

PEXIP VIDEO PLATFORM

Video Platform as a Service

Easy-to-use video engine with simple building blocks for rapid development of your own video application

Designed for regulated industries

Pexip Video Platform as a Service (VPaaS) is a comprehensive cloud-based offering that provides tools and APIs for you to embed video capabilities into your applications or services seamlessly.

Designed to simplify integration, Pexip VPaaS allows you to bypass the complexities of building from the ground up and eliminates the need to manage any computing resources or infrastructure, freeing you to focus on innovation and user experience. Hosted in a geo-fenced cloud to ensure data security, Pexip VPaaS adheres to strict privacy protocols by not storing any names, personal identifiers, video/audio/data, or other personal data.

Connecting patients and medical professionals

Embed video into your healthcare application. Share multiple streams simultaneously for increased collaboration. Without exposing sensitive patient data.

Connecting citizens and government officials

Make it easier and more efficient for citizens to interact with government officials while maintaining complete privacy.

Connecting clients and financial advisors

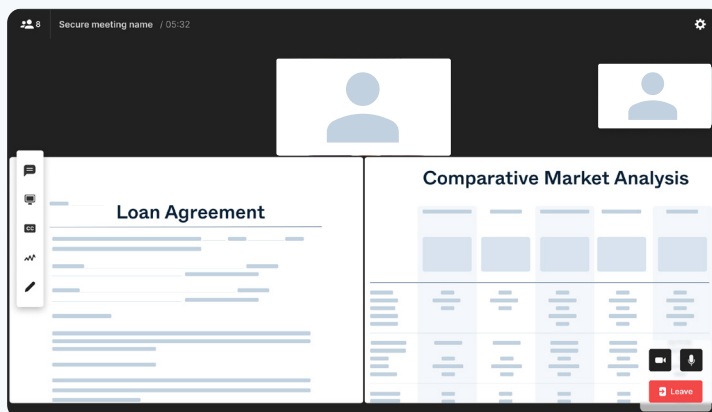

Better connectivity with your customers to drive up the value of each interaction without compromising the trust customers place in you.

High-quality video meetings

Fully brandable and customizable layouts

Full SDKs and sample apps

Multiple presentation streams

Product Specifications

Pexip VPaaS is designed for developers seeking to create both standalone and embedded video solutions. With a comprehensive suite of tools and APIs, this platform facilitates the quick and efficient development of high-quality video applications, enabling seamless integration into websites or the creation of video-enabled apps.

Key features

- ✓ **High-quality video meetings:** Users can join meetings from a variety of devices with full HD video and content-sharing
- ✓ **Compliance:** Regionally geo-fenced cloud lets you choose where your data resides at rest and in motion. Have ultimate control and be compliant with local regulations.
- ✓ **Total privacy:** No personally identifiable information (PII) is stored anywhere to reduce your risk in the event of a security breach.
- ✓ **Reduced development time:** Access to APIs and SDKs, documentation, and support so you can effortlessly embed video into your apps
- ✓ **Customizable and flexible:** Layout flexibility and multi-stream main video, content & data channels

Key specifications

- ✓ Multiple presentation streams
- ✓ Fully brandable
- ✓ Custom layouts
- ✓ Regionally geo-fenced hosted service
- ✓ No storage of PII
- ✓ Advanced end-to-end encryption technologies
- ✓ Policy-based user authentication
- ✓ Full SDKs and sample apps

Independently verified

Pexip solutions are independently verified by third-party bodies, highlighting its commitment to security, reliability, and compliance with industry standards.

About Pexip

Pexip empowers seamless communication across organizations regardless of technology platforms and security requirements. Pexip offers customizable and flexible solutions that integrate with existing technologies, enabling collaboration and productivity. Pexip's distinctive capabilities allow for tailored, state-of-the-art video application solutions, ensuring stringent data privacy, operational resilience, and secure, seamless collaboration tailored to the defense sector's unique needs. Pexip holds multiple data security and privacy certifications and is independently ISO 27001 and ISO 27701 certified.
