

LET'S TURN THE INDUSTRY OF THE FUTURE INTO A REALITY

R&D Technology designs and manufactures innovative production equipment. We develop customised solutions in robotics, special machines, by unit or in series.

Innovation for **Industry**

FOR YOUR PRODUCTION PLANTS

Robotics - Cobotics

With a recognized know-how in multi-brand robotics integration, we design and build robotic or collaborative cells.

LET'S ROBOTISE YOUR PRODUCTION

Flexible assembly cell

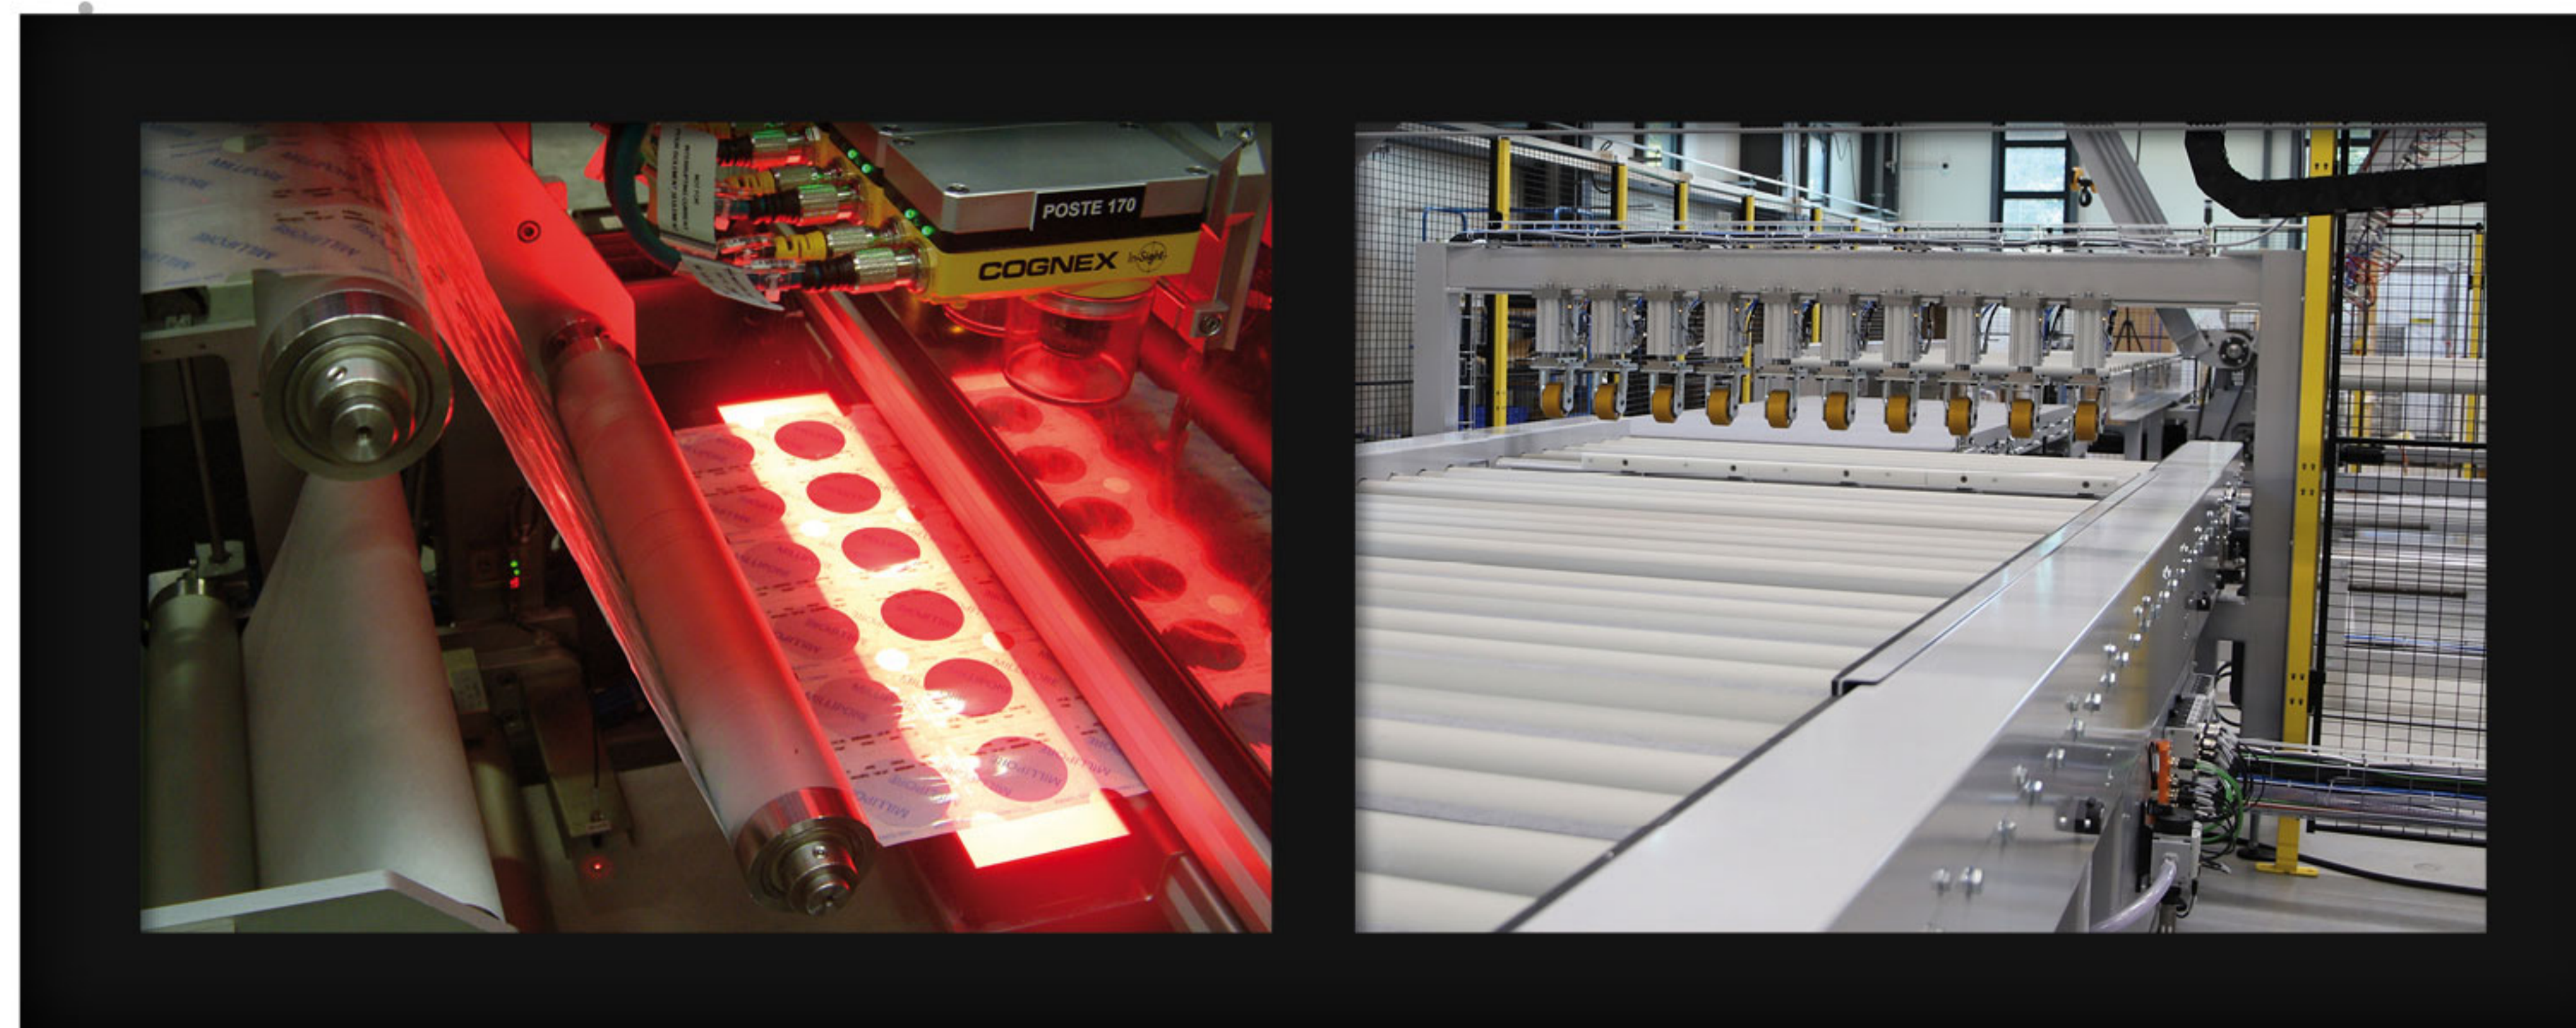

The result of a technological challenge, our Evolubox® cells open a new way in the automated assembly of small and medium series. They allow you to easily automate your industrial production in a progressive way or to share the investment of an automation system over several medium series product lines.

