous editions. These prices correspond to standard appliances, without option, without accessory.

The options and accessories are treated separately for each device and must imperatively be ordered and delivered with the corresponding devices.

Free shipping in metropolitan France from 1,800 € net of billing. Wood packaging on request (170 € HT per m³).

OUR COMMITMENTS:

- Designing and manufacturing equipment that ensures performance, reliability, efficiency, and ease of use.
- Ensuring simple and fast installation, operation, and maintenance.
- Delivering custom-made solutions.
- Offering a wide range of equipment to meet all project requirements.
- Providing quick responses to commercial and technical inquiries.

For your orders

The following information is **ESSENTIAL** to process your order:

TYPE OF ENERGY

Natural gas | Propane gas | Butane gas

230 V single-phase or 400 V three-phase | Neutral wire required | Marine voltages available

APPLIANCE LAYOUT PLAN – LEFT TO RIGHT CONFIGURATION

Example:

capic

900

Finish for the long side: specify wall-mounted suite or central island configuration.

Natural gas

Short cover panel if rear wall network

Finishing: We offer you the possibility to cover the extremities of the cooking lines:

- Short cover panels: for utility pipe access along a wall.
- Long cover panels: for utility pip access from the ground.

To be specified: Wall suite or central island (option to cover the back of the appliances).

SEE OPTIONS, PAGE 69

- Without this information, orders cannot be released into production.
- Please send all technical specifications with your order!

UPON RECEIPT

Please unpack the goods immediately. Any damage sustained during transport must be reported without delay.

1. By writing a description of the damage to the product on the delivery note (no need to describe damage to the packaging).
2. Confirm the damage in writing within 24 hours by sending the carrier a letter with acknowledgement of receipt.

OUR PRICES

This price list shows prices in euro ex. VAT. VAT applies for ex-works shipments in standard packaging. This price list supersedes all previous editions. Prices refer to standard equipment and do not include options or accessories, unless explicitly stated.

The options and accessories are processed separately for each appliance and must be ordered and delivered alongside the relevant appliance.

Key Benefits

A wide range of horizontal cooking options.

capic 700

SMALL RESTAURANTS, SNACK FOOD RESTAURANTS

*Compact, powerful,
modular, cost-effective range.*

capic 800

COMMERCIAL CATERING AND SMALL CANTEENS

*Robust, compact
and high-performance.*

capic 900

**RESTAURANTS, BRASSERIES,
CATERERS AND CANTEENS**

More versatile, more performant.

capic 900 cantilevered

**SCHOOLS, CENTRAL KITCHENS,
HOSPITALS, CATERERS AND SMALL INDUSTRIES**

Cantilevered kettles and bratt pans.

capic 1000 charcutier traiteur

**LARGE-SCALE BUTCHERS' SHOPS, CATERERS
AND CANTEENS**

capic bespoke

*Bespoke chef's suite:
CAPIC has the solution for any special requirements.*

Multiple configurations to create a wall or central assembly.

capic ecodesign

A positive approach to ecology thanks to our thoughtfully designed appliances.

CAPIC ecodesign rule

Every kW on an appliance must be optimized to give our customers:

- Energy savings
- Durability
- Speed
- Efficiency

INDUCTION HOBS

- Hob efficiency >90%
- Interchangeable inductor and generator
- 6-mm glass top
- 2–3 times faster temperature rise than a gas burner or electric plate

En partenariat avec

EcoLogic

Our end-of-life recycling rate is 96–100% depending on the appliance, in compliance with WEEE and DEA legislation.

98%

of our suppliers are **French** or **European**.
All our appliances* are manufactured in **Quimper** (France).

*except for salamanders

**BRATT PANS**

- Electronic temperature control bratt pan and kettle modes
- 12 mm thick bimetallic bottom (9+3 mm) Welded tank
- Counterbalanced, double lid.

KETTLES

- Thermostatic digital card for better precision and quicker response
- 316 L 100% welded tank manufactured by CAPIC

**FRYERS**

- Electric: oblong resistance for a greater heat exchange surface
Gas: submerged tubes and flue gas energy exchanger
- 100% welded tank, 1.5–2 mm depending on the model
- Yields 15–60 kg/hr (French fries) depending on the model

**EASY TO CLEAN**

Stainless steel wire grill and basin, machine washable.
Open burner

Drip drawer under open burner and solid top

Sealed electric plates

*Compact footprint
maximum efficiency*

BRATT PANS

- Angled tank, 12-mm bimetallic bottom.
- Counterbalanced, double lid.
- Large spout.
- Tilting for full drain.
- Hot/cold water supply by fixed tap controlled on the front panel.
- Manual or electric tilting, with stops in any position.

