CERTUS™
myHealth Pass

A COST-EFFECTIVE SECURITY SOLUTION
ENABLING SAFE MOBILITY
A digital seal technology, offering the highest levels of data security and personal privacy protection.
SICPA is partnering with governments, local authorities and private sector actors worldwide to help contain the spread of COVID-19 and support the progressive return to normal life.

myHealth Pass is a tool enabling real-time health status management and safe mobility. It is specially designed to meet the highest levels of data security and personal privacy protection. It ensures secure and anonymous issuance, use and verification of certified data.

This flexible technology can support the return to social and economic activity in accordance with national and local policies and conditions.
A forgery proof QR-code marking applied to digital or paper-based documents

A digital security seal protected by the blockchain renders the tamper-proof QR-code universally and independently verifiable for life.

Independent and secure universal verification of health credentials

ONE-CLICK UNIVERSAL & INDEPENDENT VERIFICATION

myHealth Pass is authenticated by scanning the QR-code with a smartphone or computer. The verification is independent from the document issuer.

PRIVACY PRESERVING

Data are secured within the QR Code. No personal or sensitive information is stored neither directly, nor encrypted, in any data base or on the blockchain.
A cost-effective security solution to enable safe mobility
myHealth Pass is easy to set up and can be immediately operational. Full automation and integration with existing IT processes can be achieved thanks to the simple and REST API standards.

Looking beyond the immediate crisis, myHealth Pass can help countries and local authorities better prepare for future disease occurrence. Other use cases include vaccine or medical records, as well as medical devices and kits.

**INDEPENDENT AND UNIVERSAL VERIFICATION**

Secured by blockchain technology, verification is quick and proven for life

**PAPER AND DIGITAL DOCUMENTS**

The technology is specially designed to bridge the digital and physical worlds

**PRIVACY-PRESERVING**

No need to store personal data thanks to the unique proof delivered by the digital security seal

- One-click universal and independent verification
- Works for paper and digital certificates
- Privacy-preserving, does not store sensitive data
- Authenticates the issuer and the protected data
- Immediate access to a simple and cost-effective online service, no infrastructure required
- Enables offline verification
- Versatility, protects any type of data structure
- Can work independently or be combined with additional overt and covert security features
