PROCURE-TO-PAY

Simplify All the Complexities of Procure-to-Pay

- CREATE PURCHASING EFFICIENCY
- SECURE SUPPLIER RELATIONSHIPS
- KEEP PACE WITH CHANGING BUSINESS REQUIREMENTS

Simplify P2P Complexities

Many organizations optimize P2P by focusing on digitalizing 80% of transactions, assuming this ensures efficiency. However, the real challenge lies in the 20% of "exceptions," which often account for 80% of the workload. Ivalua automates 100% of your process and simplifies all your complexities for all spend.

-77%
on the Process Cost per Order

Adopt a Holistic Approach

P2P optimization is often siloed—eProc on one side, Accounts Payable on the other. But P2P is a cascading flow, you can't improve downstream (paying invoices on time) without optimizing upstream. Also, P2P process compliance depends on its connection to negotiated contracts. Ivalua allows for such a comprehensive approach

Implement Continuous Improvement

There is no such thing as a perfect P2P process forever. It may be perfect for a couple of months or years. However, with the company's evolution (mergers, acquisitions, new business lines, etc.), it will need some adjusting. Otherwise, the benefits of P2P optimization erode over time. The Ivalua P2P solution allows for this flexibility to adjust.

Up to x3
for Invoice Straight-Through Processing

Typical Procure-to-Pay Flow

Requisition → Approval → Order Creation → Order Approval & Dispatch

Receiving → Invoice Processing → Approval → Payments
