The New York Times

RATED ★★★★★ BY OUR CLIENTS ON G2

“

I had personally turned on DataDome within five minutes.

Bill SALAK, CTO
Brainly

“

DataDome is fire-and-forget. Once you've rolled it out, you don't actually have to manage anything.

Mugurel MARGARIT, DevOps Manager
Kurt Geiger

“

The solution protects us from attacks, reduces the load on our servers, and has enabled us to stop downtime incidents.

Fabien PAPEGAY, IT Production and
E-commerce Operations Manager
Celio

“

The most important benefit is the protection of personally identifiable information and compliance with GDPR and other data security regulations.

Frédéric, Systems & Networks Manager
Retail

THE NEW STANDARD IN BOT PROTECTION

- ✓ Deploy in minutes on any infrastructure
- ✓ Runs on autopilot
- ✓ Unmatched detection speed and accuracy

WEB / MOBILE APPS BOT PROTECTION

 Account takeover	 Scraping	 Denial of service (Layer 7 DDos)	 Card cracking
 Credential Stuffing & Cracking	 Server overload	 Fake account creation	 Vulnerability scanning

DEPLOY IN MINUTES ON ANY WEB INFRASTRUCTURE

DataDome runs anywhere, in any cloud. The solution offers unified protection of complex architectures. It's compatible with all major web technologies, including multi-cloud and multi-CDN setups.

SERVER SIDE

Application frameworks:   

Webservers:     

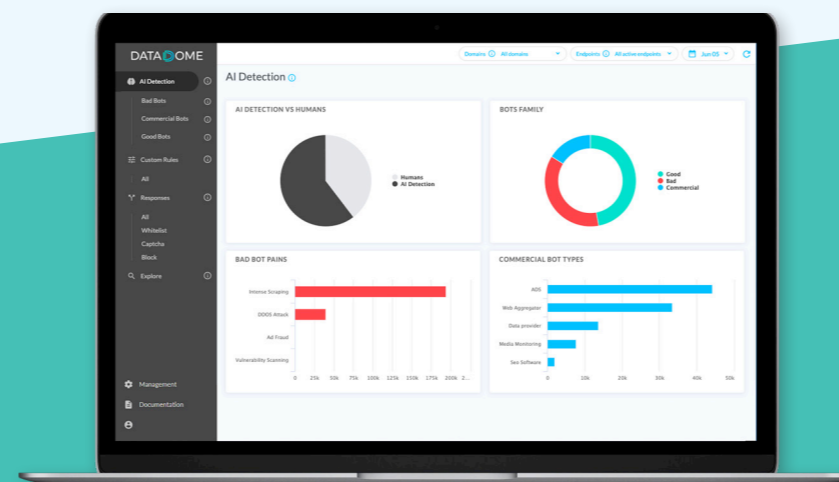

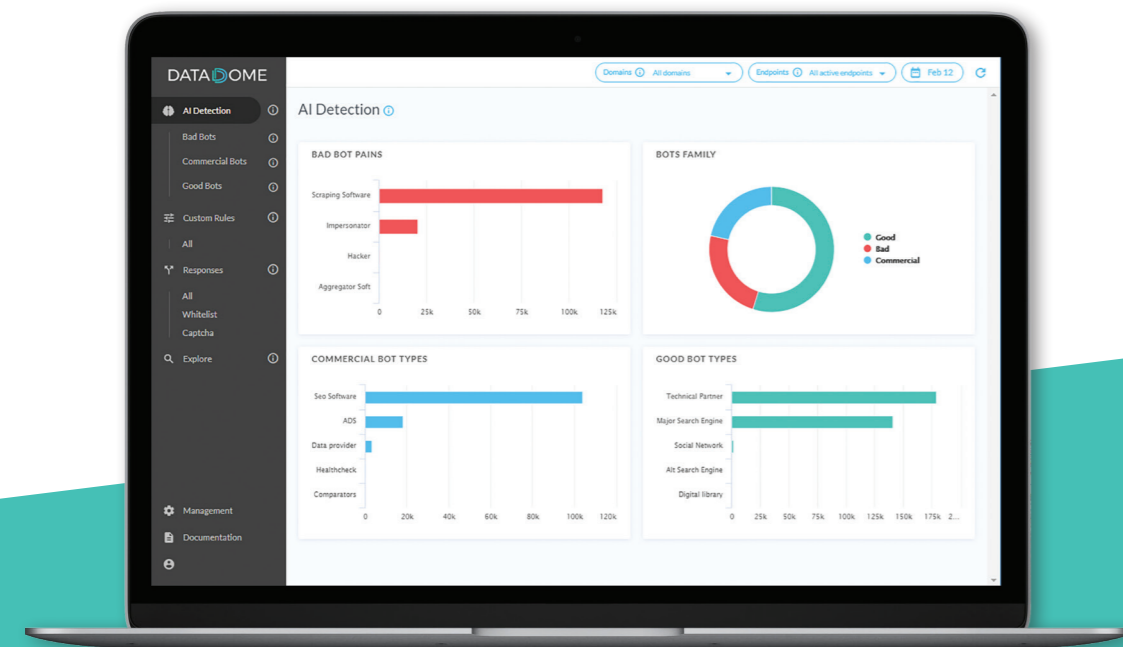

Load balancers / caching:     

CDNs:   

CLIENT SIDE

BOT MANAGEMENT ON AUTOPILOT

DataDome takes care of all unwanted traffic so that your IT teams don't have to. No more on-call incidents due to bot attacks! You retain full control, thanks to the industry's most comprehensive dashboard to monitor and optimize detection and response. With a false positive rate below 0.01%, real users and good bots are never blocked.
