

**v+ vrac PLUS**  
*Tank designer-manufacturer*

requirement  
+  
experience

Vrac Plus was created in 1998 by joining 2 companies TSCI (founded in 1990, Plélo) and GUILLONNEAU (founded in 1963, Challans) together. We are French leader in manufacturing trailers and equipments for bulk and animal nutrition transportation.

#### OUR ORGANIZATION

On each one of our two production sites (6500 m<sup>2</sup>), about 8 complimentary activities take turns : designing, boilermaking, welding, mechanic, hydraulics engineering, electrical engineering, automation engineering and painting.

#### OUR MARKET

90 specialists work closely together to create more than 80 sets of trailer per year, serving both domestic and international markets.

#### OUR QUALITY POLICY

Our monitoring system, approved by ISO 9001-2008 and certified by UTAC, closely follows each project and allows us to meet your specifications and deadlines.

# Our bodyworks and equipment

**We design bodies adapted to many types of vehicle :**

- . 3 axles semi trailers
- . Carriers 19, 26 and 32 tons
- . Portable tanks
- . Trailers with central axle or round ball

Although custom designed, our products all share the following characteristics that mark our brand :

- + **RELIABLE**  
We build solid bodies with high quality components to ensure durable operation.
- + **EFFICIENT**  
Our design integrates the necessary elements for optimizing productivity : axle configuration, handling, optimized load, ease of loading and unloading, delivery rate.

- + **SECURED**  
For your operators : each project is designed to ensure operator's optimum safety in accordance with standards. We also strive to maintain ease of use.  
For transported products : we take into account your sanitary requirements and put our efforts in maximizing the quality and ease of cleaning, in compliance with the regulations of cross- contamination prevention.

- + **AESTHETIC**  
Our works are deemed to present a well-cared completion. This is the result of our quality control procedures at each stage of the production and also our high standards for customer satisfaction.
