EDITORIAL

Welcome

to our latest magalog featuring an exciting array of new products! This collection represents the culmination of our team's dedication to innovation, quality, and customer satisfaction. As we introduce these new items, we are thrilled to share with you the passion and creativity that we have invested into their development.

In today's dynamic world, staying ahead means constantly evolving and adapting to meet the needs of our customers. Our commitment to this ethos is reflected in the diverse range of products showcased in this catalog. Whether you're seeking healthiest recipes, timeless design, or eco-friendly packaging solutions, we believe you'll find something here that resonates with you.

At the heart of our product development process is a deep understanding of our customers' desires and challenges. Each item featured here is a result of rigorous research, thoughtful design, and meticulous craftsmanship. We are proud to present not just products, but solutions and product concepts that enhance everyday pet-life.

We also recognize that our journey of innovation is never-ending. As you explore this catalog, we invite you to provide feedback and share your experiences. Your insights are invaluable in shaping our future endeavors and ensuring that we continue to exceed your expectations.

On behalf of our entire bunnyNature-team, I want to express my sincere gratitude to our customers, partners, and collaborators who inspire us to push boundaries and strive for excellence. Thank you for choosing to explore our latest offerings, and we look forward to being part of your journey as you discover and experience these remarkable new products.

Happy browsing!
Oliver Petzoldt

In today's world, where the well-being of our pets is increasingly important, research and development, coupled with the consistent implementation of new findings into advanced products in small animal nutrition, are crucial. Our aim is to offer the best products, ensuring a continuous enhancement of our range at all levels.

**Customer-Centric Design:
Packaging with clear information value**

The appearance of a product plays a pivotal role in consumer purchasing decisions. With a completely revamped design of our packaging, we've created a modern and harmonized look that not only appeals aesthetically to the target audience but also conveys clear and informative messages. The prominent product depiction instills confidence and assurance for the buyer, guiding them to make a purchase tailored to their pet's needs. Concisely formulated benefits on both the front and back provide guidance to pet owners in making decisions aligned with their pet's requirements. Additional pictograms offer easy-to-understand information, while transparency in composition remains a notable feature highly valued by purchasers.

**Evolution of formulation:
Abundance of natural flavors and nutrients – significant acceptance enhancement**

One of the most significant changes in our products is the adaptation of the formulation for herbivores. Increasing biodiversity from 42 to 63 different plants and meadow herbs is unprecedented, mirroring natural dietary spectrums. This high diversity within a product is unparalleled and sets a new standard. The acquisition and gentle processing of this plant diversity are only achievable through our decades of experience, expertise, and small mammal competence. This formulation adjustment yields numerous benefits. By boosting biodiversity, we've not only increased variety but also heightened sensory stimulation and acceptance among animals. A wide array of natural flavors and textures makes the feed more intriguing and appealing. Moreover, the high biodiversity aids in filling nutrient gaps in animals and enhancing overall nutrient uptake, leading to healthier pets.

Another significant adjustment in our products is the deliberate integration of inulin. Serving as a natural prebiotic, inulin plays a crucial role in supporting a healthy gut flora and promoting optimal digestion. Furthermore, we've added other key ingredients to promote health and well-being. From vitamins and minerals to antioxidants and essential fatty acids, each ingredient has been carefully selected to ensure a holistic approach to our pets' health.

**Specific adaptations for various small mammals:
Tailored solutions for every animal**

In addition to general improvements, specific adaptations have been made for small mammals to ensure their individual needs are best met. For rabbits, the trimello form has been adjusted for adult rabbits, ensuring improved feed intake, maintaining intestinal and dental health through natural fiber structures, and even promoting these aspects further due to enhanced consumption. Meanwhile, guinea pigs, chinchillas, and degus benefit from the round pellet form, which simulates natural chewing behavior and enables improved feed intake. These tailored adjustments are the result of extensive research and development, ensuring that our products meet the needs of every species.

Manufacturing: gentle and natural

The production of our products demands a high level of expertise and care to ensure the quality and efficacy of each batch. Through a specialized process, ingredients are gently processed to preserve their natural flavors and nutrients. Without the use of pressing aids or binders, we ensure that our products are as pure and natural as possible. This commitment to quality and naturalness is reflected in every single product, underscoring our dedication to providing the best products for small mammals to our customers.

enjoy Nature

Welcome to the diverse world of flavours for small mammals. Our popular range, „Lust auf Natur | EnjoyNature,“ has undergone a makeover. It's easy to see that we've given both the packaging and design of our products a refresh. Moving away from monotonous colors, we've embraced a cheerful and striking presentation.

EnjoyNature not only stands for NATURE but also for JOY, and we want that to be evident on the shelf. Packaging is particularly important to us as it protects the delicious contents and is also resealable, ensuring a long-lasting taste experience and recyclable for sustainability. EnjoyNature represents a holistic natural approach.

