

Enterprise AI For Procurement

Connecting people, agents, workflow and data in one AI platform.

- Production-Ready Agents
- Grounded in Accurate Data
- Total Transparency & Control

REFOCUS PROCUREMENT ON RELATIONSHIPS

Procurement's superpower is relationships, but teams are buried in data and process. Ivalua's AI platform unlocks a new **Human-Agent Operating Model**: AI Agents automate reactive work, so people can focus on the strategy setting and relationship building that matters.

AI AGENTS FOR ALL OF SOURCE-TO-PAY

AI agents automate outcomes across Source-to-Pay so your team delivers more savings, resilience, and innovation.

THE ENTERPRISE AI PLATFORM FOR PROCUREMENT

Ivalua's entire platform is built for the era of AI agents: data you can trust; autonomous action you can control; and a total AI governance toolkit.

AI Agents for All of Source-to-Pay

Ivalua's Procurement and Finance AI agents are ready to deploy for fast ROI, or fine-tune to fit your needs. Plus, build and evolve your own agents to do what no one else can.

Supplier Risk & Performance	Sourcing	Contract Management	eProcurement	Invoicing & Payments	Platform & Cross-Solution
Supplier Onboarding*	Autonomous Sourcing*	Contract Creation	Catalog Enrichment	Invoicing Compliance	Intake Management
Improvement Plan	Price Benchmark	Contract Knowledge	Product Information	Invoice Coding	Analytics

Supplier Management

Autonomous Supplier Onboarding

Automate supplier information capture and validation. (coming soon)

Profile Enrichment

Maintain more up-to-date supplier profiles.

Questionnaire Generator

Easy supplier survey and questionnaire generation.

Mass Communication

Improve communication with your supply base.

Improvement Plan

Generate improvement plans from performance and risk scorecards.

Sourcing

Autonomous Sourcing

Automate Sourcing events for more competitively managed spend. (coming soon)

RFx Price Benchmark

Smarter RFx price benchmarking using internal and market data.

Category Intelligence

Deep research for more informed category strategy.

Sourcing Supplier Finder

Automate supplier invitations from internal and market data for more competitive Sourcing events.

RFx Analysis

Automated RFx analysis and comparison for faster, smarter, more standardized award decisions.

Contract Management

Contract Data Capture

Contract digitization and term and obligation extraction.

Contract Knowledge

Search, summarize, analyze, and compare risk across your entire contract database.

Contract Creation

Turn third-party paper into smart contract workspaces for easier management.

Contract Summary

Quickly understand relevant contract terms and risk.

Clause Drafting

AI redlining for smoother negotiations and more standard, legal-approved language.

eProcurement

Catalog Enrichment

Enrich catalog content to improve on-contract and on-catalog spend.

Quote-to-Order

Rapidly convert supplier PDF quotes into compliant purchase orders.

Product Information

Explore detailed product info and alternative options for smarter purchasing decisions.

Non-catalog Requisition

Guided, compliant purchasing for non-standard goods and services.

External Workforce Interview Prep & Evaluation

Hire better contingent labor candidates with more informed interviews and evaluations.

Invoicing, Payments, & Expenses

Invoice Data Capture

Automated invoice digitization, matching, and processing.

Invoice Knowledge

Quick invoice investigation for faster processing and swifter issue identification.

Invoice Compliance

Global regulation compliance assistant.

Expense Policy Compliance

Automated expense review against company policy.

Expense Data Capture

Automatically convert receipts into expense reports.

Platform & Cross Solution

Analytics Agent

On-the-fly insights for smarter decision making, everywhere you go.

Intake Management

Improve spend under management and compliance with streamlined request intake and fulfillment.

User Support

Chatbot help for all users, eliminating support requests and simplifying change management.

Build your Own Agents

Build agents specific to your business needs.

Prompt Engineering Agent

Optimize system prompts for faster, more quality agent creation.

Add-on Store Agents

Download more agents from Ivalua and our global partners through the add-on store.