Our bratt pans are equipped with:

ELECTRIC MODEL:

- 400Vx3+N+E
- Sequential thermostatic regulation, kettle mode.

GAS MODEL:

- 230Vx1+N+E
- Electric ignition.
- 4-position gas valve.

KETTLES

- 316 L stainless steel tank and base Tank welded on top.
- Counterbalanced, double lid.
- Hot/cold water supply by fixed tap control on the front panel.
- 40/49 drain valve.
- Removable strainer with level indicator.
- Electric ignition for gas model.

Our kettles are equipped with:

DIRECT HEAT MODEL:

- Elec. 400Vx3+E
- Control by energy regulation.
- Gas 230Vx1+N+E
- Controlled by a 4-position valve.

BAIN-MARIE MODEL

- Electric: 400Vx3+N+E or Gas: 230Vx1+N+E
- Sequential thermostatic regulation, kettle mode.

FOOD SERVICE, BRASSERIES, CATERERS AND CANTEENS

These cooking modules
are compatible with
the 900 cantilevered range

FEATURES

- **3 mm top**
- All stainless steel 20/10th structure
- Fronts and sides, 1 mm
- Depth: 925 mm
- Top height: 270 mm
+ back splash guard height: 120 mm
- Height with 900/930 base
- Wide range of neutral, hot and refrigerated bases
- Bridge support or cantilevered (pages 72, 73)
- Fixed or mobile, against a wall or central and monobloc on demand

TURBOFRIT – FRYING UNITS

Our **frying units** have a matching cupboard set to hold an optional 35-L capacity FILTRECAPIC filter. After filtering, the oil is automatically pumped into the selected tank.

Welded tank. Regulation by electronic thermostat.

Safety temperature limiter.

Comes with 1 large basket as standard: electric (360x270x125) – gas (500x290x200).

Optional 2 half-baskets: electric (360x140x125) – gas (450x140x140).

Digital control with melting system. Oil tray with filter on wheels.

-  **Electric:**
 - Tilting, oblong, stainless steel heating elements 400Vx3+N.
 - Electromagnetic safety contact.
-  **GAS:**
 - High efficiency burners. Electric ignition 230Vx1.
 - Safety assured by pilot flame and thermocouples.

Important: Do not put more than 2 fryers on the left or right of a FILTRECAPIC.

KETTLES

- **316 L stainless steel** tank and base. Tank welded on top.
- Counterbalanced, double lid.
- Hot/cold water supply by fixed tap control on the front panel.
- 40/49 drain valve.
- Removable strainer with level indicator.
- Electric ignition for gas model.

Our kettles are equipped with:

DIRECT HEAT MODEL:

- Elec. 400Vx3+E
- Control by energy regulation.
- Gas 230Vx1+N+E
- Controlled by a 4-position valve.

BAIN-MARIE MODEL

- Elec. 400Vx3+N+E or Gas 230Vx1+N+E
- Sequential thermostatic regulation, kettle mode.

BRATT PANS

- Tank with rounded internal angles, 12 mm bimetallic bottom.
- Counterbalanced, double lid.
- Large spout.
- Tilting for full drain.
- Hot/cold water supply by fixed tap control on the front panel.
- Manual or electric tilting, with stops in any position.

Our bratt pans are equipped with:

ELECTRIC MODEL:

- 400Vx3+N+E
- Sequential thermostatic regulation, kettle mode.

GAS MODEL:

- 230Vx1+N+E
- Electric ignition.
- 4-position gas valve.

MULTIPURPOSE BRATT PANS

These bratt pans are designed and equipped for multi-purpose **heating and regulating**. They can be used independently or incorporated into a unit.

- Tank with rounded internal angles, 12 mm bimetallic bottom.
- Counterbalanced doubled lid.
- Electric tilting, with stops in any position.
- Gas cut-off when tilting.
- Sequential thermostatic regulation, in bratt pan and kettle modes.
- Cooking timer card + delayed start on electric models.
- Volumetric water meter.
- Electric ignition for gas models.
- Hot/cold water supply by fixed tap controlled on the front panel.
- Handspray.

