EVC® TECHNICAL SPEC SHEET

The EVC All-In-One module is engineered to help card manufacturers add class-leading EVC technology to their card products with unprecedented ease and speed. The drop-in EMV replacement design provides maximum efficiency and yield, designed to fit into existing dual interface setups using industry-standard specifications.

The EVC All-In-One module provides built-in e-commerce protection at the card level by replacing the static security code (CVV/CVC) with a dynamic code displayed on a battery-free e-paper screen, embedded into the card itself.

The dynamic security code changes with every contact/contactless EMV transaction at any POS, ATM, or via an issuer's mobile app.

Technical Specifications

|	
Module Type	EVC All-In-One, 8 PIN
Display	3-digit
Display Type	Always-on electronic paper
Power	Battery-free, power harvesting from EMV terminal
Finish	Palladium, Gold
Interface	Dual Interface (contact, contactless)
EMV Chip	All major brands and OS
Card Body	Compatible with ISO 7810 ID-1, supports all common card constructions & materials (metal, PVC)
Packaging	35mm reel, ~7000 modules
Processors & Verifications	All major processors; SDK for any HSM

Features & Benefits

- Helps eliminate CNP fraud
- Helps eliminate false declines
- Fights physical fraud with "Invisible Mode"

- Reduces issuer's cost of fraud
- Adds revenue stream with premium card feature
- Attracts customers, reduces churn

- Reliable, durable construction
- Leverages existing EMV rails
- Compatible with all standard card features

EVC is an Issuer Solution
With just a lightweight update for the Issuer-Processor, EVC is designed to be easily implemented.

E-MERCHANT	ACQUIRER	NETWORK/SCHEME	ISSUER	ISSUER- PROCESSOR

NO CHANGE REQUIRED

LIGHTWEIGHT UPDATE
- Existing infrastructure
- No additional server

EVC SECURITY YOU CAN **SEE**

EVC® All-In-One Technology

The EVC All-In-One module incorporates a decade of manufacturing technology and excellence, in a chip the size of a fingernail.
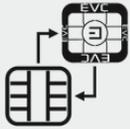

Contact/Contactless

Battery Free
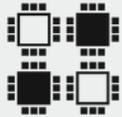

Power Harvesting

Always On ePaper Display

Drop-In Module

Inductive Coupling

EMV Chip & OS Agnostic
