

Serenity Medical Services (SMS) is a leading **virtual clinic operator with specialties in neurology, cardiology and sleep disorders**. SMS combines the state of the art of a **Cloud for EEG, PSG, EMG, ECG data processing** and **dedicated teams of specialists** (neurologists, pulmonologists, cardiologists).

Remote **EEG monitoring** and **expertise**
Adult and pediatrics specialties
Fast 24/7 interpretations (<1h)

Remote **PSG monitoring** and **expertise**
Multispecialty (neurology, pulmonology)
Fast interpretations (<6h)

Remote **ECG monitoring** and **expertise**
Including **Holter ECG >24h**
Fast 24/7 interpretations

STANDARD OF CARE

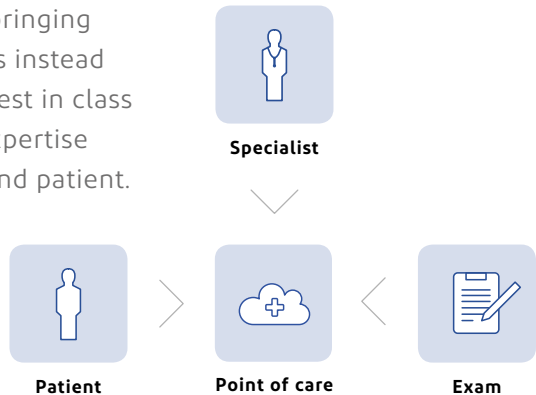

A patient requiring a specialized exam such as electroencephalogram or Polysomnogram (Sleep Disorders) will often consult their Primary Care Physician or a hospital in their area, before being referred to a specialized center.

Because specialists, like neurologists are scarce, longer commutes, delayed exams and infrequent patient's monitoring ensue.

DIGITAL CLINICS

Digital clinics allow for point of care diagnostics: in hospitals, clinics, small practices or at patient's home.

Digital clinics are all about bringing specialty care to the patients instead of patients speciality care. Best in class specialists can bring their expertise directly to every physician and patient.

Optimal flexibility

Expenses adjusted to activity

Extended activity

Up to 24/7 remote expertise or monitoring

Extended expertise

E.g. enable non-specialist medical staff to benefit from the expertise of world-class neurologists

High convenience for patient and HCP

Home monitoring, limit transportation, etc.

Better medicine

Allow for personalized medicine and high quality patient management

Lower cost

Avoid unnecessary expenses and provide the pooling of specialists' expertise

All our interpreting physicians are professors of electrophysiology and have been using the electrophysiological signals regularly for more than 15 years. We also train our technicians to perform electrophysiology recordings.

WHO WE ARE

- Founded in 2016 in the Pitié-Salpêtrière Hospital
- 70 hospitals and clinics already trust us
- 1,500 physicians as regular prescribers
- +15,000 EEGs, PSGs, ECGs remotely interpreted
- 24/7 operations 365 days per year
- <1h in response time for EEG
- 20 world-class specialists
- Over €250,000 saved per practice with digital clinics

Professor Hervé Vespignani is the founder and medical director of SMS. He has over 30 years of clinical practice in the field of neurophysiology and has trained more than 3,000 worldwide neurologists in EEG interpretation.

He is an innovative neurologist who transformed the operations of the Neurology department of the university-hospital of Nancy and is the first neurologist to use and develop digital clinics in the field of sleep disorders and neurology.