*Cantilevered kettles
and bratt pans*

capiC
900 cantilevered

**SCHOOLS, CENTRAL
KITCHENS, HOSPITALS,
CATERERS AND
SMALL-SCALE
INDUSTRY**

Key benefits: Increased production, multipurpose cooking, easy cleaning and ergonomic design.

FEATURES

- **3 mm top**
- Stainless steel body
- 1 mm panels
- Welded and bolted 2 mm and 5 mm structure with raised edge
- Depth: 925 mm
- Standard finish with flange edges for improved watertightness

INSTALLATION

- On round feet – Ø 100, height 450 – designed for draining at 150 mm from the floor
- Semi-cantilevered unit with front legs and attached to wall or floor at the back
- Can be fully cantilevered to a concrete wall or to a stainless steel welded and bolted structure
- The **capiC 900 cantilevered** range can be assembled with appliances from the **capiC 900** range

BRATT PANS 900 cantilevered

Support brackets, see page 56.

The bratt pan tanks are cantilevered between 2 pillars, height 450, fronts 200.

Bratt pan mode

Kettle mode

Timer

Core probe optional

- Round-cornered tank, **12-mm, bimetallic bottom.**
- Double lid with counterbalanced hinge.
- Electric tilting, with stops in any position.
- Gas cut-off when tilting.
- Hot/cold water supply by fixed tap control on the front panel.

- CAPIC interchangeable control cards.
- Sequential thermostatic regulation, in bratt pan mode 0 to 300 °C, and kettle mode 0 to 120 °C.
- Cooking timer card + delayed start on electric models.
- End of cooking alarm and automatic heating cut off.
- Volumetric water meter.

capic Élite

new range

Our custom-made Elite ovens are manufactured in our workshops, which have been awarded the Entreprise du Patrimoine Vivant (Living Heritage Company) label. **Fully customizable, ergonomic, designer and robust**

Guillaume Pape, ambassador of C O P I C:

*finalist in season 10 of Top Chef
and chef at L'Embrun restaurant in Brest,
awarded a Michelin star in 2022.*

*"Satisfying the Chefs
is our priority"*

CAPIC designs and manufactures your Elite suite to your specifications, guaranteeing durability, performance, ergonomics, hygiene and aesthetic appeal.

Your oven will be unique, as a result of your consultation with our specialists.

Élite is made of a single "monobloc" top and an separate base. It is built from stainless steel (3 mm top, with double thickness for flat-top units and around heating elements) with a brushed, satin finish.

The heating elements on the following pages can be integrated into your bespoke Élite oven.

Élite, the bespoke suite

INTEGRABLE ELEMENTS (non-exhaustive list)

MULTI-PURPOSE BRATT PANS Type 100

All-in-one: bratt pan, direct heat or bain-marie kettle, griddle, low temperature cooking.

- Front 2300. Depth 1285. Height 900, with 1430 screen.
- Motorized double lid with counterbalance system.
- 12-mm bimetallic bottom (9 mm + 3 mm).
- Tank dimensions 1640x700x310.
- **Cooking surface: 102 dm², usable capacity: 300 litres.** (capacity of 6 x GN 1/1 trays).
- Handspray included.
- Electric tilting, with stops in any position, offset axis for **full drain at 400 mm from the floor.**
- **NEW CONTROL INTERFACE** with touchscreen for process management and temperature regulation.
- RJ45 port available for traceability (software and network not included).
- USB port. Electric outlet.

- Flat-bottom tank.
- Electric tilting, with stops in any position.
- Full drain at 400 mm from the floor.
- Counterbalanced double lid with ingredients hatch.
- Digital card control for process management and temperature regulation.
- Operating mode: kettle mode, programmable timer with delayed start and water meter.
- Option: removable mixer. 9 programmable and rotation speeds and reversible.

COOK / CHILL SYSTEM

100/200 kg product/h
(pasta, rice, etc.)

For cooking, blanching... and chilling
pasta, rice, vegetables, meat, seafood, etc.

- The user pours the food into the cooking basket. At the end of the cooking process, it is transferred into the cooling basket.
- Heating is controlled by a temperature regulator, with a visual and audible timer at the end of the process. Cooling uses cold (tap) water.
- Control by touchscreen, to manage the process.
- Direct or programmable operating mode.
- Cooking and cooling baskets (perforation Ø1.5) can be tilted by electric cylinder.

Agri-food industries

CAPIC also offers a range of equipment specifically developed for the food industry, including ready meals, seafood, cured and preserved meats, for use by large-scale commercial kitchens, etc.