BOOST YOUR PRODUCTIVITY

Customised production equipments

Backed by our passion for technology, we design and manufacture state-of-the-art equipment for whenever a standard solution isn't the right fit.

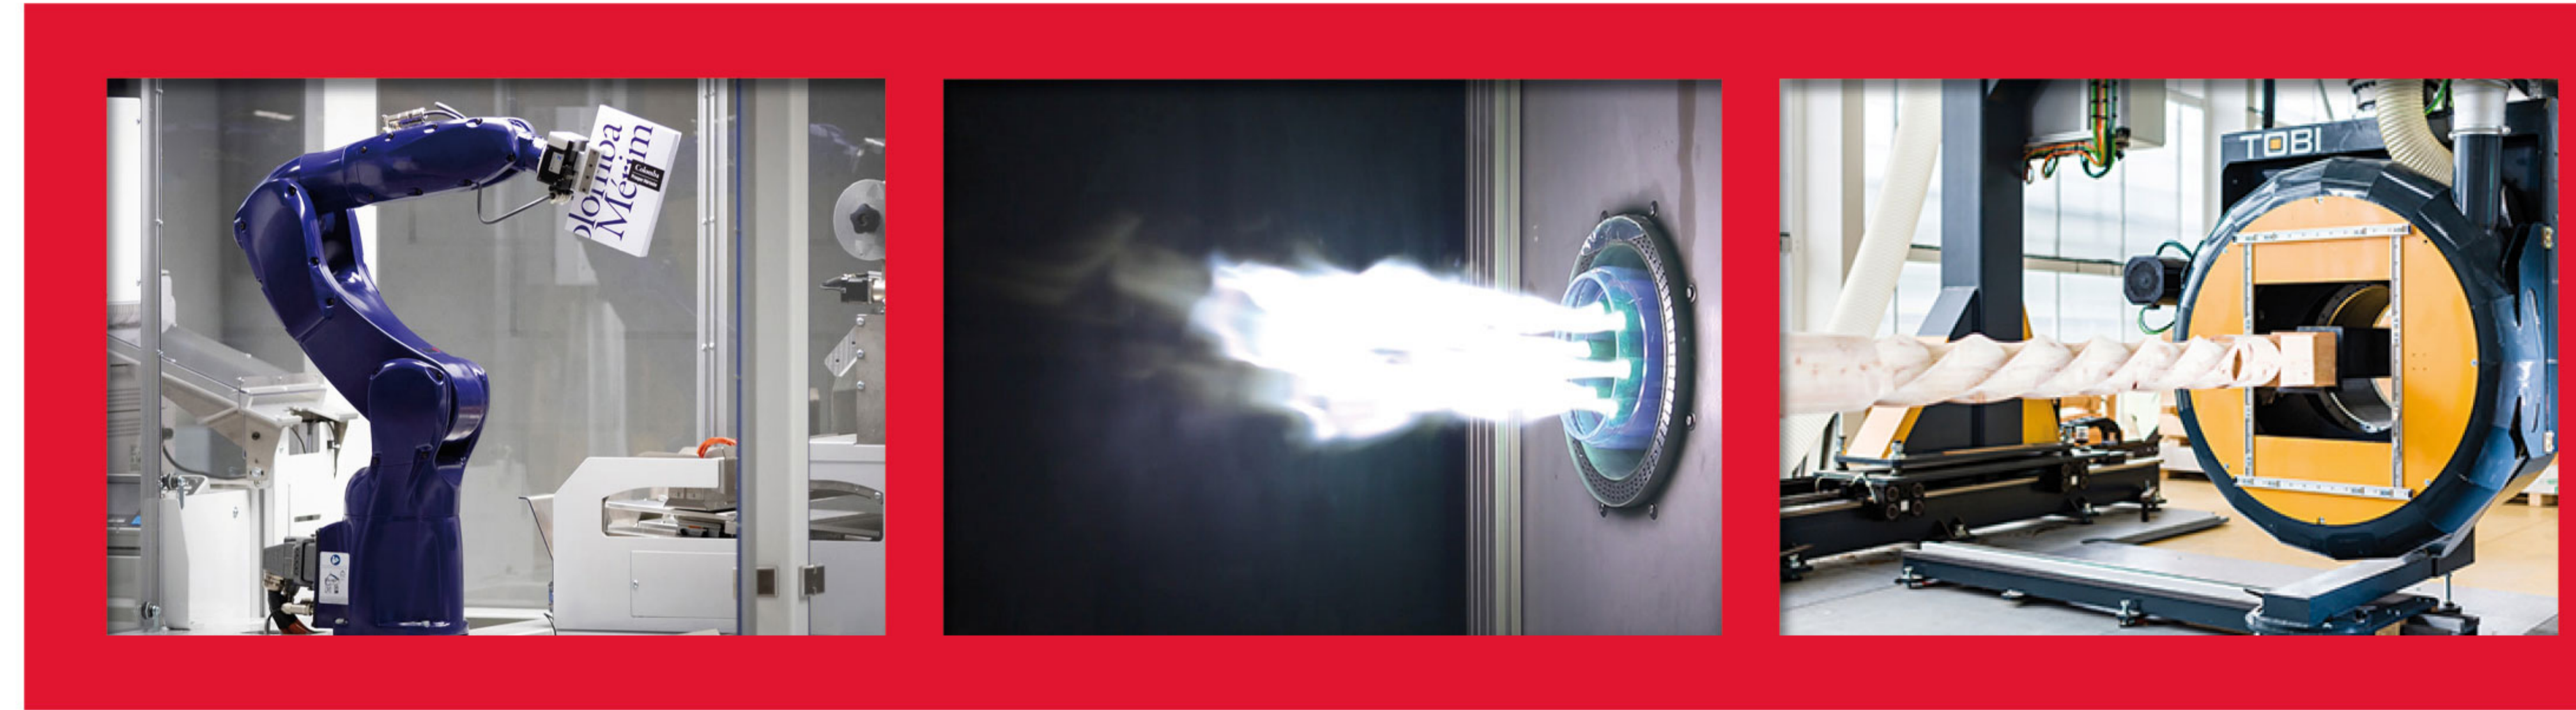

CHALLENGE US

The R&D Technology Group offers you also subcontracting services in mechanical design, automation and robotics.

FOR YOUR CLIENTS

Innovative technological projects

As an industrial partner for innovators, our exclusive service is intended for entrepreneurs and industrialists who want to develop and market innovative technological equipment. R&D Technology accompanies you from the first idea to the series production of equipment.

MAKE YOUR INNOVATIVE TECHNOLOGICAL EQUIPMENT PROJECTS A REALITY

Manufacturing of equipment in series

Offer your customers innovative equipment designed to your scope statement and produced on demand by R&D Technology.

