- This document does not give you or your organization any license to any patents, trademarks, copyrights, or other intellectual property covering the subject matter in this document.
- All processes, tools and functionality described in this presentation are proposed.
- The information contained in this presentation represents the current view of Microsoft on the issues discussed as of the date of presentation. Because Microsoft must respond to changing market conditions, it should not be interpreted to be a commitment on the part of Microsoft, and Microsoft cannot guarantee the accuracy of any information presented after the date of presentation.
- Microsoft Cloud for Healthcare is a pre-release offering and may be substantially modified before commercial release. This overview represents a product view and is not indicative of final licensing of individual features. Microsoft makes no warranties, express or implied, with respect to the information provided.
- Neither the Microsoft Cloud for Healthcare nor any of its component technologies is intended or made available: (1) as a medical device; (2) for the diagnosis of disease or other conditions, or in the cure, mitigation, treatment or prevention of a disease; or (3) as a substitute for the professional clinical advice, opinion, or judgment of a treating healthcare professional. Partners are responsible for ensuring the regulatory compliance of any solution they build using Microsoft Cloud for Healthcare.

# Healthcare in transition

## COVID-19 disruption and challenges

**70%**

Average amount of elective procedures cancelled in Q2 plummeting income while expenses escalate

**20-75%**

Provider layoffs amid hospital & health system-wide disruption, layoffs, reassignments, and pay cuts

**↓ Margins**

And low cash flow forcing partnerships and M&A to survive with depleted reserves

**Crisis → Restored**

Role of healthcare leaders to move from managing the crisis to reinvent a successful future

## Ongoing Healthcare system impacts

**81%**

Patients are unsatisfied with their current healthcare experience

**\$6.2B**

Loss per year to data breaches, amid growing pressures in security and compliance

**41%**

Providers say data and analytics challenges is preventing them from succeeding in value-based care models

**14 million**

By 2030, providers will suffer from a projected shortage of healthcare workers worldwide

# Introducing Microsoft Cloud for Healthcare
