Shenzhen Horion Intelligent Technology Co., Ltd

New Image of High-end Conference

With European design masters, we use new design language to create new products and win national patents to upgrade the image of the conference room! Horion smart interactive flat panel integrates functions of six devices, including projector, electronic whiteboard, computer, display, advertisement player and audio equipment. It is a multi-purpose machine for conference demonstration, whiteboard writing and annotation, wireless screen mirroring, video conference and remote cooperation, making modern conference easy and efficient.

| Video Conference - Collaboration

Whiteboard Sharing / Writing Synchronization / HD Video Conference

It completely breaks the time and space constraints, with unique cloud conference system. Mobile phones, iPads, computers and interactive flat panels can be accessed for real-time, stable face-to-face communication, sharing and cooperation.

| Wireless Screen Mirroring - Display

4K Screen Mirroring/Reverse Touch Control/Quad Screen

Horion interactive flat panel brings a new way of interaction and display. Images of computers, mobile phones and flat panels can be easily displayed on the same screen, and conference display, sharing and communication are easy and smooth. The computer can use Horion screen mirroring device to control the computer in reverse and realize two-way interaction. One screen is divided into four parts for multi-screen display, and support mobile phones, computers, tablets and other devices at the same time, so as to meet the needs of multi-person and multi-device display at the same time.

Voting Machine
Convenient and smart voting

Welcome Interface
Customize the welcome interface

Smart Wake Up
Touch the screen to wake up automatically

Agenda Timer
Easy to set countdown

Feedback
Timely feed back to solve problems

Any Interface Annotation
Annotate and save as you like

I Touch Handwriting - Creating

Pen Writing / Smart Form / Automatic Recognition

With 1 mm recognition accuracy, 20-point touch control, new writing software, single-point and multi-point writing mode, two kinds of brush selection, and smart handwriting algorithm, it presents fine handwriting and restores the real writing experience.

In the case of connecting to the network, it writes the keywords that need to be searched, and searches with one click after delimitation. The search information can be quickly displayed on a small window. With the default search engine Google, it is convenient and fast.

Through Bluetooth function, it can connect mobile phones, audio and other wireless devices, transmit data, and support wireless connection with printing device for document printing.

It supports graphics, 4K video and smart form insertion, with rich expression, only for simple sharing experience.

Touch Handwriting

Writing on Horion interactive flat panel with writing pen is fluent and smooth, and the color thickness can be freely selected. It has its own stroke to restore the real effect of writing on white paper.

Back of Hand Erasure

The back of the hand can be used as an eraser. Once it is wiped lightly, the contents written on the whiteboard can be removed, and the real eraser effect can be restored.

Small Screen Mirroring to Big Screen

The independently developed screen Apple mobile phones, tablet computers, laptops and other devices. The interactive flat screen can interact with the laptop and the spliced large screen, making information transmission faster.

Zero-distance Cooperation

It completely breaks the time and space constraints. With unique cloud conference system, mobile phones, iPads, computers and interactive flat panels can be accessed for real-time, stable face-to-face communication, sharing and cooperation.

13MP Camera

Built-in 13MP camera for clearer teleconference.

8-Array Microphone

With echo cancellation, noise suppression, beamforming and other voice algorithms, clear audio pickup, efficient communication, far-field pickup distance up to 8 meters, and no dead corner in the conference room.

High-quality Dual Speakers

Matched with the digital sound system, the voice is clear and penetrating, and the bass is vigorous. It can make you feel the shocking sound effect.

Screen Mirroring by One NFC Touch

Prepare mobile phones with NFC function. After the NFC function is enabled, approach the NFC area at the bottom of the machine and the devices can be mirrored on one screen as fast as in one second. Four kinds of devices can be mirrored on one screen. It supports multi-screen collaboration and information sharing, which effectively reduces such tedious matters as document arrangement, printing and distribution before the conference. It makes conference presentation, sharing and communication easy and smooth.