Some examples of manufacturing (see above):
ovens, cook/chill systems, bratt pans and kettles.

capic

ancillary equipment

*Reliability and
simplicity of use*

- Conveyor ovens
- Smoking kiln
- Salamanders

For pizzerias, brasseries, fast food restaurants, pastry shops
The Express is an oven mainly designed for pizzas

- Manufactured in brushed 18/10 stainless steel.
- Left to right conveyor oven.
- Stainless steel belt equipped with a removable plate for easy cleaning.
- Maximum cooking height 80 mm.
- Air impingement heating: jets of hot air are released simultaneously from the top and bottom.
- Humidity is produced by atomization to melt the cheese and prevent the ingredients drying out.
- **Electro-mechanical internal components.**
- Temperature regulation up to 350 °C.
- All models are mounted on 4 feet, or optional mobile stand with 4 swivel wheels and 2 brakes.

copic smoking kilns

COLD SMOKING

For perfect results, cold smoked food must be exposed to smoke from slowly burning wood. The temperature of the smoking kiln must be between 20 °C and 25 °C maximum to limit bacterial growth. It is essential not to exceed this temperature in order to keep the product raw and ensure proper preservation for 1 week, or up to 3 weeks if the product is vacuum-packed. The smoking kiln is not equipped with a cold air exchanger. You can use crushed ice to cool the food.

The front thermometer allows you to check the smoking temperature. The ventilation at the bottom of the door allows fresh air to enter the smoking kiln, which is important, especially for fish. This modifies the temperature of the smoking kiln but avoids disturbing the draft.

HOT SMOKING

For successful smoking, food should be smoked with a hot air flow between 50 and 60 °C. Natural combustion provides rapid flavour saturation and pre-cooking. Hard wood such as beech or oak is recommended, to ensure high-quality smoking. The aim is therefore to smoke and pre-cook simultaneously. The food is ready to eat once it has been removed from the smoking kiln and blanched.

CAUTION:
The appliance must never be left unattended when in use, due to fire risk.

SMOKING KILNS for drying and smoking: meat, poultry, fish

With option:
ventilation and
drying.

Smoking by natural combustion of sawdust contained in a drawer. Manually adjustable ventilation and draught flap. Stainless steel body. Thermometer on the front. Ventilation at bottom of the door. Supplied with 12 suspension bars for hanging food and 1 rack

SALES AND GUARANTEE TERMS

For commodity, Capic Company is presented under the terms "the Company", and the Customer under the terms "the Client".

Article 1: APPLICABLE LAW - Extent & Scope of Terms

1.1 Our contractual relationships are submitted to the following provisions and only the French law, regardless of delivery location or the nationality of one of the contracting parties. Except in case of specific agreement, they are governed by the terms below and the laws and regulations for anything that would not be provided by the following terms. The previous and following provisions apply to any order :

- Respecting or not the following defined conditions
- Further to signature of a Master Agreement which refers to these conditions
- Resulting from a business flow between the Company and the Client.

The terms and general conditions which would appear on any document of the Client will not replace and cancel the following conditions which are the only applicable conditions.

1.2 Our contractual relations only concern the providing, the delivering and, if appropriate, the installation of the equipment or appliances which are stated in the particular conditions.

1.3 Even when the price is integrally paid, the sale does not have as a consequence the transfer of reproduction of techniques, knowledge, practices and experiences, intellectual or industrial property, whatever their qualification, to the Client or whose products are the reproduction or the implementation.

1.4 Choice - Advice – Information

The choice of equipment is done under the responsibility of the Client who must, before, placing an order, inquire if necessary. Equipment or services specified in the particular conditions are designed to meet the normal needs of the Client (those which correspond to the usual functions of the equipment in an environment that does not include specific constraints). Any special needs can be taken into account only if it has been reported to the Company and expressly accepted by the Company. Equipment, regardless of the place of delivery or installation and purpose, are considered to meet the only French and European standards which are applicable at the date of the order. Any request for compliance with other standards is a special need. Equipment or services are supposed to be installed, delivered or made in an environment compatible with their characteristics or their functions and in the prior compliance with safety requirements and standards applicable to the Client.