IVA: Your Intelligent Virtual Assistant

IVA isn't just a chatbot - it's your 24/7 procurement and finance copilot:

- ✓ Seamlessly integrated into the platform to help with every Source-to-Pay activity.
- ✓ Orchestrates and mobilizes the right AI agents to automate outcomes, not just tasks.
- ✓ Grounded in procurement data in Ivalua, delivering answers you can trust.

IVA

How much did each business unit spend on Equipment and IT in the last 3 months?

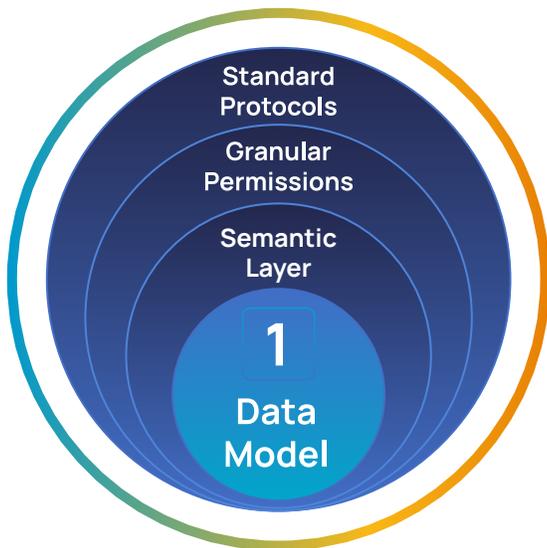

Here is the Spend Amount by Business Unit for Equipment and IT commodities in the last 3 months.

Business Unit	Spend Amount
Acme Cosmetic	\$14,653,127
Acme Technologies	\$13,984,572
Acme Corporate	\$3,861,136
Total	\$32,498,835

The Enterprise AI Platform for Total Human-Agent Success

The Ivalua Agent Factory is the operational heart of our AI-native platform—a comprehensive Agentic infrastructure that enables the ability to build, orchestrate, govern, and continuously improve AI agents.

Trusted System of Record

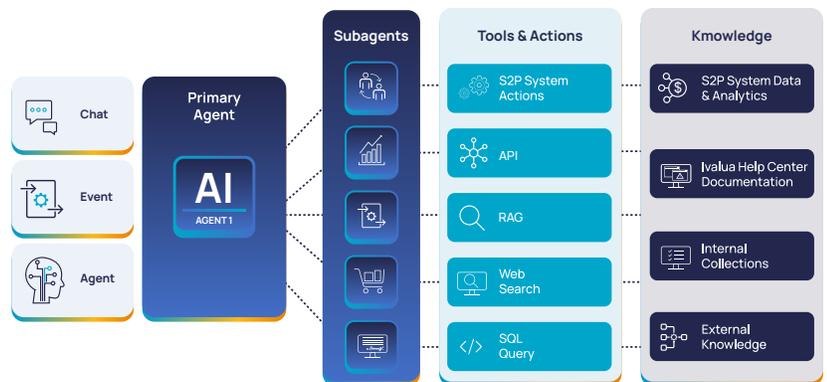

As a **trusted system of record**, Ivalua ensures IVA and AI Agents work with accurate, connected data.

- ✓ Accurate data = accurate AI, which is why all information in Ivalua is stored in a single data model.
- ✓ AI agents are grounded in this single source of truth, so you trust their actions and output.
- ✓ Role-based access controls ensure humans and AI agents don't access or leak data they shouldn't.

Coordinated System of Action

As a **coordinated system of action**, Ivalua empowers you to transform to a new, hybrid human-agent operating model.

- ✓ AI is the new UI: using software has never been easier.
- ✓ Agents act directly in the platform to automate entire procurement outcomes.
- ✓ Orchestrated human-agent workflows set the right balance of human oversight and AI autonomy for every process.

Adaptive System of Governance

As an **adaptive system of governance**, Ivalua's Agent Library and Agent Factory give you everything you need to build, evaluate, monitor, and evolve AI agents for long term value.

- ✓ Deploy pre-packaged S2P agents for fast ROI from Ivalua's Agent Library.
- ✓ Build and manage agents that work they way your business needs.
- ✓ Evaluate and evolve agents against accuracy KPIs before and after deployment.
- ✓ Total transparency to trace and monitor agent decisions.