Every bite is a sensory adventure

This statement is our promise! Our range consists of high-quality treats specifically designed for small mammals. Our products not only offer a wide range of flavors and textures but also a wealth of nutritional benefits to support well-being and quality of life through a daily snack. With great attention to detail and a deep understanding of the animals' needs, we've curated a selection of products that

not only appeal to their taste and smell receptors but also promote a healthy and balanced diet. From crunchy textures to the most enticing aromas of natural ingredients, our snacks provide a variety of taste experiences that continually delight the animals.

Our commitment to quality and naturalness is evident in every product. We use only the finest ingredients from nature, free from artificial additives and preservatives. Each snack is pure enjoyment that animals can savor without compromising on health.

- * healthy snacks for rabbits & small mammals
- * 100% natural
- * variety for all preferences
- * exciting taste experiences
- * emotional well-being

Great new varieties for dwarf rabbits and small mammals

Single food for hamsters, dwarf hamsters, mice, gerbils & rats

Ingredients:
Fly larvae

Analytical constituents:
Crude protein 51% · crude fat 25,8%

Supplementary food for hamsters, dwarf hamsters, mice, gerbils & rats

Ingredients:
Carrots, sorghum millets, cornflower blossoms, grasshoppers (13%)

Art.-No.: 15533
EAN: 4018761155330

Supplementary food for hamsters, dwarf hamsters, mice, gerbils & rats

Ingredients:
Silkworm larvae (50%), cornflower blossoms, camomile blossoms

Art.-No.: 15534
EAN: 4018761155347

Supplementary food for hamsters, dwarf hamsters, mice, gerbils & rats

Ingredients:
Soldier fly larvae (25%), carrots, sweet pepper, sorghum millets, beetroot

Art.-No.: 15535
EAN: 4018761155354

Supplementary food for hamsters, dwarf hamsters, mice, gerbils & rats

Ingredients:
Kardi seed (40%), carrots, mealworms, sweet lupine, beetroot

Art.-No.: 15536
EAN: 4018761155361

Single food for hamsters, dwarf hamsters, mice, gerbils & rats

Ingredients:
Mealworms

Analytical constituents:
Crude protein 52% · crude fat 32%

Supplementary food for hamsters, dwarf hamsters, mice, gerbils & rats

Ingredients:
buckwheat, kardi seed, rice flakes, Beetroot, oatkernel, parsnips, carrots, hazelnut (5%), herb, rose blossoms, hibiscus blossoms, marigold blossoms

Art.-No.: 15528
EAN: 4018761155286

Supplementary food for hamsters, dwarf hamsters, mice, gerbils & rats

Ingredients:
kardi seed, rice flakes, hemp seed, oatkernel, parsnips, carrots, hazelnut (5%), beetroot, mealworms, rose blossoms, marigold blossoms (seeds 70%)

Art.-No.: 15530

The innovative health solution

CRACKER

Innovative health solutions for small mammals: Health-Cracker

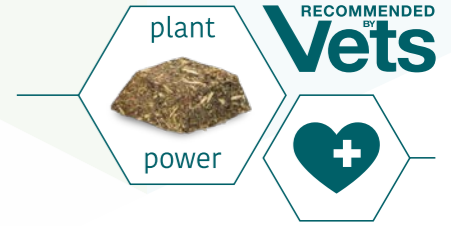

In a world constantly seeking innovative solutions for the well-being of our pets, a new avenue has opened up with the introduction of Health-Crackers. These natural treats blend high-quality ingredients with cutting-edge research to promote the health and well-being of small mammals.

The Health-Cracker isn't just another functional product; it's a thoughtful health concept addressing the specific needs of rabbits and rodents. With a unique formula based on research and development, our Health-Crackers offer a range of benefits for retailers, pet owners, and, most importantly, the animals themselves.

soothing & nutrient-rich

effective functional cracker

Key features and benefits:

1. Health from within:

Our Health-Crackers contain a carefully selected blend of natural ingredients aimed at supporting the long-term health and vitality of pets. This innovative formula combines proven herbs and plants with modern nutritional concepts to provide a holistic health solution.

2. Practical application:

In the busy lives of pet owners, convenience is crucial. Our Health-Crackers offer a convenient and time-saving solution to support pet health. With easy handling and irresistible taste, they are an ideal addition with effective results.

3. Nature-based health support:

The positive health effects of our crackers are achieved through natural components. They are particularly versatile, comforting, nutrient-rich, and can support the entire organism. The natural sources of fiber promote natural eating habits, offering a holistic approach. Ideal for pet owners looking for natural products.

4. Health for all:

Our Health-Crackers are not only suitable for sick animals but also promote the health of rabbits and small mammals of all ages and life stages. They are a valuable support for disease prevention and contribute to improving the well-being and quality of life of animals.

The three Health-Crackers in overview:

AntiHairball

Hairballs can lead to serious health problems for rabbits and guinea pigs. Our AntiHairball Cracker supports digestion and facilitates the removal of hair from the digestive tract to avoid hairballs.