Horion Sharing

After connecting the mobile phone's hotspot to the interactive flat panel, open Horion Sharing APP on the panel. Scan the QR code of Horion Sharing by the scan function of WeChat, QQ and other APPs. On the phone selection page, select the pictures and documents to be shared and you can quickly share them with others.

Horion M5A Pro - Extraordinary Wisdom

Horion M5A Pro interactive flat panel is a professional all-round smart conference pioneer and has a wider range of scene cooperation ability, making collaborative office zero distance. Just one Horion M5A Pro can easily realize video conference, whiteboard writing, wireless screen mirroring and remote cooperation, with more functions and simple operation.

Android 9.0 Smart Operating System + WINDOWS 10 System

With Android system, you can choose computer module to realize Windows system.

Zero Fit Screen

The distance between the toughened glass and the screen is 0, which can effectively prevent light reflection. The display effect is excellent, and the writing experience is excellent.

13MP Camera+ 8-Array Microphone

High-quality screen and clear and stable audio-visual pickup system bring excellent audio-visual conference experience.

NFC

With built-in NFC function and smart pen, the whiteboard function can be adjusted at any time; NFC supports "one touch, screen mirroring".

New UI and Rich Applications

It can right slide into the common interface and left slide into all applications, with simple interaction, and it is easy to use it. Interface design blends in elegant Horion purple and high-end business with simple trend creates a new vision. In pursuit of better user experience, Horion R&D team regularly pushes OTA upgrade package according to the comprehensive evaluation of new functions and user feedback every month and continuously optimizes the wonderful interactive performance of products.

I Horion Conference Management

Smart Centralized Control System / Conference Doorplate / Enterprise Cloud

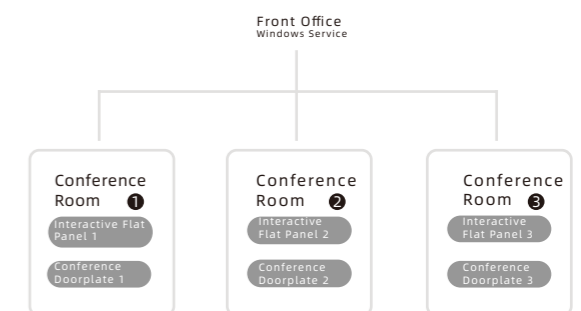

Horion is committed to making conferences easier and helping enterprises in a comprehensive and profound manner to improve the work efficiency of office scenarios.

Smart Centralized Control System: it can control multiple interactive flat panels at the same time, which offers information distribution and conference management, and other scenario applications.

Conference Doorplate: it supports conference information display, demand submission (completing the use of the conference room, preparing tea, etc.).

Enterprise Cloud: it supports whiteboard writing and document PPT one-key saving, providing storage space for important conference documents of enterprises.

The conference management system is a software and hardware system designed for managing several conference rooms. By using this system, the administrator does not need to go to the designated conference room to confirm the status, and can directly check the use of each conference room through the server (whether it is in use, whether the tea is needed, etc.);

Horion - Shenzhen R&D Center

Shenzhen Horion Intelligent Technology Co., Ltd. is committed to becoming a leading provider of smart products and solutions in China. Located in the high-tech industrial park in Bantian, Shenzhen, it has set up multiple industrial parks in Shenzhen and Huizhou and many after-sales service outlets throughout the country.

Horion adheres to the corporate mission of "Intelligence Transforms the Future" and hopes to popularize the smart interactive flat panel among enterprises to help create high-end conference images. Horion smart interactive flat panel is not only a device for smart conference, but also a cross-era product that enhances corporate image, efficiency and intelligence. It can be applied to various scenarios such as business conferences, corporate offices, education and training and product display. It is powerful and easy to use.

Horion has always been focusing on product R&D with professionalism, dedication and innovation, and is committed to leading the breakthrough and innovation of commercial display products. Horion has never stopped exploring new conference solutions from a future perspective. Horion is developing cutting-edge technology to facilitate smart conferences and to bring forth a new era of smart business conferences.

Horion-Huizhou Factory

4K
3840X2160

| 4K Commercial Screen

3840×2160/ Commercial Grade / High Brightness

3.2mm AG anti-glare toughened glass is used to effectively eliminate strong glare. With Moh's hardness level 7, it provides a better writing experience.