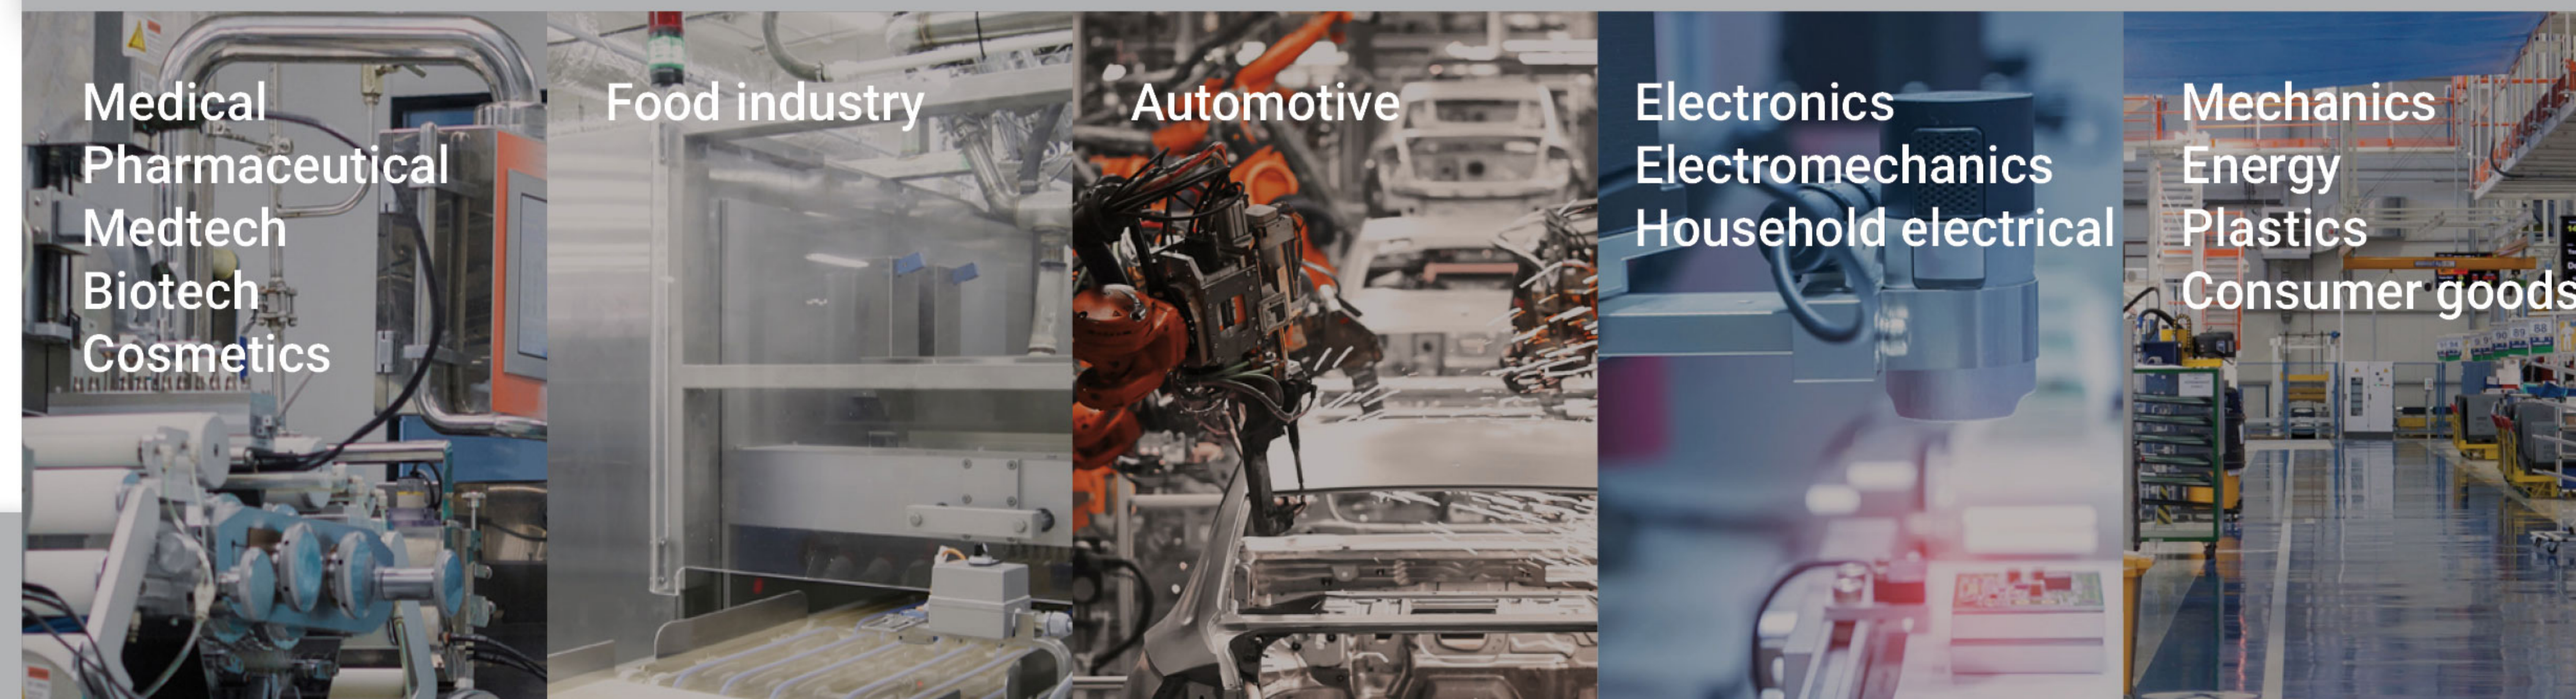

Intended for industrialists, start-up and project leaders, our service allows you to remain focused on your core business by outsourcing the entire manufacturing process.