Article 2: The Order

The order is in writing, expressing the Client's agreement after a proposal done by the Company or any agreement of the Company, evidenced by a written order confirmation edited by the Company. If the order is placed by E-mail, the author must be identified by name and function. However, an order is taken into account only by the acceptance of an offer designating equipment or services, prices, time and place of delivery, payment terms, by the Client. Any document that does not meet these conditions is not an order. However, in derogation from these provisions, any delivery, installation or service made without objection of the Client within 8 days following the delivery will be considered to have been ordered by the Client. The order can not be withdrawn or amended without written agreement from both parties. Any request for amendment will have as a consequence the revision of the prices. Any amount paid in advance is a deposit.

Article 3: Place of delivery or installation & delivery time

3.1 - Place of delivery or installation

If the sale is concluded with freight included, delivery is made at the location designated in the particular conditions at the charge of the Company. If the freight is at the charge of the Client, the delivery takes place in the premises of the Company and the freight is done on request, expense and risk of the Client

3.2 - Delivery time

he delivery period is specified in the order confirmation. It shall only begin to run from the formation of the contract. If any modification is made to the order with the Company's agreement, the period shall only begin to run from the Company's acceptance of such modification. If the payment of a deposit is required, the period shall only begin to run from the date of its payment. Delivery may not be postponed by the client from the initially scheduled delivery date. After this date, the agreed price shall be increased by any rise in the public price applicable by the Company to equipment of the same nature, and the client shall be liable for an occupancy fee of €25 excluding VAT per square meter, per week, for the entire area occupied by the ordered equipment. The delivery time is satisfied when the manufactured equipment is available to the Client at the agreed place of delivery or installation. The delay is increased in case of strikes, whether general or special of the Company or its Suppliers, and in case of failure to deliver or provide the service, particularly due to inclement weather or in case of force majeure. Non-compliance with the implementation of the contract period will not result in its resolution. The Client can not claim damages due to the delay, except if it is the result of gross negligence.

Article 4: Delivery - Reception - Installation

- **The delivery** is the provision by the Company or by any person or entity to the Client to whom the Company entrusts the execution of the equipment sold at the agreed location without installation. The consignee must check the goods at the arrival before discharging the forwarder, even if the packaging appears to be intact and must write down on the travel voucher, missing or damaged elements, and confirm them, under penalty of forfeiture of all appeal within 48 hours to the carrier by registered letter with acknowledgment of receipt with a copy to the Company.

- **The receipt** is the physical act by which the buyer takes possession of material that was delivered to him or installed. It can lead to the drafting of a document called receipt statement or any other document reflecting this taking of possession. This document may state the compliance or non-compliance or the existence of reserves.

- **The installation** is the connection by the Company or by any person or entity to whom the Company entrusts this task, of the equipment sold within the agreed premises. The installation is the responsibility of the Company only if it has been agreed in the particular conditions. The necessary connections have to be borne by the User of the equipment (extra invoicing). The User will have to prepare the premises and bring supplies and evacuations near the place of installation of the equipment (at one meter maximum from the place of installation) and according to the guidelines of the Company. Power supply voltages, type and pressure of fluids, should match those shown on the nameplate of the unit. Compulsory grounding. All electrical equipment is provided with a terminal or a wire for this purpose. For any equipment which must be installed, the Client agrees to facilitate the intervention of the Company, suspending its activity if necessary, and taking all steps to ensure that the installation is carried out under conditions that ensure the safety of persons and property. Upon installation or upon delivery, the Client checks his compliance with the order. He must submit his reserves without delay. If after delivery or installation, any lack of conformity or visible defects appear, they should be reported to the Company by registered letter with acknowledgment of receipt within eight days after delivery or installation. After this period, the Client can not avail himself of these defects for any reason whatsoever.

Article 5: Use and Maintenance

When a user manual is required, it will be provided to the buyer upon delivery.

The buyer undertakes to review these documents, carry out the recommended periodic checks, replace any parts that wear out according to the suggested schedule, and perform all maintenance tasks described in the manual.

Article 6: Prices & Invoices

The price of the supplies or services is mentioned on the confirmation of order. The prices do not include freight charges, unless the mention "freight charges included" is written in the special conditions. The prices do not include the cost of special packaging and customs fees for all deliveries outside the French national territory. Parts and accessories invoiced by the After Sales Department include postage and packing. The additional cost of the requested port express is completely invoiced. A delivery at a precise time can be done upon prior written acceptance and for an additional cost. Prices and any discounts mentioned in the catalog or any other document apply only to sales made until the expiry of their validity date.

Article 7: Payment & Property transfer

7.1 Payment terms: Save as otherwise stated in the special conditions, our invoices of equipment are payable without discount at the date of delivery or installation. Our invoices of Aftersales Department are payable by check against refunding, without discount. Any period of negotiated settlement is imperatively calculated from the issuance date of the invoice (LME regulations").

