

A consortium
dedicated to Blockchain technologies
in Banking-Finance-Insurance

Collaborative innovation between corporate companies and startups

- ◆ First **European consortium** dedicated to **Blockchain technologies** in banking-finance-insurance **launched by Caisse des Dépôts**
- ◆ A **collaborative and agile approach** on DLT technologies to help the **ecosystem launch new innovative projects with DLT technologies**
- ◆ A place to **share insight** with **peers**, pool resources to work on common challenges and meet other actors of the **ecosystem**

Launched in
December 2015

Cooperation between corporate
companies and startups

3 main actions:
Do Tank, Think Tank and a Learn academy

35 partners contributing to the ecosystem and working
on opportunities and challenges in their sector

Our Partners

A collective innovation lab

- ◆ A “**Learn**” academy to learn together about DLT technologies
- ◆ A “**Do Tank**” where partners pool **resources** to **identify, develop, prototype** and **analyze** all possible **implementation scenarios** for this technology in all areas of **banking - finance - insurance**, in agile mode, and to **share concrete and achievable use cases**.
- ◆ A “**Think Tank**”, to answer the questions raised by “**Do Tank**” works and to **deepen reflection** on the challenges of this technology; open to other actors of the ecosystem, lawyers, researchers and European experts

*Think tank commissions
(Governance, ICO, tokens,
Interoperability,
decentralized finance)*

Some of our P.O.Cs

Identity & KYC

Study on the applicability of Blockchain technologies to KYC issues.

Manage digital identity by guaranteeing the respect and the security of the data

Crypto fund

Explore the possibility of creating a crypto fund

Trade Repository

Set up a demonstrator allowing the declaration of temporary sale of securities in accordance with SFTR requirements

Funds Disclosure

Test the feasibility of a DLT-based solution based on a within the framework of funds transparency

Euro Tokenization

Provide an overview on the stablecoin landscape

Create a Euro Token, a cash on ledger, in the context of the Delivery-versus-Payment of financial securities

Death Insurance

Set up a death insurance blockchain-based smart contract

ALM

Ensure ALM management of this fund on a blockchain-based solution

Collateral management

Develop an experimental Blockchain platform to manage securities lending non-cash collateral.

Thank you