OUTSOURCE THE MANUFACTURING OF YOUR EQUIPMENT

OUR INDUSTRIAL SECTORS

For more than 25 years, R&D Technology has been working in many industrial sectors to provide solutions adapted to their technical, economic and strategic needs.

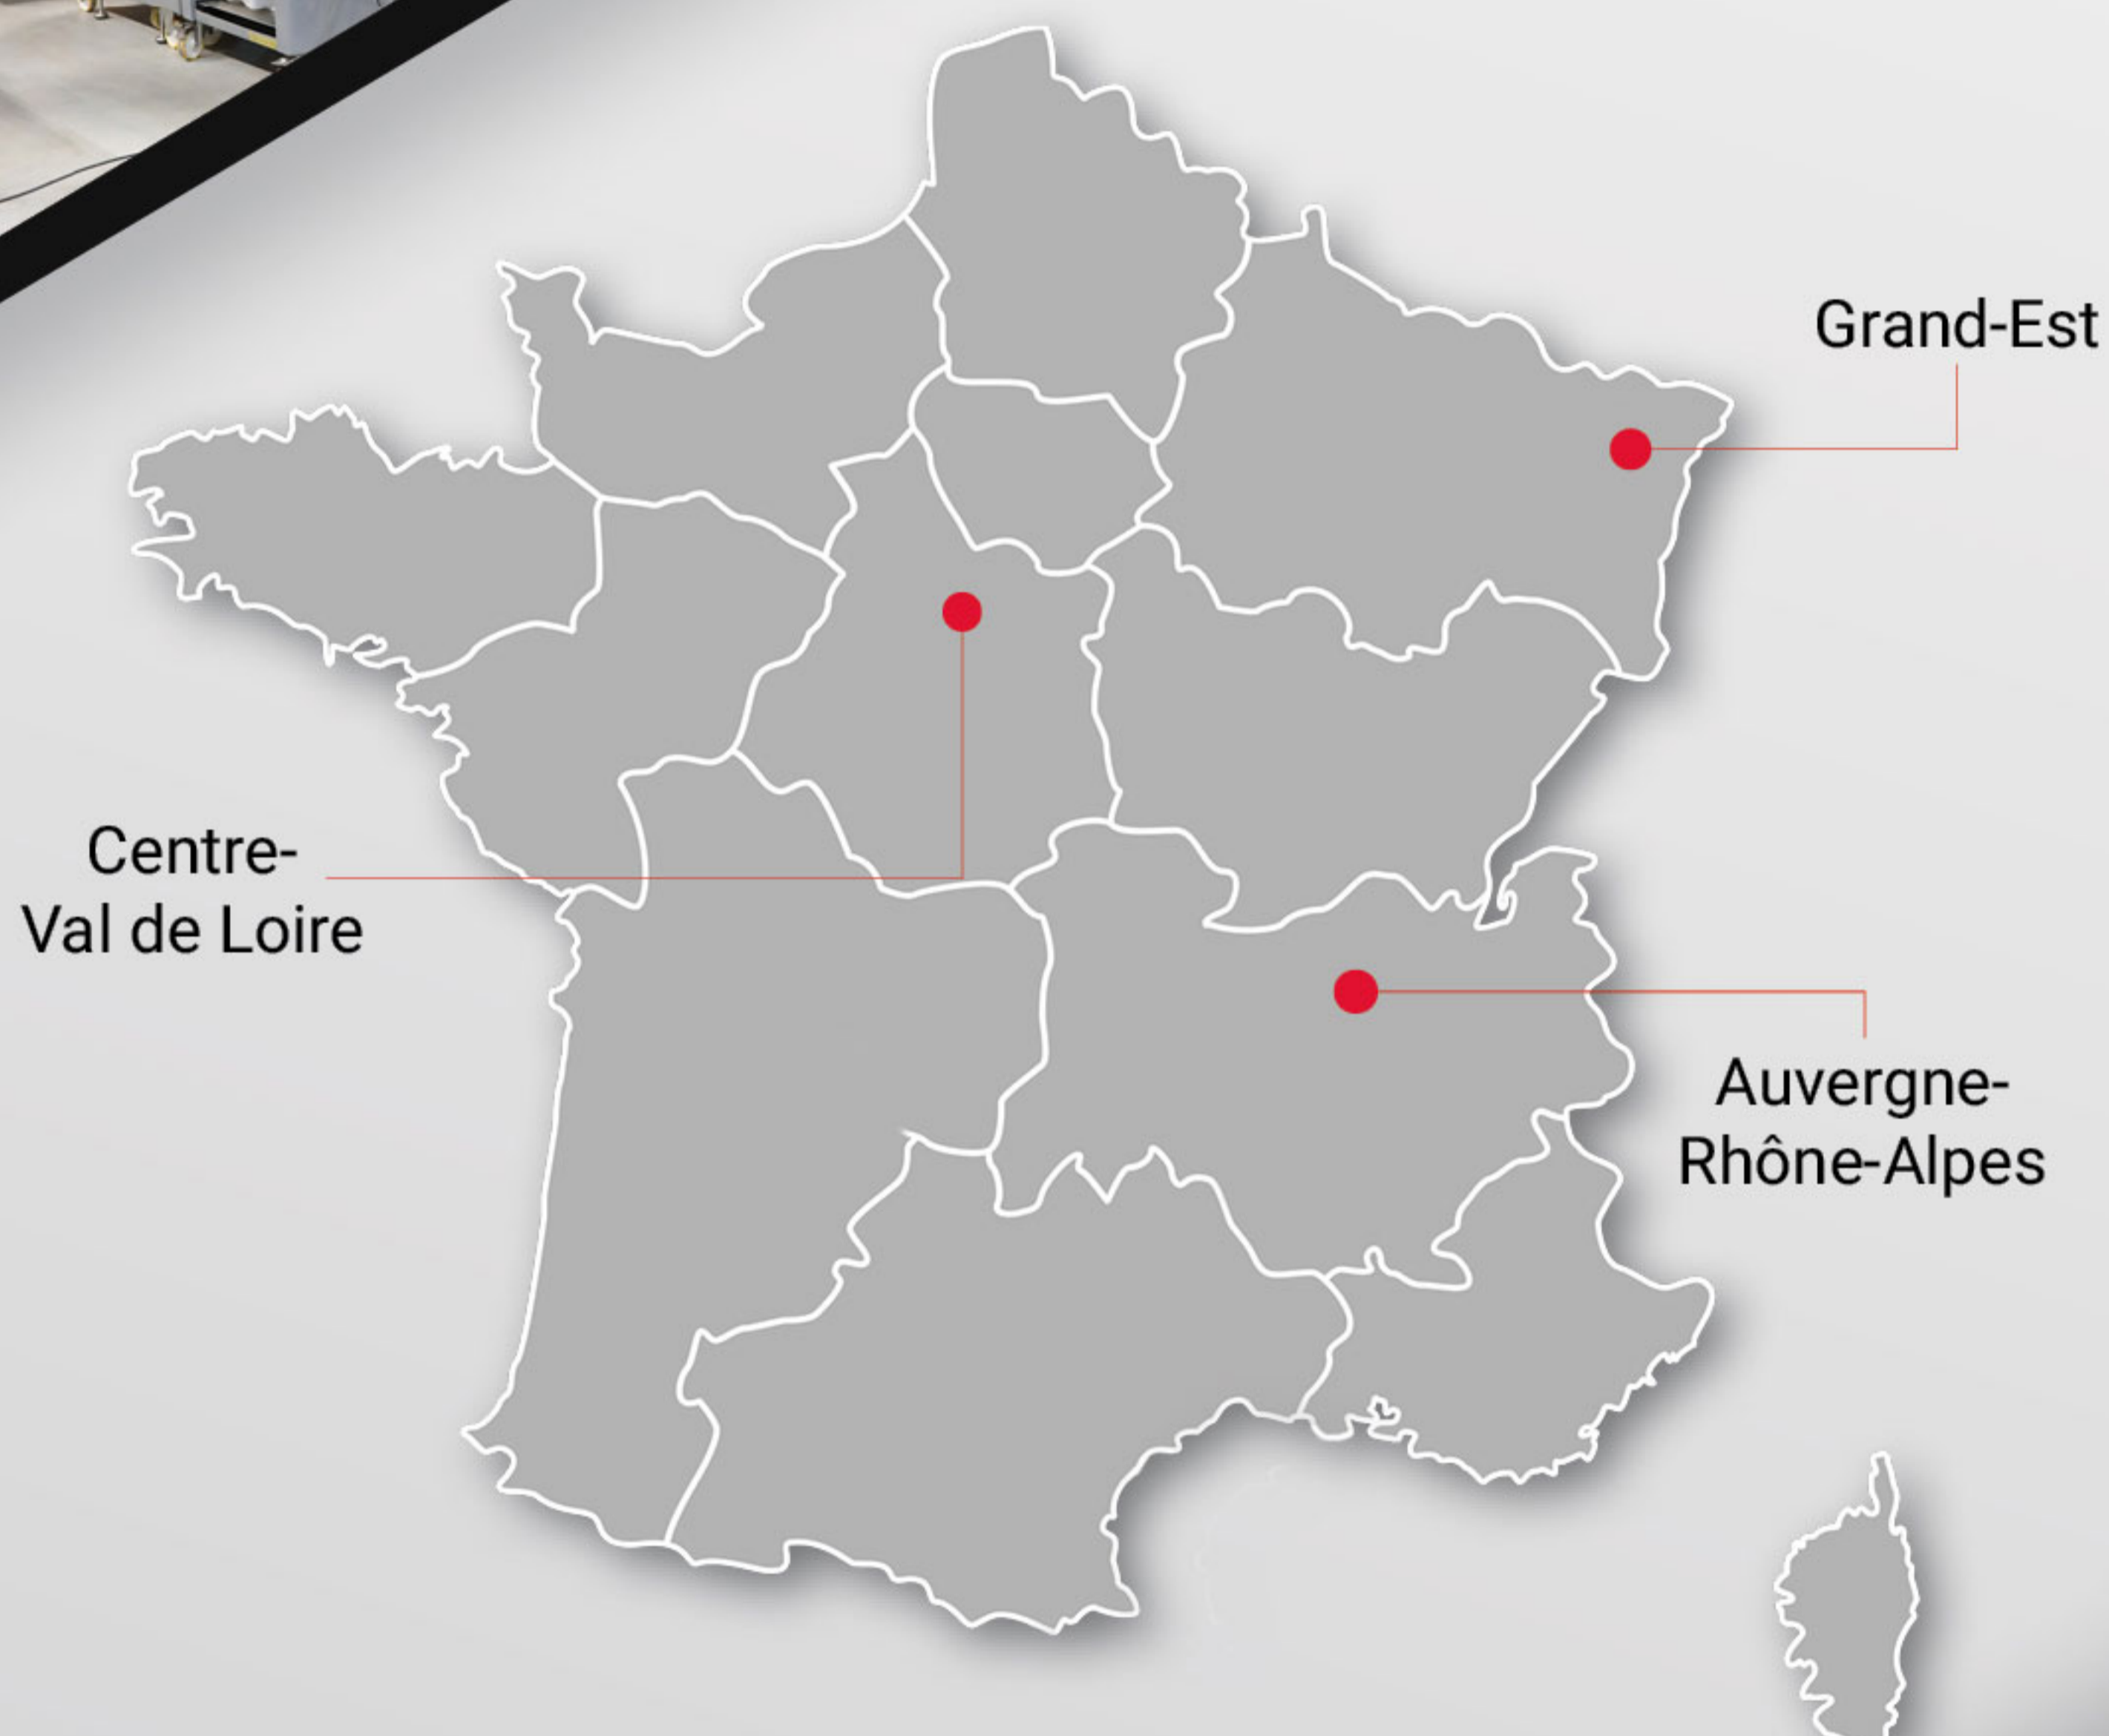

GROUP R&D TECHNOLOGY

Innovation at the service of industry

The R&D Technology Group develops innovative solutions in robotics, special machines and turnkey production equipment, either individually or in series, in an « **Industry of the Future** » approach.

In an increasingly tense economic market, companies must constantly find effective ways to remain competitive. R&D Technology supports all sectors of activity by offering innovative solutions to industrialise new products or existing processes.
