Picomto

Meet the **industry's challenges**

1 Store your know-how

- Get it right first time and ensure repeatability of activities
- Assist your operators or validate their actions remotely
- Manage the acquisition and monitoring of your teams' skills

2 Operation variance

- Master your most complex processes
- Reduce the cognitive load on operators with hands-free peripherals
- Work together anywhere, anytime, in safety

3 Plot your tasks

- Identify the root causes of your drift and create automatic reports
- Reduce the risk of errors and carry out audits at the click of a button
- Structure and add value to your data to build relevant dashboards

A **central tool** to serve the field

MACHINES
IOT & SMART TOOLS

-80%
training time for digital training

Picomto is the single central interface for the connected operator and manager on a daily basis.
Operators are guided through the interface as soon as they take up their post, enabling them to consult the tasks to be carried out and the instructions to be followed.
The manager, for his part, orders, distributes and supervises the operations of his teams in real time.

Our promises

Your guarantees

NO CODE SOLUTION
Quick and easy to learn without any specific skills

ACCOMPAGNEMENT
A team dedicated to your project, should you need it

SECURED DATA
Standard or On Premise hosting available
