CONEX,

partner in your customs organisation and management projects.

Make your organisation more agile and more efficient with our customs and security software solutions.

SAFE

SECURITY DECLARATIONS

PRE-CUSTOMS CLEARANCE FORMALITIES

With **SAFE via conex™** you benefit from an intuitive work interface for managing your security declarations upon your goods' entry into the European Union territory.

Connected to the European ICS2 system and the national PNTS systems (ANTES in France), **SAFE via conex™** covers all the regulatory formalities required prior to the customs clearance of your goods:

• ENS declaration submission.
• Arrival notification.
• Goods presentation notification.
• Temporary storage declaration.

Since the UK's exit from the EU, **SAFE via conex™** has met the requirements of the new British S&S GB (Safety & Security) and GVMS (Goods Vehicle Movement Service) systems.

FREE YOURSELF from technical burden of your electronic exchanges with different administrations.

BENEFIT FROM a single interface for all your security formalities.

Solution adapted to all possible filer scenarios for MULTIPLE FILING and multiple message combinations.

CUSTOMS

CUSTOMS DECLARATIONS

A 360° VIEW OF CUSTOMS

Steer and optimise your customs declaration management! **CUSTOMS via conex™** secures your information flows and enables electronic exchanges with customs administrations. Compliant with the Union Customs Code, **CUSTOMS via conex™** covers all import, export, special regimes, transit and Export Control System customs clearance procedures..

Available in several regulatory universes (FR, BE, UK, IE, ES, etc.), the different versions of **CUSTOMS via conex™** communicate with each other and automate the transposition of your import/export data (principle of mirroring).

From source to target…
Your PDF documents and EXCEL files are intelligently integrated into the heart of your declarations.

Save time and ensure you are up to date with all regulations! **CUSTOMS via conex™** is interconnected with **CUSTOMS ENCYCLOPEDIA via conex™**, for automatic selection and integration of customs tariff regulatory codifications into your declarations.

WORK with a solution that is certified by the customs administration.

SECURE your exchanges with administrations.

AUTOMATE your declarations thanks to OCR processing of commercial documents and integration of Excel files.

ZEN

COLLABORATION PLATFORM

WORKFLOW MANAGEMENT FOR YOUR CUSTOMS PROCESS

ZEN via conex™ is an international collaboration platform that centralises, tracks and archives data flows between all operators, throughout the customs process.

Thanks to Blockchain technology, all exchanges are traced and protected by timestamping their digital footprint.

ZEN via conex™ combines exchange security and instantaneous data processing.

The combination of **ZEN via conex™** and **CUSTOMS via conex™** makes it possible to synchronise operations in the pre-declaration phases.

By combining OCR processing and artificial intelligence, ZEN recovers, enhances and integrates data from commercial documents directly into the **CUSTOMS via conex™** solution.

ASSEMBLE your collaborative files.

TRACK your customs process in real time.

PRESERVE your files by means of certified archival storage.

MONITOR the evolution of your performance thanks to customisable KPIs.

CUSTOMS ENCYCLOPEDIA

REGULATIONS UNDER THE MAGNIFYING GLASS

The **CUSTOMS ENCYCLOPEDIA via conex™** is a unique database for the tariff classification of goods and access to regulations: customs nomenclatures and harmonised system explanatory notes, official texts consolidated by our teams, classification notices, binding tariff information, Customs Library and customisable regulatory surveillance service.

Its powerful natural language smart search engine provides rapid access to relevant data. The interface sorts data, suggests classifications, refines and reduces information trees and gets you straight to the point.

The interconnection between **CUSTOMS ENCYCLOPEDIA and CUSTOMS via conex™** makes it possible for the regulatory codifications applicable to a customs nomenclature to be entered into the declaration automatically.

BENEFIT FROM information updated in real time.
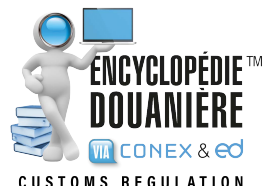

SAVE time thanks to the powerful smart search engine.

PERSONALISE your interface according to your area of interest.

TAKE ADVANTAGE OF a personalised regulatory surveillance service.

CUSTOMS REGULATION

AN INVOLVED R&D CELL

It sets the pace for our activity. Technologies and norms, companies and users, regulations and international standards, are all constantly evolving.

Our role is to anticipate, to think about international developments and to take stock of all these changes... An in-depth exploration to bring you innovative solutions that sustainably fulfil their functions.

A PRINCIPLE OF PERMFORMANCE

Our solutions allow you to increase your productivity while securing all processing relating to your customs data and your electronic exchanges.

We provide you with all the guarantees of efficiency in a context where reliability and traceability cannot be negotiated.

PERMANENT GUIDANCE

We are constantly at your side, at the key stages of an organisational change as well as in the daily use of our tools, to analyse your needs, advise you, provide you with our expertise and deploy solutions.
