PRESERVING OUR NATURAL RESOURCES

Our water from the local network is a unique concept based on the preservation of our natural resources.
Packaged in its plant-based packaging in our factory in France for an eco-responsible water offer.

Our process secures, purifies and energizes water

- ❏ Removal of chlorine, improvement of taste
- ❏ Removal of 99.99% of viruses, bacteria, pesticides detected
- ❏ Improvement of water structure by BIODYNAMIZER®

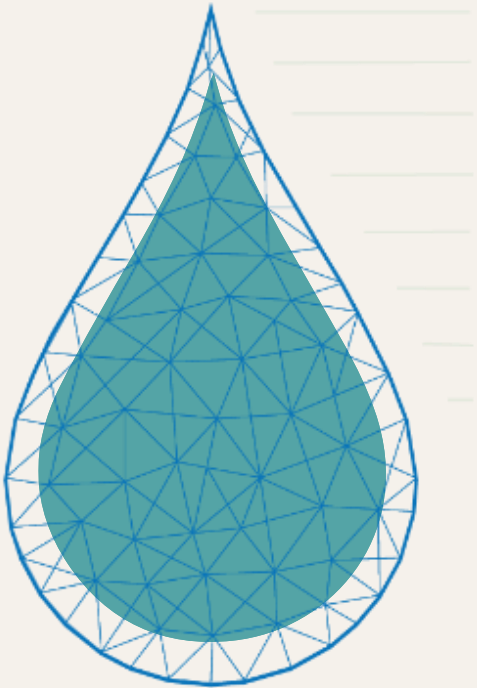

Energizing water means giving it back all its energy and original structure. This 100% natural technology allows water to be regenerated and revitalized.

FROM PLANT MATERIAL TO DELIVERY

- 1 – Manufacture of food-certified plant material, EN13432, NFU44051 from organic waste (flax, hemp, reed, sugar cane, shells, etc.)
- 2 – Production of bottles and caps
- 3 – Bottling water (securing, filtration, biodynamization, rinsing, capping, marking, quality control, packing, palletizing)
- 4 – Delivery throughout France, departure from our factory