7.2 Forfeiture of the term: the non-payment of a single bill or a single due invoice, results in the payability of any debt due or unexpired, even materialized by a bill, after sending an enforcement notice to run within a week unanswered. Any delay poses, of right, default interest at the legal rate plus 2% of the current date of maturity until paid. Any payment is first charged to interest on late payments and then on the principal payment.

7.3 Lump sum compensation: If to recover the debt, the Company is obliged to initiate proceedings, the Client, in addition to compensations to which he could be convicted under Article 700 of the French Code of Civil Procedure, will have to pay a lump sum equal to 3% of the order (excluding tax) to cover its administrative costs, with a minimum of 40 Euros.

7.4 Until the payment is made, the Company retains ownership of the equipment supplied or installed. This equipment in the relationship between the Client and the Company will always be considered moveable. In case of payment by cheque or bill of exchange, or in the case of registration of the invoice amount on current account, only a registration on the credit of the current account or of the bank account of the Company will be worth payment. Until payment, the Client shall bear all risks on the equipment supplied. The Company, as long as it has not been paid, even after recovery proceedings, can claim ownership by sending a registered letter with acknowledgment of receipt to the Client; letter in which The Company expresses its decision to take back the equipment sold. The claim will not have as a consequence, termination of the contract. It is intended only to ensure payment of the receivable of the Company. Thus the Client remains liable for amounts due. To obtain payment, the Company may sell the property claimed, as is. Its ownership will be transferred to the selling price, the amount will be charged on its receivable after deducting all fees the Company will pay to exercise its claim. If for the purposes of selling, the Company must make work of restoration, the amount will also be deducted from the selling price. If the Company does not sell the property claimed and that it decides to keep them, their value will be charged on the receivable after deducting the expenses set forth above.

Article 8: Warranty

Our equipment have, for a period of two years, a warranty against hidden defects that could affect them. The parts supplied as part of after-sales service have a guarantee against hidden defects for a period of three months. The warranty begins at the date of delivery. Any return part or equipment must be paid in advance, and only after obtaining the written consent of the Company. A non-standard or a tailor-made equipment can not be returned or exchanged. Repair, modification or replacement of parts during the warranty period shall not have the effect of prolonging this warranty. Are excluded from the guarantee: the consequences of obsolescence, normal wear and tear, including glass, ceramic hob, burners, seals or components, improper use, lack of maintenance, as well as defects that would be the result of a force majeure or the intervention of a third party, except in the latter case whether express order from the Company. Are also excluded from the guarantee components exposed to fire or heat. The Company can not be held responsible for the consequences of improper use or handling equipment, non-compliance with special instructions, staff negligence, malevolence, or of third parties, misuse of equipment, or modifications made on the equipment without written consent of the Company. Except specifications, the warranty does not apply to any incident during cooking unattended. The warranty on control systems and pyrometry is limited to the guarantee that the company has itself towards its suppliers. The warranty is limited to repair and / or replacement of the part or equipment affected by defects. It is not about the tangible and intangible consequences that this defect could lead directly or indirectly. It does not include the cost of labor or the shipping charges of equipment that would be affected or travel charges that are the responsibility of the Client. The warranty is not transferable in case of disposal of equipment or materials that benefit of the warranty without the express consent of the Company. The guarantee may be supported directly by the Company or by any person who will replace her. The guarantee of Company is subject to the requirement that the goods that benefit of this warranty has been paid under the conditions described above, and in particular conditions. The guarantee is implemented in the following conditions: From the appearance of the defect, the Client must report it to the Company at the latest within eight days by mail. Otherwise, the warranty can not be invoked. The Company undertakes, upon being informed of the existence of the defect to intervene as soon as possible. If the intervention must be carried out in the premises of the Client, the Client is committed to facilitate this intervention, interrupting its production if necessary.

Article 9: Responsibility - prescription

9.1 Responsibility: The liability of the Company is limited for all damages, at the value of goods supplied or at the value of services provided only.

9.2 Prescription : Without prejudice to the causes of inadmissibility, all actions resulting from a sale or service subject to the foregoing provisions shall be commenced within three years from the date on the Client knew or should have known of the facts allowed him to exercise

Article 10: Litigation

All litigation that find its cause or its origin in the reciprocal commitments of the parties, including those who would cover their existence or their validity shall be brought before the Court of Quimper.
