

CTI Systems is a leading supplier of integrated automated material handling and processing solutions, specializing in heavy-load applications.

Our portfolio includes:

- Automated Material Handling Systems
- Aircraft Servicing Systems
- Storage and Surface Treatment Systems
- Assembly Lines
- MES & WMS Software for Production Control and Optimization of Storage and Distribution Processes

ONE SYSTEM. TOTAL CONTROL.

- AGVs are fully integrated with CTI racking systems
- One partner. One contact. All solutions.
- Storage, WMS, and AGVs – covered

Your Plant. Your Tech. Your Choice.

- Zero lock-in: Upgrade, expand, innovate without costly overhauls
- Future-proof: Open standards for easy scaling, interoperability, and simple AGV routing changes or extensions
- VDA 5050 ready: Integrate any compliant AGV or fleet on one platform

ENGINEERED WITHOUT LIMITS

Custom Engineering

Solutions tailored to your loads, layout, and processes—no compromises, no off-the-shelf limitations.

Open Architecture Systems

Stay free from vendor lock-in with flexible, interoperable platforms.

Multibrand Fleet Management

VDA 5050-compliant control of diverse AGV brands through one unified system.

End-to-End Logistics

Heavy-load WMS built for your operations, removing the need for third-party integrations.

Unmatched Load Handling

Move your heaviest and most complex materials with reliable, precise automation.

Innovation and Creativity

Advanced, forward-thinking designs that keep your operations ahead of the curve.

CTI - AUTOMATED VEHICLES

If others say *too difficult*,
we say *let's build it*.
