

Take Advantage of a Centralized On-Call List Updated in Real Time

Used by 50,000 healthcare professionals in more than 250 health facilities

Petal On-Call was designed in collaboration with physicians and healthcare managers. This proven web-based solution digitizes and centralizes physician on-call schedules for all the medical services in a hospital to create a single, easy-to-use on-call list.

Automatically Centralize On-Call and Clinical Physician Schedules

Distribute an Up-To-Date and Easily Accessible On-Call List

Quickly Identify Available On-Call Physicians

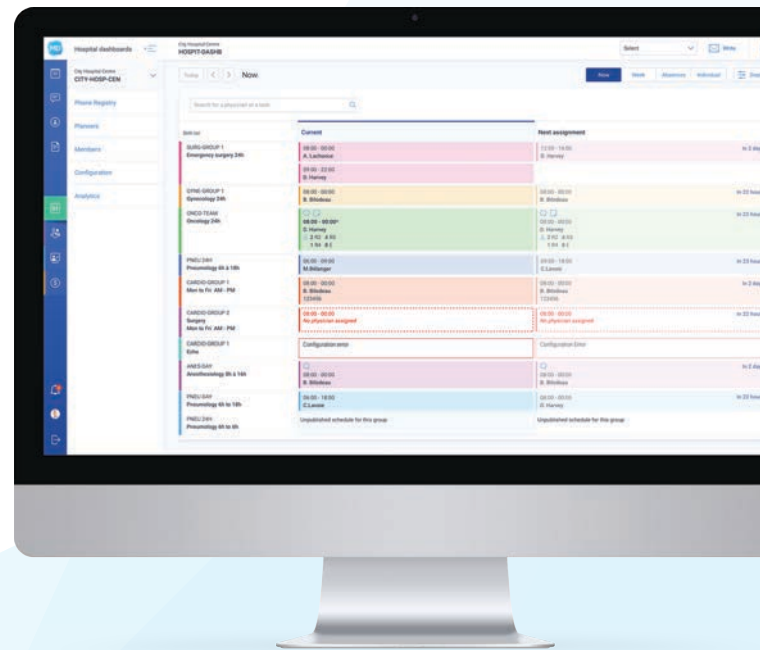

Access Key Data via Analytical Dashboards

Key Features of Petal On-Call

The interface and features are designed to simplify administrative processes, helping to maximize the efficiency of healthcare facilities.

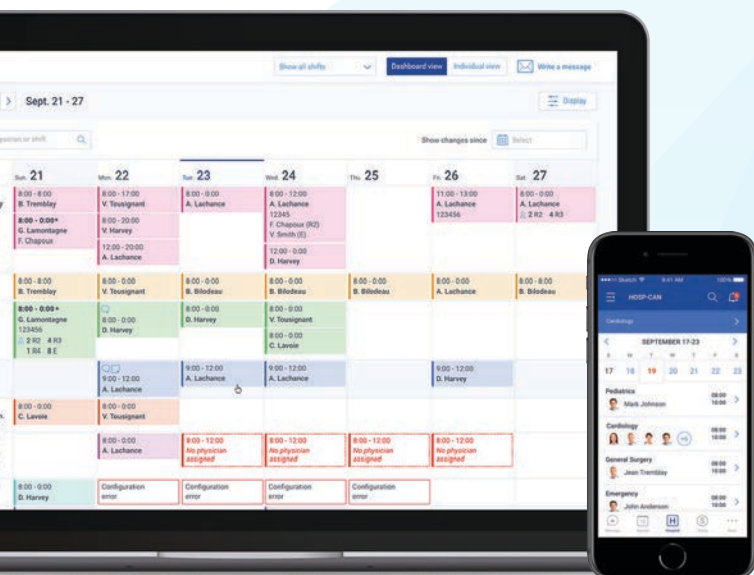

Automatically Centralize On-Call and Clinical Physician Schedules

Petal On-Call aggregates the on-call and clinical physician schedules of all medical services to automatically generate a centralized on-call list. Schedules are entered directly into the solution, thus avoiding the need to disseminate information via different media.