Prebiotic

A healthy gut flora is crucial for well-being and digestion. Our Prebiotic Cracker contains ingredients such as inulin, Jerusalem artichoke, and chicory root, which promote the growth of healthy gut bacteria and support digestion.

Immun

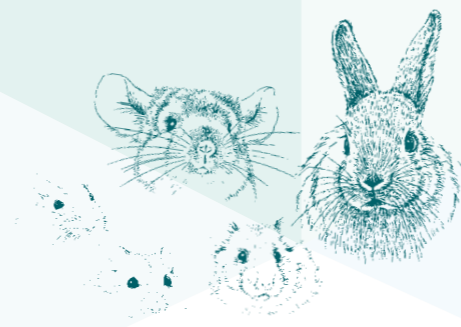

This cracker strengthens the immune system of animals with a unique blend of echinacea leaves and flower pollen. It supports defenses and helps prevent diseases.

CRACKER

for dwarf rabbits and guinea pigs

CRACKER

for small mammals

AntiHairball

Our AntiHairball Cracker offers an effective solution to prevent hairballs in rabbits and guinea pigs. The special formula with linseed cake and papaya promotes digestion and facilitates the removal of swallowed hair. Linseed cake acts as a natural lubricant, easing the passage of hair, while papaya enzymes support digestion.

Prebiotic

Our Prebiotic Cracker promotes a healthy gut flora and supports digestion naturally, helping to restore balance. The special blend of inulin, Jerusalem artichoke, and chicory root encourages the growth of beneficial gut bacteria, essential for optimal digestion and a strong immune system. Inulin serves as food for these probiotic bacteria, while Jerusalem artichoke and chicory root provide a range of nutrients supporting gut health.

Immun

Our Immun Cracker naturally strengthens the immune system of the animals. The unique combination of echinacea leaves and flower pollen supports the animals' defenses. Echinacea stimulates the immune system, aiding in the fight against pathogens, while flower pollen provides a variety of nutrients that promote health.

Trichobezoars

These are accumulations of hair in the digestive tract that occur during shedding when animals lick and swallow hair. This can lead to severe digestive problems. We want to prevent this with our AntiHairball Cracker.

Tip

We recommend feeding the AntiHairball Cracker all year round, as the animals pick up hair/fur every day through grooming. The dosage has to be increased accordingly during the active coat change.

Supplementary food for dwarf rabbits, guinea pigs and chinchillas

Ingredients: Growth of permanent meadows, linseed cake (30%), apple pomace, papaya (1%), fennel seed (0.5%), aniseed (0.5%), cumin seeds, peppermint leaves, yarrow herb, sage leaves, oak bark, thyme, camomile blossoms

bedding supplement
nesting material
bedding replacement for sick animals
and much more

THE FIRST REVERSIBLE MAT FOR PETS

100% natural

- reversible mat with two sides
- 100% natural fibers
- free from chemical additives
- absorbs odors
- made in Germany
- particularly thick with excellent absorbency
- sustainable, fast-growing raw material
- suitable as nesting material
- high activity level with Hemp-Kenaf mats
- effective thermal insulation

Mma

Welcome to the innovation

The first reversible mat for pets!

Finally, a mat that meets the needs and individual preferences of the animals in a unique way.

On the A-side, animals are greeted with a firm and stable surface where they most love to relax and enjoy extensive moments of sleep. Here, an immediate sense of comfort and security is established, allowing the animals to „let go.“

The B-side, on the other hand, offers a softer texture that exerts an irresistible allure on the animals. Here, an increased incentive for engagement unfolds: animals tear apart the mat, use it as valuable nesting material, and become incredibly active. The result? Satisfied animals through stimulation and the acquisition of valuable nesting and play materials.

Thanks to the unique and elaborate manufacturing process, animals can benefit from two different sides of the mat. Moreover, they contain fewer short fibers overall, which further enhances the quality of the mat. Due to the special needling technique - and the thickness of the mats overall - both sides absorb a lot of moisture and noticeably eliminate unpleasant odors.

But that's not all!

Our innovation includes two variants with different materials:

The **Hemp mat**, made from 100% hemp, has a higher moisture absorption compared to other hemp mats. The use of pure hemp fibers leads to quicker comfort behavior and improved properties overall.

The **Hybrid mat** made from hemp and kenaf fibers sets new standards in terms of sustainability and functionality. Kenaf is one of the most environmentally friendly plants, perfectly complementing the outstanding properties of hemp. The combination of both fibers results in a unique mat with a significant increase in activity, enormous absorbency, and improved insulation properties.

The benefits of our mats are diverse: 100% natural fibers, free from chemical additives, sustainably manufactured in Germany, versatile applications, and improved thermal insulation.

Especially the **Hemp-Kenaf mat** is very popular with animals as it increases their activity levels and significantly improves comfort behavior.