Thanks to the high-quality 4K ultra-high-definition commercial screen and fifth-generation color engine chip, it presents you with more natural picture quality.

Beautiful Appearance

Concisely designed and integrating oriental aesthetics and the ideas of European masters, M5A Pro is turned into a fashionable and high-end work of art, concise but not simple.

For the first time, the zero fitting process is adopted to revitalize the visual sense. Every frame is like the scene of a blockbuster in the cinema. The screen glass and display screen adopt the industrial zero fitting process, showing more delicate picture quality and better writing experience. It's designed with AG toughened glass, anti-fingerprint coating and anti-glare protection layer.

Screen Mirroring Device

Wireless Screen Mirroring by a Touch

Smart Pen

Three Key Design for Simple Operation

Writing Pen

Exquisite Design and Easy Operation

In piano baking paint and frosting technology, it combines concise artistic inspiration and looks elegant and extraordinary; with smart magnetic suction design and extremely light body, it's easy to use; you can make annotations smoothly and fluently.

Microphone

Three Key Design for Simple Operation

360° audio pickup, human voice positioning, ultra-long distance communication, AI noise reduction; built-in lithium battery, 10H long communication; supporting USB, Bluetooth and AUDIO cable communication, it's easy to use, and compatible with a variety of devices.

Conference Doorplate

Smart Conference Management System

10.1-inch IPS screen, conference reservation, tea reservation, conference system management, smart distribution of conference room, one-click management of conference, 1+16G storage, support wireless network connection.

Horion Enterprise Cloud

Safe and Reliable File Management

Conference file management, conference document storage, quick access, security protection, 16 GB SSD + 1 TB mechanical hard disk, scalable up to 36T at maximum. It supports web, iOS, Android, interactive flat panel, and fetch. It also supports mobile APPs to share files to enterprise cloud.

Mobile Base

Exquisite, Beautiful and Convenient to Move

The HK76 new base is special for Horion Interactive Flat Panel. Made of high-quality carbon steel, it's safe, reliable, and convenient to move.

Camera

Seamless Collaboration of HD Video

With 110° horizontal visual angle and 4K resolution, it's compatible with most video conference software, easy to use, stable and smooth, and doesn't need any additional driver.

Computer Module

Strong Core with Excellent Performance

Windows-i5 computer module adopts Intel Core, supports energy-saving technology and 64-bit computing, and has powerful operation ability. It's compatible with all kinds of video software, and can be installed freely according to needs to meet individual needs.

Storage Box

Convenient Storage

In aluminum alloy sand-blasting oxidation process, the conference room storage box is large and easy to use and can simultaneously store 2 wireless frequency synchronism devices, 4 smart writing pens, 1 remote control.

Application Scenarios

Horion empowers efficient development of enterprises by means of science and technology. Its products have been fully used for business conferences, corporate office, education and training, product display and other application scenarios, which comprehensively enhance the high-end image of enterprises to boost the market competitiveness of enterprises.

Business Conference

Horion makes the whole conference process faster. Corporate office conferences can be held without limitation of office space and office distance at any time any place, achieving efficient collaboration.

Training

It supports remote training, helps training institutions to achieve diversified, informationalized, convenient knowledge dissemination.

Commercial Display

It supports flexible release and display of diversified information. With smart centralized control management, everything is under control.

Education

It aims at building modern classrooms to facilitate the sharing of teaching resources, collaboration in teaching affairs conferences, and the interconnection and transmission of multimedia tools.

M5A Pro Smart Interactive Flat Panel

In ultra-narrow edge fusion machine design, it boasts good appearance and talent; it has the whole series of true 4K large screen, high fidelity sound system, and sensory wake-up; hand-writing recognition reconstructs the tradition, and more ways of expression are handy; the new NFC interaction enables information to be displayed on the same screen by a touch, realizing information sharing with ease; the intelligent office work can be applied in various scenes and its great potential and convenience are beyond our imagination.
