

WE ARE

PUBLIC SECTOR EXPERTS

As certified Ivalua specialists for the public sector, we serve governments and public entities across Europe. We deliver compliant procurement solutions that address the unique regulatory, transparency, and public requirements of contracting authorities.

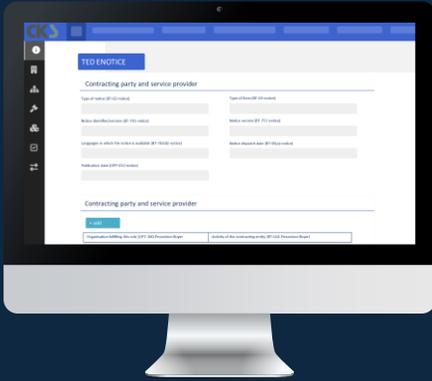

We have developed innovative solutions throughout the entire process of preparing, awarding and monitoring the execution of public contracts:

AN END-TO-END, SUCCESSFUL IVALUA IMPLEMENTATION

Focus on two successful configurations

Streamlined TED eForms Publishing

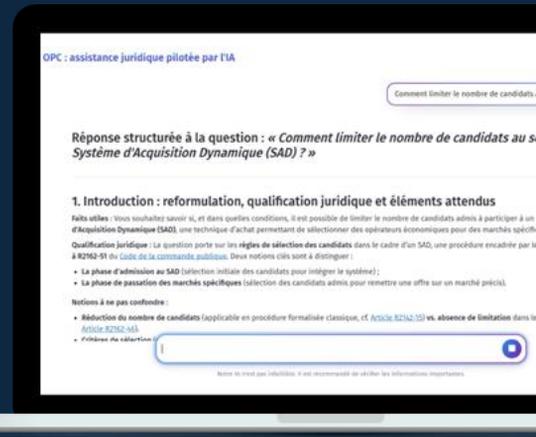

To address the operational burden of multi-platform procurement notice publication, we developed a configuration which integrates TED eNotices directly within Ivalua. It leverages existing procurement data to auto-populate required fields.

The objective: transform notice preparation to an efficient process while guaranteeing regulatory compliance. It frees procurement teams to focus on strategic sourcing and maximizing ROI.

Revolutionizing legal and operational assistance through AI

To meet growing demands for precision and case coverage, this solution is evolving its legal assistance module to fully leverage internal documentary databases. It also aims to strengthen data analysis intelligence while ensuring dynamic updates.

The objective: transform internal documentary resources into a driver of efficiency and compliance, while guaranteeing seamless integration with existing tools.
