

# Implement our turnkey prescription module for start-ups in one short hour, for just 65 euros a month

A flexible solution that integrates easily  
into your telemedicine platform's interface

## Autocomplete API

Allows searching for drug entities such as brand names, active ingredients and therapeutic classes

 **Buscar un medicamento**

Panadol Advance 500mg, tablet

Panadol Actifast 500mg, soluble tablet

Panadol Extra Advance 500mg/65mg, tablet

## Maximum dose

Warns physicians when the maximum dose is exceeded

 **Drug** 

 **Maximum dose** 

This calculation takes into account the dose and intake frequency, not the duration of treatment.

Selected dose

200 mg/day

Maximum dose

80 mg/day

## Side-effects

Rapidly informs your users about side-effects and their frequency of occurrence

 **Search for a side-effect**

Common
