

FLAX FABRIC FOR COMPOSITE APPLICATIONS

FLAX FIBRE AVANTAGES

- Natural fibres, biobased, recyclable, sustainable alternative to standard composites
- Lightweight, low density, high specific mechanical properties
- Good vibration and damping absorption, good acoustic insulation

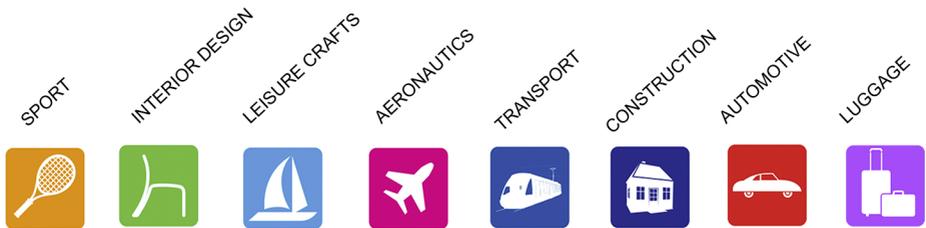

EMANUEL LANG FLAX BENEFITS

- Conservation of the mechanical properties of the fibres during the weaving process
- Non twisted fibres for improved mechanical properties and easier impregnation
- Non coated fabrics, non irritant and non abrasive on toolings
- 100% french production 
- Large range of woven and UD fabrics

UD : 210, 250, 420 g/m²

2x2 twill : 200, 250, 300, 350, 400, 500, 650, 800 g/m²
