SMART REMOTE MONITORING

**The cutting edge
of cardiac remote
monitoring**

Universal remote monitoring transforms patient care, generates more data for diagnosis and research, and saves time for medical teams.

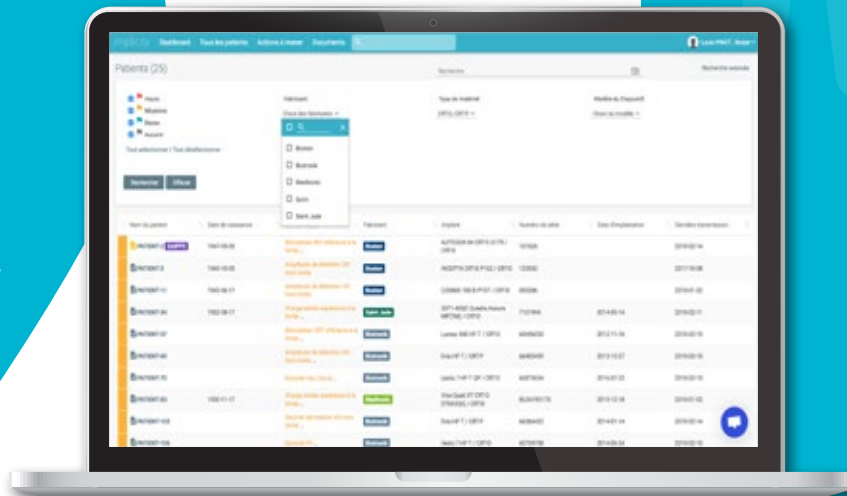

IMPLICITLY IS INSPIRED BY YOUR NEEDS

and helps you to be at the cutting edge of these changes.

- All connected cardiac devices on a **single platform**
- Generate face-to-face or remote follow-up **reports**
- Support for the billing of **remote medical activity**
- Reuse data for research, **in compliance with RGPD**
- **Dedicated user-training and support team**
- CE-marked **decision-support software**

"The platform is simple, clear and efficient for tracking alerts. The tool will allow me to bill and track this billing over time, otherwise it's impossible!"

Dr. Jérôme Thevenin
HP de la Loire, Saint-Étienne

"You have no idea how much time we saved since we started using Implicitly. It's night and day."

Dr. Aymeric Menet
GHICL - Saint Philibert

Cardiac remote monitoring is the future of patient follow up and an unprecedented opportunity for research.

Despite all the efforts of the medical community, it hasn't achieve its full potential

IMPLICITLY'S MISSION IS TO HELP YOU:

- **MONITOR** all patients remotely to identify those who need intervention and to advance preventive medicine
- **SAVE** time for medical teams and make it easier to interact and share information
- **GENERATE** as much daily data as possible and make it available for research and routine care
- **MANAGE** the billing of remote monitoring to support this activity

"Implicitly allows to use all CIEDs remote monitoring data for research as well as generate eCRFs and manage (GDPR compliant) consent forms online and on a single platform: a true time saver. Whatsmore, they have a sizeable and very reactive team."

Dr. Serge Boveda, Clinique Pasteur - Toulouse
Pr. Eloi Marijon, HEGP - Paris

IMPLICITY'S EXPANDING PRODUCT LINE

Originally: a remote monitoring platform for CIEDs and a research tool (generation of eCRFs and extraction of telemonitoring data).

Today: launch of a heart failure solution combining CIEDs and weightscale remote monitoring with CE-marked alert algorithms.

Every week: free and automatic updates.

THANK YOU FOR YOUR TRUST:

- 30 medical centers already use Implicity
- more than 16,000 patients benefit from optimal monitoring
- a team of 30 people dedicated to this product