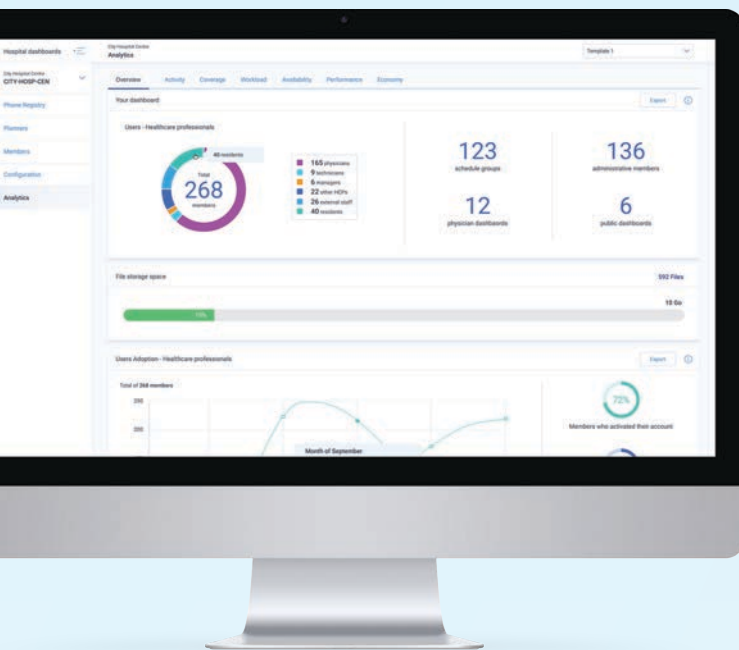

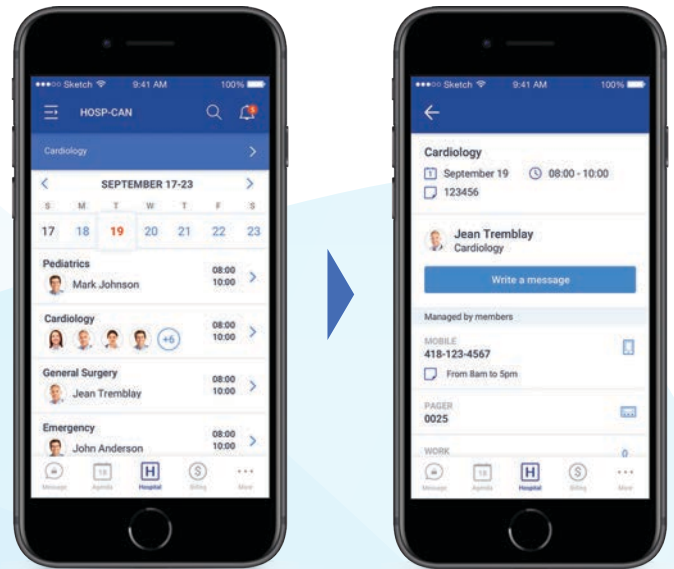

Distribute an Up-To-Date and Easily Accessible On-Call List

Management, physicians and administrative staff have access to the on-call list from their mobile devices, with a display adapted to their role in the hospital. Changes made to schedules are instantly displayed in the centralized on-call list, allowing real-time information to be disseminated to all hospital staff.

Quickly Identify Available On-Call Physicians

From the centralized on-call list, authorized responders can easily identify on-call physicians based on their specialization or schedule, thus ensuring rapid communication. This reduces communication times between users and is particularly critical in emergency situations.

