

CTI Systems is a leading supplier of integrated automated handling and processing systems, with a focus on heavy loads. Our portfolio includes automated material handling solutions, aircraft servicing systems, storage systems, surface treatment plants, assembly lines, as well as software solutions for production control and the optimisation of storage & distribution systems (MES & WMS).

Software Solutions

STRIVING TOWARDS A SMART FACTORY

To meet the demands of new and smart manufacturing facilities, CTI Systems provides specialised and modular software packages for automated production facilities.

The CTI Software modules can also be customised to meet specific requirements to any project.

Controlling Complexity

www.ctisystems.com

Control your equipment with state of the art PLC software

- Modular hardware design
- Numerous communication options
- Integrated technology functions
- Interaction of controller and operator control and monitoring

Schedule and monitor your production with a tailor made MES

- Fully customizable
- In accordance with ANSI/ISA 95
- Real time view of your production
- Connection between your planning level and your production level

Automate your material flow with the WMS from CTI Systems

- Controlling, monitoring and optimisation of your material flow
- Management of your transport units
- Management of your material
- Real time inventory

Deep dive into your production data and find possible optimisations

- Simulate your production before the installation with Virtual Commissioning
- Review past production cycles with Record and Replay
- Optimise your daily maintenance with the CTI CMMS
- Find spare parts and the technical documentation in our Online spare parts catalogue
