

Hypor Maxter

HIGH QUALITY PIGLETS
FAST-GROWING AND
UNIFORM FINISHERS
MORE QUALITY MEAT

The Hypor Maxter is a top Piétrain sire line, that delivers high quality, uniform, and efficient progeny. The piglets grow fast and uniform to become more full value finishers and result in uniform carcass quality hitting the grid.

Hypor Maxter

HIGH QUALITY PIGLETS

Heavy birth weights

Piglets from the Hypor Maxter have an average birth weight of 1.5 kg (3.3 lbs), with very few small piglets.

Uniform litters

Hypor Maxter piglets are set up for success with the combination of uniform litters and heavy birth weights.

Piglet boost

The Hypor Maxter provides a quantifiable "piglet boost", with an increase in total born, born alive and weaned by +0.5 – 1.0 piglets.

FAST-GROWING AND UNIFORM FINISHERS

More turns per year

The Hypor Maxter is one of the fastest growing Piétraains in the world, which decreases the number of days in the barn and increases the turns per year.

Uniform from wean to finish

Uniformity from wean to finish with Hypor Maxter pigs will improve barn throughput for more predictable finishing dates.

More full value finishers

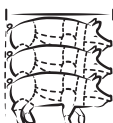

The Hypor Maxter produces more full value finishers, resulting in better labor and resource use.

MORE QUALITY MEAT

Easily fits many grids

The carcass characteristics of Hypor Maxter pigs fit many grids around the world for better producer revenue.

Uniform carcass characteristics

Carcass uniformity is unmatched, giving producers more revenue and processors a more reliable product to sell.

Lower drip loss

The Hypor Maxter produces carcasses with lower drip loss, benefiting the processor and the consumer.