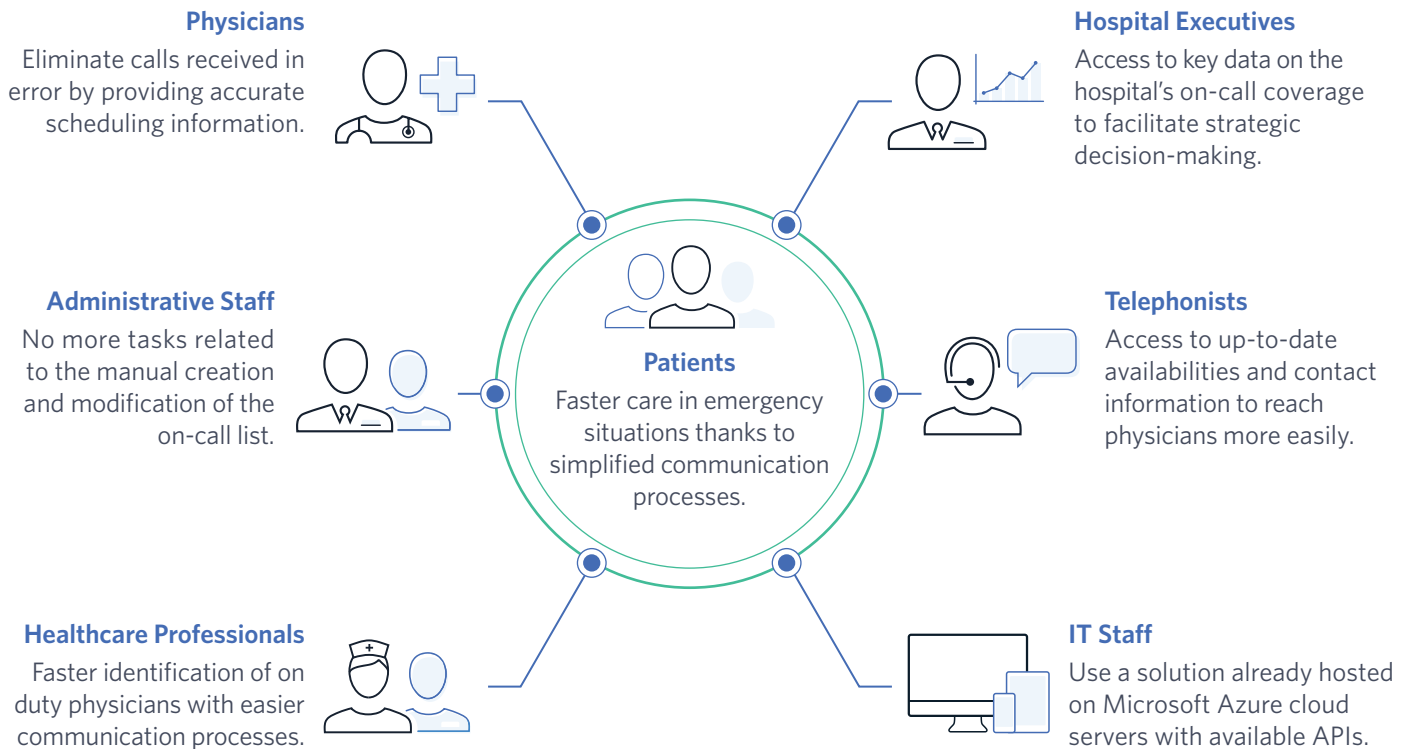

Access Key Data via Analytical Dashboards

Managers have access to vital data in the form of analytical dashboards and statistical reports, which can help them make informed decisions. This data gives an overview of on-call coverage and of the available medical service schedules and shifts.

"We can see that the application was developed by taking into account the physicians' daily work routines: users orient themselves intuitively and do what they have to do without any problems. The same applies to the administrative managers, who quickly became autonomous with the tool, particularly when generating reports or entering on-call lists."

- Florence Grellet, Director of Medical Affairs and Research, Centre hospitalier Le Vinatier (France)

Key Benefits of Petal On-Call

"To improve the quality of care offered by our network, we wanted to modernize the management of our medical on-calls, as it was not optimal. What we wanted was a centralized on-call list, always up to date and accessible at all times by all physicians and employees in the network. These objectives were achieved by acquiring the solution developed by PetalMD."

- Dr. Quentin Dulière, Assistant Medical Director of the CHC Care Network (Belgium)
